CITY GOVERNMENT OF 1932

TOGETHER WITH THE

ANNUAL REPORTS

OF THE OFFICIALS OF THE YEAR

1931

CITY DOCUMENT NO. 43

E. L. GRIMES PRINTING COMPANY
368 CONGRESS STREET
BOSTON

AN INDEX OF THE REPORTS APPEARING
IN THIS VOLUME WILL BE FOUND
AT THE END OF THE BOOK

INAUGURAL ADDRESS BY MAYOR THOMAS J. McGRATH TO THE MEMBERS OF THE CITY COUNCIL MONDAY, JANUARY 4, 1932

Gentlemen of the City Council:

Today marks the 140th year of the incorporation of the municipality of Quincy and the forty-third year under a city form of government. These anniversaries in themselves are of no special significance except as they reveal the tally of the years during which the community has existed as a separate and independent municipality. During this long span of years, the city has grown in numbers and in prosperity until today we are proud to be an instrument in the service of a municipality that is steadily making its way to a foremost place among the political divisions of the State.

The opening of the new year may, however, have a deep significance to us when we consider the unusual conditions which confront the city at this moment. The times call urgently for the most drastic economy, and as far as the Mayor can achieve this result, the expenditures for the year will be kept down to the lowest figure consistent with efficient management of our manifold activities. When the tax rate was declared last September, I stated in the press that Quincy was for a time at least brought to a realization of the old economic law of diminishing returns, and with our small additional new wealth created in 1930 and 1931, the city would be forced to forego the undertaking of many projects. This new wealth in the last two years has been less than two and a half million dollars. With our sources of income halted, there is no other course open to the Mayor and Council than to curtail expenditures to such a point that no additional burden will be placed on the home owners. This should and must be the aim of the city government of this year and precludes the possibility of anything but the most necessary undertakings.

In a letter sent to the departments in December, I asked that budgets be based on economy. Many things which we did last year and the year before are impossible until such time as the city is assured of more income. The budget for 1932 will be submitted to the Council at an early date so that ample time for study can be given to it.

I am of the opinion that a temporary twelve-months' holiday in capital expenditures will not seriously affect the well-being of the city. For five years we have been spending generously in all sections.

A table which accompanies this statement to the Council conclusively proves that Quincy has done an extraordinary amount of new work, and that a curtailment now will not in any sense harm the interests of the people who furnish the means to carry on our municipal activities. To economize does not mean that we will allow either neglect or indifference to mark the work of 1932. All our services must be kept at a maximum of efficiency, and in achieving this purpose I am confident of the good will and wholehearted assistance of every department.

Work Done in the Years 1927-1931

To briefly summarize the activities during the years 1927-1931, but excluding all building construction, street widenings, grade crossing and water extension, I have appended to this statement a tabulation which I think will interest the Council and people of the city. It shows that our means have been generously expended for necessary and worthwhile improvements:

	1927 Miles	1928 Miles	1929 Miles	1930 Miles	1931 Miles	Totals Miles
Accepted streets	7.89	6.55	3.10	4.76	3.01	25.31
Rebuilt streets	4.18	4.89	6.74	6.55	3.85	26.21
Granolithic walks....	6.45	7.51	4.70	6.61	3.75	29.02
Amiesite or asphalt walks	1.30	6.46	2.40	16.63	8.24	35.03
Surface drains.....	6.27	6.08	4.50	7.46	5.87	30.18
Sewers	5.12	7.55	6.06	5.27	5.02	29.02

Drainage

During the past few years considerable major drainage work has been done, and districts which were previously insufficiently drained are now well supplied with drainage systems. Complaints are, however, made from time to time because of the open water courses which flow through congested sections. I believe that this work should be done some time, but before undertaking such a stupendous problem, the city should thoroughly study the project, both in its engineering and cost phases. The work will be exceedingly expensive, and from present indications I see no value in considering a matter which must wait until the city is financially able to undertake a work which would absorb all the credit resources of the city.

Sewer Work at Squantum

For two years the city has been advancing the sewer construction at Squantum, and by next year the trunks and mains installed will furnish facilities to the most populous sections of this district. A pumping station is being built and by the fall of 1932 it should be possible to connect these districts with the main sewer. The work has been expensive because of the ledge and deep cuts in the low levels, but when next year's program is completed a district which has long been asking for sewers will be served.

New Streets

Of the new streets authorized in 1931 and the unfinished schedule of 1930, only four streets remain unfinished: Sherman, Piermont, Sachem and Taylor. The drainage work is completed in Sherman and Piermont, and the sewer and drainage will be installed in Sachem Street as soon as working conditions permit.

Beale Street

The outstanding street development of the year was the widening and construction of Beale Street, and a new bridge over the tracks of the New Haven. For many years this necessary improvement was held in abeyance, but last year seemed to be the time to do the work and thereby create a splendid wide thoroughfare from Hancock Street to Newport Avenue. A pleasing feature of the new street is the modern system of lighting, a feature which greatly enhances the beauty and utility of this business center.

The Grade Crossing

Under an agreement between the city, the State and the railroad, work on the elimination of the grade crossings was begun in September. The contract for the changes at Quincy station and School Street was awarded to the Tredennick-Billings Company of Boston, and this work will probably be finished this spring. Bids for the work which embraced the changes at Water Street, a new station and the widening and raising of the bridge at Granite Street, were included in proposals which were submitted late in November. In the middle of December the Mayor was notified that be-

cause of financial reasons, the railroad would not award the contract and suggested that bids be returned. The city immediately objected to this and as a result of meetings in Boston, the consideration of the bids is postponed until March 1. The city will wait until that time before assuming that the terms of the agreement are not to be observed by all parties in interest.

While the work at Quincy station was in progress, the city proposed to the railroad that it extend its parking area and also cede by gift or purchase a 10 foot strip along Upland Road for a wider street. From information which has been received I do not believe the railroad will part with any of its holdings. A wider Upland Road would be a boon to the center of the city, and I would suggest to the Council to take what is now a sidewalk on the railroad side and use it for street purposes exclusively. The foot travel is on the westerly side and if this strip should be taken a street of greater width and better lines could be made from Saville to Granite Street.

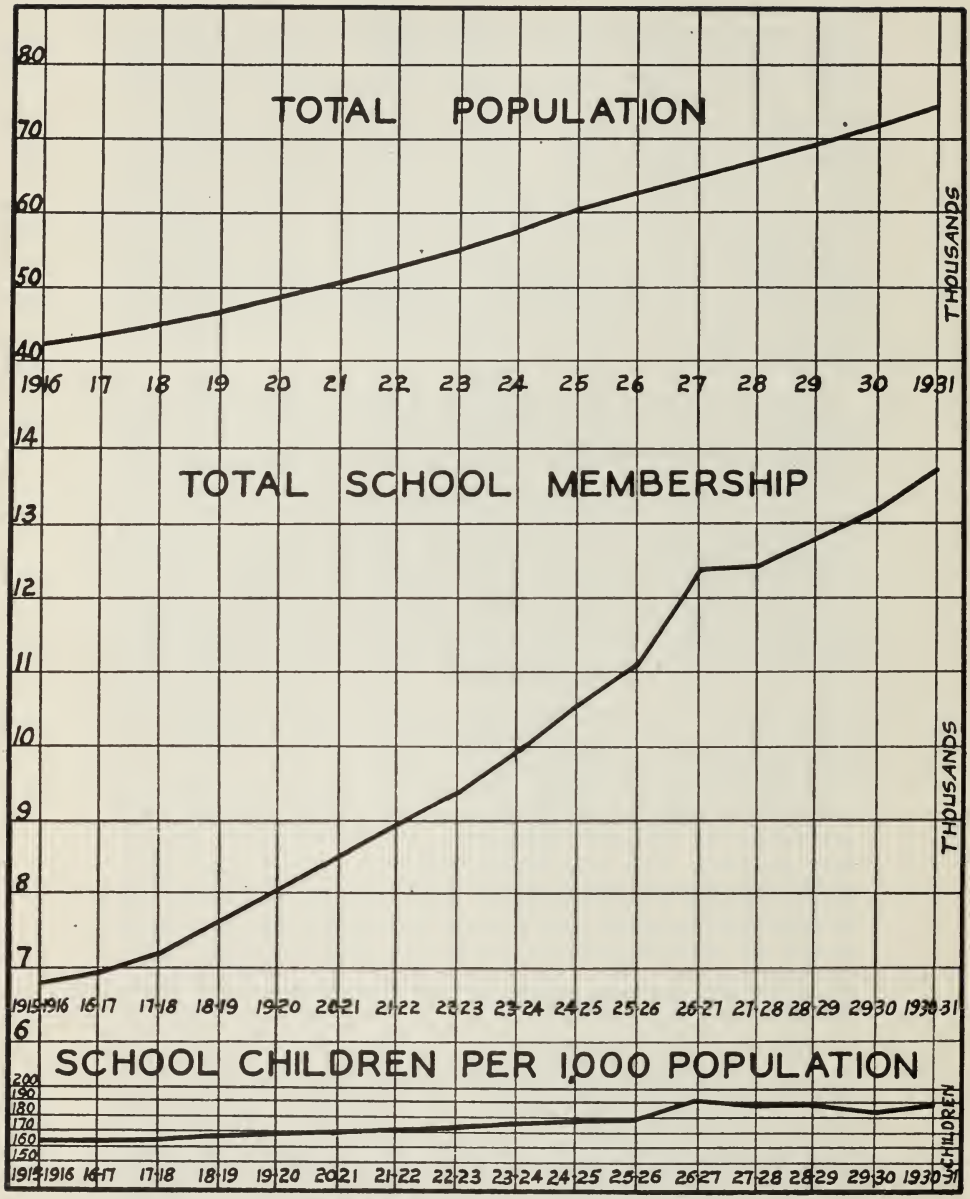

Schools

Since 1924 the city has built either as wholly new structures or as additions to old ones the following buildings: The Senior High School, opened in September of 1924; the North Junior High, opened in February of 1927, and the South Junior High, opened in September of the same year. In the years following, and including the authorization of 1931, two new buildings were erected in the Merrymount and Adams Shore sections, an addition to the Daniel Webster, additions to the Montclair, Gridley Bryant, Adams, Quincy and the easterly wing of the North Junior High.

It would seem from this record that with the present slow increase in population that the city school needs had been satisfied. Congestion in the High School prompted the School Committee to decide to establish a high school in the North Quincy section, which when completed by the addition of the west wing will furnish ample high school facilities to those living north of Beale and Beach Streets. The east wing of the North Junior was opened the first of last year, and the present enrollment takes children in the tenth year of their school experience.

The Mayor received authority during the year to procure plans for this west wing, but as the resources of the city do not at present permit an adequate expenditure, this authorization has not been exercised. How soon we can undertake a capital expenditure of $400,000 depends largely on circumstances, and how much money may be allotted to other purposes. This phase of our problem will be discussed elsewhere, but I would recommend that as soon as means are available serious consideration should be given to this major school need. The grounds surrounding this school have been graded during the year, and the change in appearance has been a source of pleasure to the Mayor and to the people in that section of the city.

While the major school building undertaking will be the North Junior High addition, the Mayor feels that the Wollaston section must receive some consideration. An addition to the Wollaston School has been suggested, and additional school facilities are desired by those living in the comparatively new territory extending from Newport Avenue to the Parkway. It may be that the School Committee will endorse plans for these projects, but the proposal for the North Junior High is, because of its importance, the most essential school undertaking of the year. As it involves a large expenditure, it will seriously influence all other proposals for this year.

Population, 1931	74,923
School enrollment as of September 1931	14,339
School enrollment per 1000 of population	188

The Quincy City Hospital

Since 1925 very considerable additions have been made to the plant of the hospital. A nurses' home and maternity building were erected during 1925 and 1926, and in 1929 and 1931 a new medical and surgical building, and an addition to the operating rooms have been built. The grounds have also been graded. A new X-ray and hydro-therapy department has been added to the equipment, and with the increased facilities in the operaitng room, the hospital now takes its place as one of the best equipped institutions around Boston.

The bed capacity is now 218 beds and is probably adequate for some years to come. If means were at hand a new administration building would be a distinct advantage, but the actual efficiency of the institution will not be lessened if this and other improvements are delayed.

The Council authorized an expenditure of $13,500 for repairs during the year, and I am confident that the buildings will be put in good condition and a substantial balance left. With this balance and a further additional sum the city should install stokers. The smoke nuisance in a thickly-settled neighborhood is becoming acute, and the only solution seems to be the installation of stokers, which will minimize the smoke emission and also save fuel.

The Comfort Station

In 1931 the city provided $25,000 for a comfort station in Quincy center. The need of such a building is apparent to all who are acquainted with the conditions in the shopping district, but the quest for a suitable site has been baffling. A request was made of the New Haven to sell a portion of the lot at the corner of Granite Street and Upland Road, but so far no answer has been made to this specific proposal.

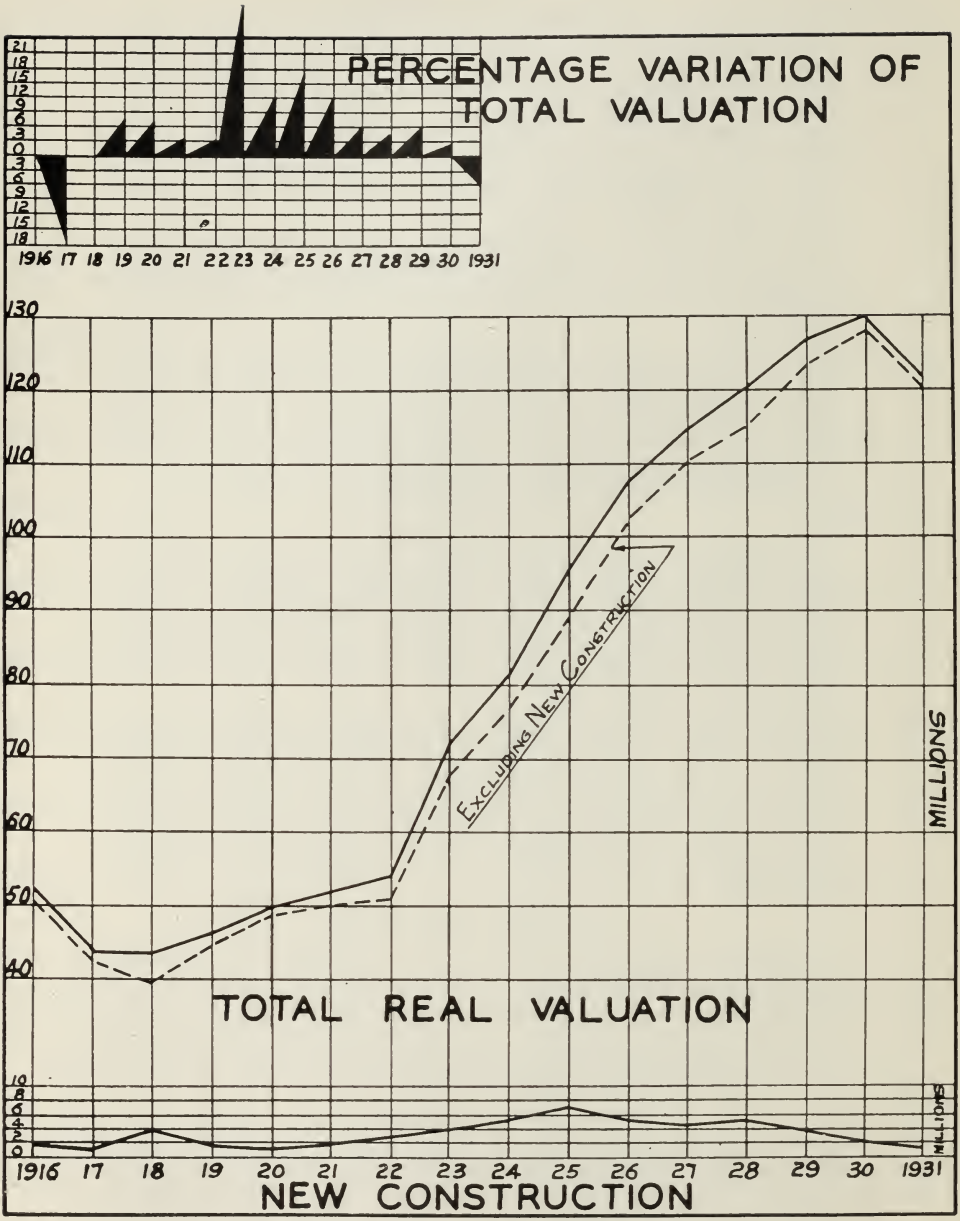

I believe that the location should be somewhere convenient to the shopping center, but site after site has been rejected as unsatisfactory. The new parking area on Granite Street has been suggested, but the obvious disadvantages of this choice have forced a survey of other places. As we have the funds necessary for the building, our next step will be the selection of a site. The city cannot afford to buy expensive land for this purpose and consequently the final choice must combine suitability and relatively cheap land.

The Welfare Department

Expenses in this department have been steadily mounting, and for the time being I see no relief for this continued outlay. The winter months will probably show an increase in cost, but as this is something which cannot be controlled, the city must meet the situation without complaint. If conditions should improve this cost will decrease, but present indications are that all cities must provide assistance for a long time to come.

New Playgrounds

While there has been some agitation for new playgrounds, I believe that all consideration of such requests should be postponed to some other time. The proposals may have merit and may be necessary, but this year above all others is most inopportune for favorable action on these matters. The playgrounds at Montclair and at Hollis Avenue are not completed, and if we had the means these should be developed before new sites are purchased.

Total valuation, real property, 1931.....$121,267,450
Personal property valuation, 1931..... $11,629,975

The Disposal of Refuse

A matter which will compel the attention of the city government at no remote time is an effective way to dispose of the refuse collections. Since 1927 the city has been using a quarry off Quarry Street, but the menace of fire and resulting smoke has been the cause of many complaints. For a time last summer all this refuse was used to fill up water holes in different sections of the city and later at Mount Wollaston Cemetery. At these places it was necessary to cover with gravel, but the cost of such prevented the continuation of the work at Mount Wollaston. This work at the cemetery has been resumed and by spring the depression in the easterly section will be entirely filled. Thus, the two-fold purpose of disposing of refuse and making excellent fill at the cemetery was achieved. These means do not, however, meet the increasing difficulty of finding a suitable way to dispose of rubbish, and by 1933 the city will be compelled to install an incinerator or find a place outside the city for dumpage. If the city does decide next year to erect an incinerator, provision must be made for the care of garbage. The city is now selling this to persons outside Quincy, but the time is not far distant when it will be impossible to dispose of it by sale.

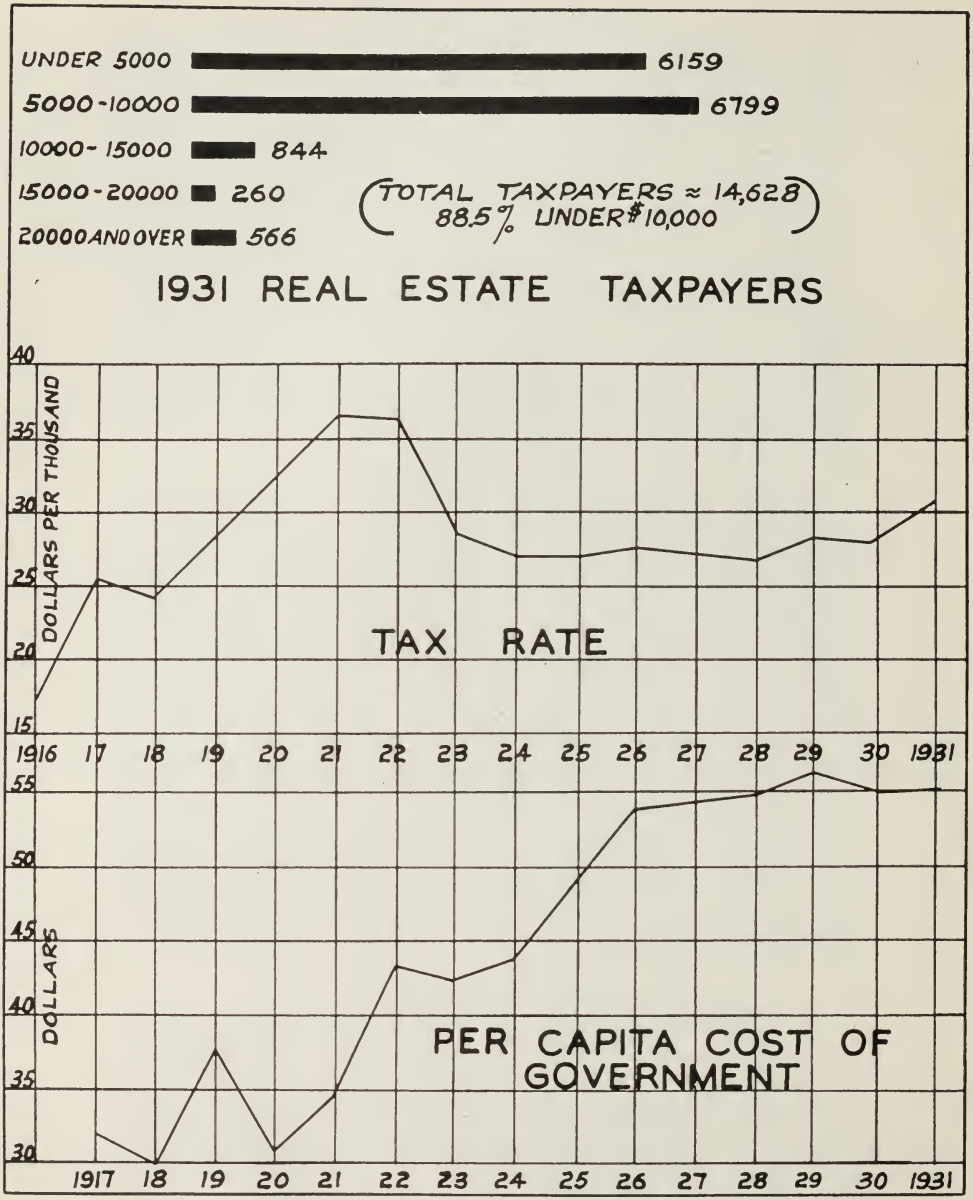

Property Assessments

Property values were reduced last year by a little more than eight and one-half million dollars. In 1930 a reduction was also made on property which was over-assessed. Values are, however, still too high. Neither my own nor previous administrations are wholly to blame for these extravagant estimates which had been put upon Quincy property. Since 1920 and up to 1929, the city had been under the spell of rampant speculation in real property values and quite naturally assessments reflected this inflation. Our tax rate and our expenditures were based on these estimates, but now that the readjustment has brought property to something approaching actual worth, the city must recognize the situation by a further revision of assessments. My own opinion is that a low valuation and a rate sufficient to meet all obligations, even though this rate exceeds $30 per thousand, is a better method of raising revenue than by a low rate based on values that fluctuate with the changes in conditions. The speculation in Quincy values has not been wholesome, but now that the change has come we may expect the city to raise its income from property properly valued, and at the same time not increase the total tax bill to the property owner. To accomplish this brings us directly to the necessity of keeping expenses down to the lowest point. No relief to property can be had unless the costs of government are reduced.

Tax and Other Collections

The Mayor is forced to again call attention to poor tax collections. Out of a total levy of over four million dollars, approximately two million four hundred thousand dollars were collected up to December 31. This is the usual 60 per cent. Probably conditions are much better in Quincy than they are in other cities, but evidently we must continue to show the poorest record among the cities. The city's credit is now at stake, and this cannot be jeopardized by insufficient tax receipts. The matter assumes a new importance this year, because of the reluctance of banks to loan to cities with unsatisfactory records.

In December last we were forced to renew a note for $100,000. Our usual sources were closed and it was with difficulty that the loan was made. The rate of interest was 5.57 per cent. Our rate

TAX RATE

1917	$25.60	1922	$36.20	1927	$27.20
1918	24.20	1923	28.40	1928	26.80
1919	28.00	1924	27.00	1929	28.40
1920	32.20	1925	27.00	1930	28.00
1921	36.40	1926	27.60	1931	30.80

for the year on all temporary loans did not average 2 per cent. The banks are exacting their tribute from those communities which do not collect their levies. The 40 per cent who do not pay are therefore directly responsible for the large temporary loan which we float every year, and are this year imposing an additional penalty on those who do pay, through the excessive interest rates which we will be compelled to pay.

This tax indebtedness must be met. The city has coming due this year $1,300,000 in temporary notes, with maturities in every month up to August. This whole note issue should have been paid before December 31, last year, but because we are remiss in our collections more than half of the total issue is carried into 1932. We may be unable to float the 1932 issue in whole, and if we do, we may expect to pay an exceptionally heavy interest charge.

I am forced to warn delinquent owners that an early sale of property will be forced this year, rather than run the risk of damaging the credit or good name of the city.

Tax and Other Collections

It is not only in tax collections, but in other accounts that the city is carrying an excessive amount of unpaid bills. Despite our best efforts many of these bills remain unpaid, particularly in the hospital account. Evidently, many people assume that service in this institution is free and that they are under no obligation to pay the charges. The hospital is free to those who are unable to pay but need skillful care, but to those who can pay the city expects payment. In such cases the municipality will do its best to close the accounts against people who are in arrears.

Many of the unpaid hospital accounts are due from non-residents who were involved in accidents. The law allows no suit against awards, and consequently these accounts remain unpaid. I am pleased to note that a bill has been introduced in this year's Legislature which will guarantee that hospitals and nurses will get paid for their services in these cases.

New Income for Cities

It is probable that the Legislature will this year consider additional revenue for cities and towns. A growing and well-founded impression is that real estate, particularly in the cities, has been bearing too much of the burden and that relief from other sources must be obtained. Many proposals have been advanced, but so far none has met with sufficient support to get legislative sanction. The problems of all cities are such, however, that it may be expected that some relief will be granted, which should be applied to the relief of real estate. A new proposal to further increase the gas tax allowance to municipalities meets with favor as a just contribution to the communities which are carrying the full burden of education, welfare and health work, recreational facilities and the many other activities that have become commonplaces of our municipal life.

Last year the city, in its relation to the State in the matter of income and outgo, found itself a debtor to the extent of $29,242.77. In 1930 the State paid the city over and above our payments the sum of $111,156.92. The outlook for 1932 is that there will be a further decrease in State income, which in turn will have to be made up by the taxpayers.

Our ratio of debt to real property values is 4.67 per cent. This ratio is not so unsatisfactory when we compare some other ratios, but in a city where real property values are not increasing in a very appreciable amount, it is not safe to add to this percentage.

Last year the total levy on real estate and personal property was in the aggregate $4,051,814.83, or a per capita cost based on a population of 74,000 of $54.75. If we take the total present debt we find that the per capita cost is $76.58. These figures are presented because they give an index of the tendency to increase municipal costs and are a warning that this tendency must be curbed until there is a decided improvement in our sources of income.

Debt Statement

The total debt on January 1, 1927, was $5,078,000. The total debt on January 1, 1932, is $5,667,500, an increase of $589,500 in the five years or an average increase of debt of $117,900. The larger part of this increase is due mostly to the new school construction, although due allowance must be made for the big street construction work, and for three major street widening and construction projects: Beale, South and Sea Streets. A statement of the whole debt is here given.

Total funded debt of the city, January 1, was $5,947,000.00. During the year this was reduced by payments as follows:

City debt within limit	$445,000 00
Sewer debt within limit	68,000 00

OUTSIDE DEBT LIMIT

Sewer	$19,500 00
Water	127,000 00
City Hospital	21,000 00
Schools	54,000 00
South Junior High School	30,000 00
Government School	16,000 00
Montclair and Houghs Neck School	14,000 00
North Junior High School	14,000 00
Southern Artery	31,000 00
	$839,500 00

The funded debt during the year has been increased as follows:

WITHIN THE DEBT LIMIT

Sewer	$70,000 00
Streets	175,000 00
Land loans	140,000 00
Schools	125,000 00

OUTSIDE DEBT LIMIT

Water	50,000 00
	$560,000 00

The funded debt of the city is as follows:

School buildings	$2,476,000 00
Water	660,000 00
Sewer	551,000 00
Drains	131,000 00
Hospital building	491,000 00
Fire	20,000 00
Police	40,000 00
Streets	1,050,500 00
Land	140,000 00
Cemetery	2,000 00
Southern Artery loan	106,000 00
	$5,667,500 00

WHAT CAN WE SPEND IN 1932?

Even in a year when every capital expenditure should be closely scrutinized, the city is forced to make some allowances for expenditures which perhaps cannot be delayed. These include the addition to the North Junior High and the completion of the sewer work at Squantum and other sections of the city. In 1931 we decreased the debt by over a quarter of a million dollars, and my purpose was to effect a similar saving this year. With the taxable values growing at a very small rate, there is no other course open to us than to lessen the debt burden, and consequently I feel that expenditures should be confined to those things which are necessary, and all other matters dropped for the present.

In the following table a statement of the credit under the debt limit is given, and the maturities from month to month, which will increase this January 1 credit. During the whole year and including the $253,951, which represents the credit on January 1, we will have a total credit of $764,951. For what purposes should this credit be used? There are three major items of expenditures as follows:

The new west wing of the North Junior High, which with land takings and equipment, architects' fees and grading, will cost (estimated)	$425,000 00
Sewer extension	60,000 00
New streets	60,000 00
This makes a total of	$545,000 00
Outside the debt limit we have the following expenditures:	
Grade crossing elimination	$140,000 00
Water extension	30,000 00
Total outside debt limit	$170,000 00
To which we should add the amounts to be expended under the debt limit	545,000 00
Making a total expenditure of	$715,000 00

During the year the city has a total debt maturity of $840,500. Assuming that the Council authorizes the loans here suggested, this leaves a margin to be applied to debt reduction of $125,500. This is not a satisfactory amount, and my own view is that no new street work should be undertaken this year and that the North Junior High addition should not be undertaken unless the cost is not to exceed $350,000. This includes construction, architects' fees, equipment and incidental costs not anticipated. With the decrease in material costs, the city should get this building, complete in every particular, for $350,000, and if this can be done I favor the complete development of this building as a high school unit. As our great purpose is to decrease capital expenditures, the only way to do this is to stop unnecessary outlay, and in the construction of the contemplated wing of the North Junior, available school space, and that only, should be provided. I am not in favor of costly land purchases or providing extra school recreational facilities at a time when most people find it hard to bear present municipal costs.

I am submitting to the Council a statement of the debt, showing the credit on January 1, and the increment to this credit month by month:

BORROWING MARGIN FOR 1932

"General Laws. Chapter 44, Section 70"

Except as otherwise authorized by law a city shall not authorize indebtedness to an amount exceeding 2½ per cent on the average of the Assessors' valuation of the taxable property for the three preceding years, the valuation being first reduced by the amount of all abatements allowed thereon, previous to December 31, of the preceding year.

Net valuation 1929		$137,468,098 00
Excise tax		6,221,437 00
Net valuation 1930		140,824,860 00
Excise tax		6,754,277 00
Net valuation 1931		132,437,120 00
Excise tax		6,308,380 00
		$430,014,172 00
Three years' average		143,338,057 00
Two and one-half per cent		3,583,451 00
Total debt Jan. 1:		
City	$2,953,500 00	
Sewer	376,000 00	
		3,329,500 00
Borrowing capacity January 1, 1932		$253,951 00

Debt maturing in 1932 which will increase the borrowing margin:

	City	Sewer
January	.....	.....
February	$16,500 00	.....
March	.....	.....
April	80,000 00	$7,000 00
May	14,000 00	28,000 00
June	49,500 00	2,000 00
July	124,000 00	2,000 00
August	45,000 00	.....
September	53,000 00	.....
October	18,000 00	3,000 00
November	11,000 00	9,000 00
December	41,000 00	8,000 00
	$452,000 00	$59,000 00

Supplementary Budgets

One of the reasons for increasing municipal costs in Quincy is the facility with which the Mayor submits and the Council authorizes supplementary budgets. In preparing the budget for 1932, I will attempt to include every necessary item so that it will be complete when it reaches the Council. If we are all determined to save, the original budget should be the only one considered this year. If some unexpected and wholly unanticipated matter should call for money, the city would be forced to provide such. But in other years many supplementary budgets have had a peculiarly sectional or personal appeal. Even this year some person or group may make a plea for some improvement or other, and if the appeal is granted the cost must be borne in the levy of this year. The supplementary budget should be unnecessary and should be refused.

When the budget is finally passed, departments will be advised that no transfers will be allowed. The budget as it comes from the Council will be accepted as final.

The Washington Anniversary

This year marks the bi-centenary of the birth of President Washington. This event will be nationally celebrated and Quincy should join in the general observance by a mass meeting in the Senior High School with appropriate ceremonies.

Expenditures Which the State May Authorize

A new bridge over the Fore River and a new boulevard to skirt the Town River have been proposed. If the State is willing to assume the full cost of these undertakings, I do not suppose that we will have serious objection to them. If, however, we are counted on contributions to the cost then I think the propositions should meet with our united opposition. As the State's policy is against unnecessary expenditures, it may be confidently predicted that these measures will not receive much attention this year.

In beginning the year the Mayor extends the promise of the fullest cooperation to the members of the Council. We have been charged with the government of the city and I am certain that every effort will be to advance the interests of a community which has honored us by its confidence.

CITY GOVERNMENT—1932

MAYOR, HON. THOMAS J. McGRATH

DEPARTMENT OFFICIALS

COMMISSIONER OF PUBLIC WORKS, FREDERICK E. TUPPER.
CITY TREASURER, HAROLD P. NEWELL.
CITY CLERK, EMERY L. CRANE.
ASSISTANT CITY CLERK, HATTIEMAY THOMAS.
COLLECTOR OF TAXES, JAMES B. WHITE.
AUDITOR OF ACCOUNTS, ELIZABETH N. DUNN.
CITY SOLICITOR, JEREMIAH J. McANARNEY.
CHIEF OF POLICE, ERNEST H. BISHOP.
CHIEF OF FIRE DEPARTMENT, WILLIAM J. SANDS.
CITY ENGINEER, WALLACE S. CARSON.
COMMISSIONER OF PUBLIC WELFARE, CHANNING T. FURNALD.
CITY PHYSICIAN, RICHARD M. ASH, M.D.
INSPECTOR OF ANIMALS, EDWARD A. DeVARENNES.
SEALER OF WEIGHTS AND MEASURES, JAMES M. CANTFILL.
INSPECTOR OF WIRES, ALEXANDER J. SOUDEN.
INSPECTOR OF BUILDINGS, WARREN S. PARKER.
DOCK AND WATER FRONT COMMISSIONER, EDWARD M. WIGHT.
SUPERINTENDENT OF SEWER DEPARTMENT, WALTER S. McKENZIE.
SUPERINTENDENT OF WATER DEPARTMENT, JOHN G. WHITMAN.

ADMINISTRATIVE BOARDS

Assessors

MICHAEL T. SULLIVAN, CHAIRMAN
Term expires first Monday of February, 1934

ALBERT NELSON
Term expires first Monday of February, 1935

J. WINTHROP PRATT
Term expires first Monday of February, 1933

Park Commissioners

WILLIAM M. TRUSSELLE, CHAIRMAN
THOMAS J. LARKIN JOSEPH ANGELO

Board of Health

HEALTH COMMISSIONER, CORNELIUS J. LYNCH, M.D.
SANITARY INSPECTOR, ROY W. CRAMOND.
INSPECTOR OF PLUMBING, JEREMIAH J. KENILEY.
INSPECTOR OF MEATS AND PROVISIONS, HOWARD ROGERS.

Trustees of Thomas Crane Public Library

Meet first Wednesday of month at 7:30 P.M.

GEORGE E. ADAMS, CHAIRMAN.
GEORGIANA C. LANE, SECRETARY.
REV. JAMES H. SANKEY, TREASURER.
MARY M. CAREY
CHARLES H. JOHNSON
JOHN PRATT WHITMAN

Managers of Woodward Fund and Property

HON. THOMAS J. McGRATH, MAYOR.
HAROLD P. NEWELL, CITY TREASURER.
EMERY L. CRANE, CITY CLERK.
ELIZABETH N. DUNN, AUDITOR OF ACCOUNTS.
JAMES F. YOUNG, ELECTED BY COUNCIL.

Manager of Public Burial Places

REPORT OF THE AUDITOR

JANUARY 1, 1932.

HONORABLE THOMAS J. MCGRATH, *Mayor:*

In accordance with the ordinance of the City, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the City at the close of the financial year, December 31, 1931.

ELIZABETH N. DUNN,
Auditor of Accounts.

IN COUNCIL

Order No. 175

FEBRUARY 16, 1931.

Ordered:

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1931, and ending December 31, 1931, to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Bonds, Interest, and Expenses of Water Department be paid from Water Receipts.

North Junior High School	14,000 00
Southen Artery	31,000 00
	$839,500 00

The funded debt during the year has been increased as follows:

Within the Debt Limit

Sewer	$70,000 00
Streets	175,000 00
Land loan	140,000 00
Schools	125,000 00

Outside Debt Limit

Water	50,000 00
	$560,000 00

The funded debt of the city is as follows:

School buildings	$2,476,000 00
Water	660,000 00
Sewer	551,000 00
Drains	131,000 00
Hospital building	491,000 00
Fire	20,000 00
Police	40,000 00
Streets	1,050,500 00
Land	140,000 00
Cemetery	2,000 00
Southern Artery loan	106,000 00
	$5,667,500 00

BORROWING MARGIN FOR 1932

"General Laws. Chapter 44, Section 70"

Except as otherwise authorized by law a city shall not authorize indebtedness to an amount exceeding 2½ per cent on the average of the Assessors' valuation of the taxable property for the three preceding years, the valuation being first reduced by the amount of all abatements allowed thereon, previous to December 31, of the preceding year.

Net valuation 1929		$137,468,098 00
Excise tax		6,221,437 00
Net valuation 1930		140,824,860 00
Excise tax		6,754,277 00
Net valuation 1931		132,437,120 00
Excise tax		6,308,380 00
		$430,014,172 00
Three years' average		$143,338,057 00
2½ per cent		3,583,451 00
Total debt Jan. 1:		
City	$2,953,500 00	
Sewer	376,000 00	
		3,329,500 00
Borrowing capacity January 1, 1932		$253,951 00

Debt maturing in 1932 which will increase the borrowing margin:

	City	Sewer
January	.....	.....
February	$16,500 00	.....
March	.....	.....
April	80,000 00	$7,000 00
May	14,000 00	28,000 00
June	49,500 00	2,000 00
July	124,000 00	2,000 00
August	45,000 00	.....
September	53,000 00	.....
October	18,000 00	3,000 00
November	11,000 00	9,000 00
December	41,000 00	8,000 00
	$452,000 00	$59,000 00

REPORT OF BOARD OF ASSESSORS

January 1, 1932.

Honorable Thomas J. McGrath, *Mayor:*

Dear Sir:

The following is respectfully submitted as the report of the Assessing Department for the year 1931:

Valuation

Value of buildings	$84,518,575 00
Value of land	36,748,875 00
Value of land and buildings	$121,267,450 00
Value of personal property	11,629,975 00
Total valuation of the city as determined April 1, 1931	132,897,425 00
Tax rate	30 80
Amount to be raised by taxation	4,093,240 69
The valuation was also increased by omitted assessments levied in December, 1931	52,050 00
Valuation of automobiles, December 31, 1931	6,582,180 00
Total valuation of the city, including automobiles for 1931, was	139,531,655 00

Recapitulation Budget of 1931

City Appropriations	$3,806,783 46
City Debt	712,500 00
City Interest	205,087 49
Temporary Loan Interest	85,000 00
Deficit Overlay	10,001 43
State Assessments:	
State Tax	131,850 00
Metropolitan Sewers	95,551 31
Metropolitan Parks	91,730 65
Charles River Basin	16,814 57
Neponset Bridge	10,502 64
Planning Board	490 33
Massachusetts Highway	1,783 25
Auditing	2,033 15
Southern Artery	405 87
Soldiers' Exemption	161 51
Smoke Nuisance Abate	2,306 11
Grade Crossing	6,360 00
Ways in Malden	1,441 61
State Aid and Pension	530 00
West Roxbury and Brookline Parkway	156 57
Broadway-Revere Beach Parkway	1,061 31
Canterbury Street Highway	68 72
Old Age Assistance	22,431 00

County Assessments:	
County Tax	160,561 39
County Hospital	33,110 89
Overlay (of current year)	35,292 67
Total	$5,434,015 93
Public Buildings and Lands Exempted as reported to State	16,236,992 00

Estimated Receipts

Income Tax	405,641 33
Motor Vehicle Excise	149,913 44
Corporation Tax	110,209 17
Bank Tax	3,464 64
Licenses	10,194 25
Fines	5,147 23
Special Assessments	114,393 63
General Government	15,225 98
Protection of persons and property	6,520 59
Health and Sanitation	21,847 47
Highways	1,765 02
Charities	14,389 50
Soldiers' Benefits	1,468 58
Schools	57,396 31
Libraries	3,306 38
Hospital	193,296 32
Cemeteries	19,105 00
Interest on Deposit	19,650 55
Interest on Taxes and Assessments	74,581 34
Chapter 122, Acts of 1931, Highway Appropriation Offset	45,967 51
Poll Taxes	44,860 00
Old Age Assistance	22,431 00
	$1,340,775 24
Net amount raised by taxation on property	$4,093,240 69
Number of polls, 22,430, at $2.00 each	44,860 00
Old Age Assistance, 22,431, at $1.00 each	22,431 00
Exempted property	16,236,992 00

Allowing for new buildings $1,500,000, slight increases in land values occasioned by new streets and new developments being a fair offset to buildings demolished, our actual reduction of real estate values approximates $10,000,000.

As anticipated when our report, January 1, 1931, was made, this shrinking of values is constantly becoming more apparent and it is our intention to lower the values still more in the 1932 assessments, both of real estate and personal property.

Twenty-one thousand nine hundred and seventy motor vehicles were assessed throughout the year, about 1300 of these being exchanges on which abatements were made.

Other abatements were made on approximately 300 because of overvalue.

The Old Age Assistance Law necessitated the issuance of 21,000 bills by this office in addition to the regular work. The handling of this work in record time reflects great credit to our clerical force.

The provisions of the new law in its liberality as applied to widows' exemptions has increased the amount previously allowed

by approximately $3,757, while an equally liberal law has provided for exemption to Spanish War Veterans, which on December 31st amounted to $862.40. Of this latter amount the State refunds one-third, thereby reducing the expense to Quincy to $574.93.

Tax Appeal

Previously appeals from decision of the Assessors on tax abatements were referred to the County Commissioner, or the Superior Court, but May 29, 1930, a Board of Tax Appeals was created, becoming operative December 1st, before which all cases previously entered in the Superior Court are now heard.

We have had one such case which is now pending, being the only instance throughout the year, of appeal from our findings.

Respectfully submitted,

MICHAEL T. SULLIVAN,
Chairman.
J. WINTHROP PRATT,
ALBERT NELSON,
Board of Assessors.

REPORT OF COLLECTOR OF TAXES

To His Honor, the Mayor of the City of Quincy:

REPORT OF DEPARTMENT OF HEALTH

January 1, 1932.

Hon. Thomas J. McGrath, *Mayor of Quincy, Massachusetts.*

Dear Sir:—During the past year, an important and progressive change in the regime of the City Health Department was made. This consisted in establishing a separate division for vital statistics and the employment of a full-time statistician.

A good definition for vital statistics is "The Bookkeeping of Health." The knowledge obtained through good vital statistics is most important and invaluable, but its terms and methods are naturally technical and at times hard to understand.

However, in the last analysis, vital statistics simply means: what are you doing, how are you doing it and what is the cost?

The system now in vogue at the Health Office is twofold, one deals with health and disease and sanitation, etc., and the other with finance, that is, all expenses are properly itemized, segregated and charged to the departments responsible for the expenditure; thus all money spent can be traced and understood.

In the year 1931, as in previous years, and probably for years to come, the most expensive public health problem for cities like Quincy will be Tuberculosis. The reason for the expense of this scourge is evident. In the first place all cities must take care of indigent tuberculosis as a matter of State law. Then tuberculosis is at all times with us and it attacks all ages.

At this point a resume of the problem from the standpoint of attack is worth while. At present Massachusetts has only one State sanatorium, with a continuous waiting list of fifty males and thirty females. This waiting list moves slowly, for patients in the sanatorium remain from one to three years, consequently, patients on a waiting list, being active cases, spread disease to new contacts and oftentimes advance themselves while waiting for beds, hence the sanatorium care and expense are increased.

This condition obtains in a similar way at county sanatoria, so the problem from an economic standpoint of attacking adult tuberculosis is not very hopeful.

Another method, and to my mind more logical, is now being stressed, and that is, attacking the problem through its source, namely childhood Tuberculosis. It is now generally accepted by experts that most adult tuberculosis is originally of the childhood type. Naturally, striking at the source of any trouble is the best and surest way of eradicating the evil. Also, in the treatment of tuberculosis economically, the child can better afford the time, whereas in the adult type you often, through marriage, have the additional factor of the family, either as a disease or welfare problem or both. Furthermore, in a child the disease is curable, whereas in the adult it is often only palliative.

In Massachusetts, the Ten Year Program has done much as an educational project. Their survey of some hundred thousand show 18 to 30 per cent infected and needing treatment, according to the varying industrial characteristics of the communities examined. Quincy probably has 4,000 to 5,000 children making up her group that need attention to prevent these children from becoming pulmonary tuberculosis cases at some future date.

Quincy is and has been doing efficient work in tuberculosis, but we still have a long road ahead in the solution of the tuberculosis problem. A very efficient and inexpensive suggestion that would help would be to establish rest periods for suspected children during their entire school year. Fifty children in each ward of the city carried on for nine months, and using our playgrounds or parks in July and August for sun baths and camp regime would, in a few years, show great progress in the solving of our problem of the childhood type of tuberculosis, and what is more important, it would prevent the more expensive handling of these same cases later on in life as subjects of adult tuberculosis.

During the past year the tuberculosis department was very fortunate in acquiring the services of Dr. Michael Sweeney, but was doubly unfortunate in his sudden death. The kindliness of the man, combined with the versatility of a mind matured from twenty-five years' experience in general practice, gives one a mental picture of our irreparable loss in his untimely end. Out of great personal respect for his memory, the Commissioner has carried on in the tuberculosis clinics.

Scoring Public Health Activities According to the Standard Appraisal Form of the American Public Health Association. Quincy still has a fairly high average.

Food and Milk Control

The generous courtesy and willingness of the merchants and food handlers to respond to corrections has brought about very satisfactory results in the food distribution during the past year.

In 1931 Quincy's milk supply was 97 per cent pasteurized; this is the highest per cent in the history of the city and is very edifying. The control of disease spread through milk, especially tuberculosis, is mostly dependent upon pasteurization. One of the most important obstacles to State-wide pasteurization is the low price at present allowed the farmer for his raw product. The present controversy amongst milk producers in New England indicates that the farmer has no profit. This state of affairs, continuing, will stifle competition, milk prices will soar, pasteurization will diminish, and disease will increase. Both from a health and economic basis the cities should interest themselves on the side of fair play. Give the farmer a fair price for his product and we all will be better off.

Venereal Disease Control

There has been a material improvement during the past year in getting cases to the clinic and more continuous treatment has resulted, but there still remains much to be desired. I believe the same condition prevails in many cities and until realization of the economic loss and family havoc caused by loose venereal cases strike home, venereal disease control will be inefficient. A trained social worker would be a great help in this clinic.

Communicable Disease Control

Quincy is to be congratulated on its work in diphtheria immunization. Quincy holds and has held a very high place in this field. To know that in a school population of 15,000 we only have a half dozen cases of diphtheria in a year, with scarcely any deaths, is a condition worth publishing. This fight should go on until we are 100 per cent immunized.

The newer treatment in vogue for measles and scarlet fever promises much, and the time is probably not far distant when they, too, like diphtheria and typhoid, will be under the absolute control of man. Incidentally, this will eliminate our large contagious expenditures and add to the general health and happiness of the community.

Community Hygiene

This past year was the first for the clinic at the City Hospital. There were no maternal deaths—a very good record. Its case fatality was a little high; this is explained by the mothers refusing to climb the hospital hill for pre-natal instruction. This obstacle could be rectified either by a home visitor, who could instruct mothers at home and do the necessary laboratory work, take blood pressures, etc., or by establishing more central clinic rooms either at the City Dispensary or the Welfare Department.

Sanitation

A triple alliance between the Health, Police and Fire Departments worked out for the mutual benefit of all. In this way more nuisances were discovered and their corrections hastened. Each district was visited four times a year and, with intermediate check-ups, good results obtained. The fine response on the part of the citizens to cooperate was most gratifying.

Child Welfare

The educational value of these clinics is stressed. The early discovery of defects, both physical and mental, and referring the same to their physicians is certainly worth while.

Mental Hygiene

This is a most important and valuable clinic. A lack of understanding its importance on the part of the laity is unfortunate, but I am sure it has a great future and its benefit to the school child will be far reaching and important.

The yearly cost of education for the child is important, but is doubled when the child has to "repeat." What is often lost sight of, a child may be a "repeat" from some correctable mental disorder which, if undiscovered or improperly treated, may become a total mental "misfit." Many such hopeless cases today would have been saved by proper mental hygiene. Physical defects and disease are easy to understand and respond quickly to treatment, whereas, the "peculiar children," those of "queer personality twists," "faulty emotional habits," and those having trivial mental disorders are equally important, though harder to understand, and should be only handled by competent mental hygienists.

In early school life a right mental atttitude is of far more importance to fit the child for a future than the little book knowledge he receives. Quincy is certainly fortunate in its Mental Hygiene Clinic and should be grateful to the State for its personnel.

Heart Disease Control

The time has arrived when serious consideration must be given to heart disease control. Our average mortality is, roughly, 150 deaths per year, and is the leading cause for deaths. In our city we have probably one in every four so afflicted, or about 1,500

cases; this is a serious problem and a great economic loss. The solution is an Industrial Heart Clinic in which you could combine focal infectious diseases.

The success of the health administration in 1931 has been largely due to the high morale within the department and the splendid cooperation given by the School Department and all other departments of the city.

Sincerely yours,

C. J. LYNCH, M.D.,
Health Commissioner.

REPORT OF SUPERINTENDENT

JANUARY 1, 1932.

DR. CORNELIUS J. LYNCH, *Health Commissioner.*

DEAR SIR: I hereby submit my annual report for the year ending December 31, 1931.

The personnel of the department is as follows:

Commissioner of Health and Inspector of Milk	Dr. Cornelius J. Lynch
Superintendent	Thomas G. Smith
Statistician	Abraham S. Pactovis
Clerk	Verna M. Kelley
Sanitary Inspector	Roy W. Cramond
Plumbing Inspector	Jeremiah J. Keniley
Assistant Inspector of Milk	James O'Dowd
Inspector of Meats and Provisions	Howard Rogers
Child Welfare Physician	Dr. Rachel L. Hardwick
Venereal Disease Physician	Dr. E. E. Smith
Bacteriologist	Dr. E. E. Smith
Tuberculosis Nurse	Gertrude T. Russell, R.N.
Tuberculosis Nurse	Mary E. Keeley, R.N.
Contagious Disease Nurse	Catherine F. Coleman, R.N.
Child Welfare Nurse	Nettie D. Fowler, R.N.
Child Welfare Nurse	Mary E. Marr, R.N.
Inspector of Animals and Slaughtering	Dr. E. A. deVarennes

We have had the usual number of complaints during the past year as in previous years, and all complaints had the personal attention of the Sanitary Inspector. We regret the fact that there are still a large number of cesspools in the city where the sewer is available, and it is hoped that the coming year will see this condition corrected.

This department has kept in touch with all matters pertaining to Public Health at the State House the past year through the cooperation of the local representatives, and it is hoped that the same cooperation can be obtained each year. This department has also had the cooperation of the state as regards smoke nuisance with very gratifying results.

I wish to thank the members of the department for their cooperation during the past year.

Appended you will find the reports of the various nurses and inspectors, also report of diseases and deaths for the past year. See Auditor's report for statement of receipts and payments.

Respectfully submitted,

THOMAS G. SMITH,
Superintendent.

REPORT OF CONTAGIOUS DISEASE NURSE

JANUARY 1, 1932.

DR. C. J. LYNCH, *Health Commissioner.*

DEAR DOCTOR:—I herewith submit my seventh annual report of contagious disease work for year ending 1931.

Nine hundred and forty-seven cases of notifiable diseases were reported as follows:—

Scarlet fever	322
Measles	217
Mumps	65
Chicken pox	63
Dog bite	74
Anterior poliomyelitis	24
Whooping cough	94
Lobar pneumonia	37
Influenza	23
Diphtheria	9
Typhoid fever	3
Septic sore throat	3
Cerebro-spinal meningitis	2
Conjunctivitis	1
Encephalitis lethargica	4
German Measles	6
Nursing visits	2,005
Scarlet fever	1,098
Measles	516
Whooping cough	163
Anterior poliomyelitis	107
Diphtheria (cultures 70)	75
Typhoid fever	14
Venereal disease	26
Cerebro-spinal meningitis	2
Encephalistic lethargica	2
Mumps	2

Scarlet Fever

As in the previous year, the majority of these cases were of a mild type. Fifty-two cases were cared for in the contagious hospital in Brighton.

Measles

This was one of the important diseases to show a decided decrease from last year. There were less than half as many cases reported.

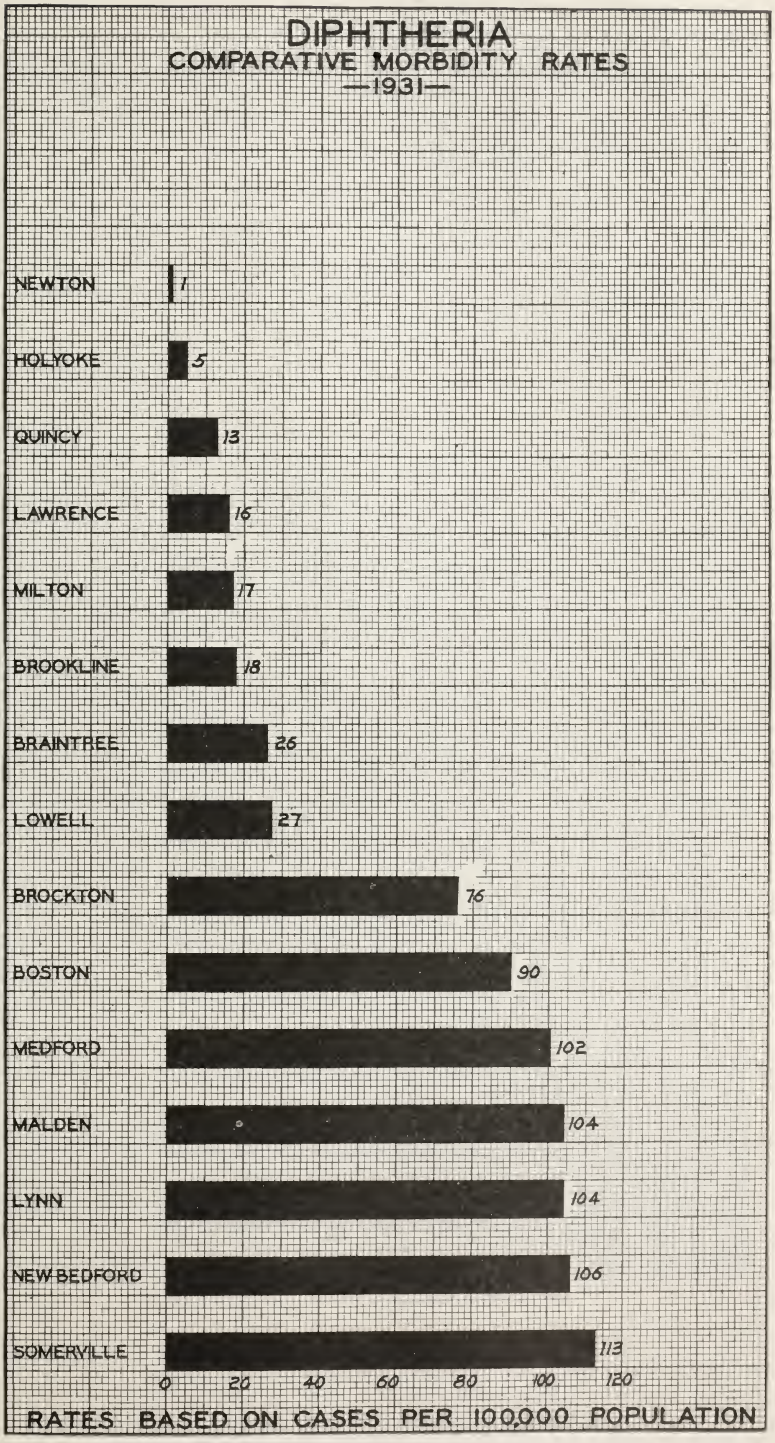

Anterior Poliomyelitis

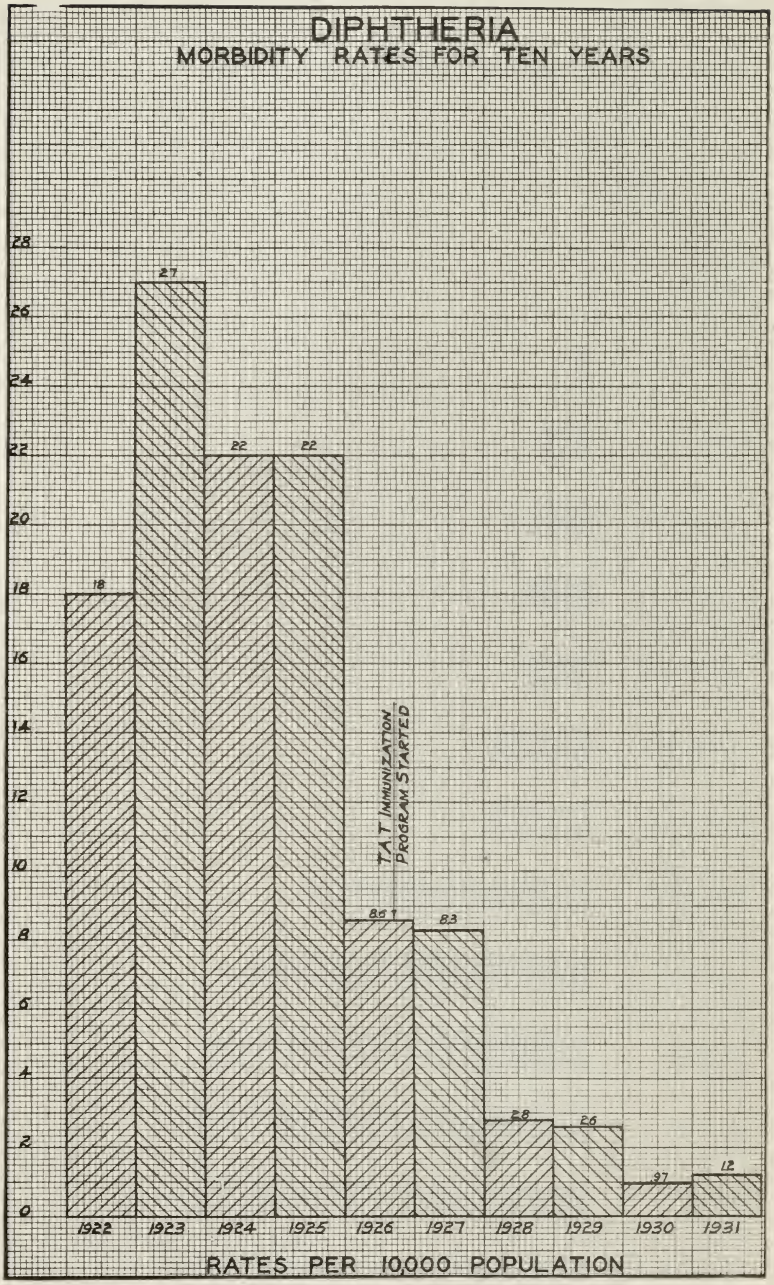

There were 24 cases reported. Of this number 21 cases were cared for in various hospitals. Two deaths occurred.

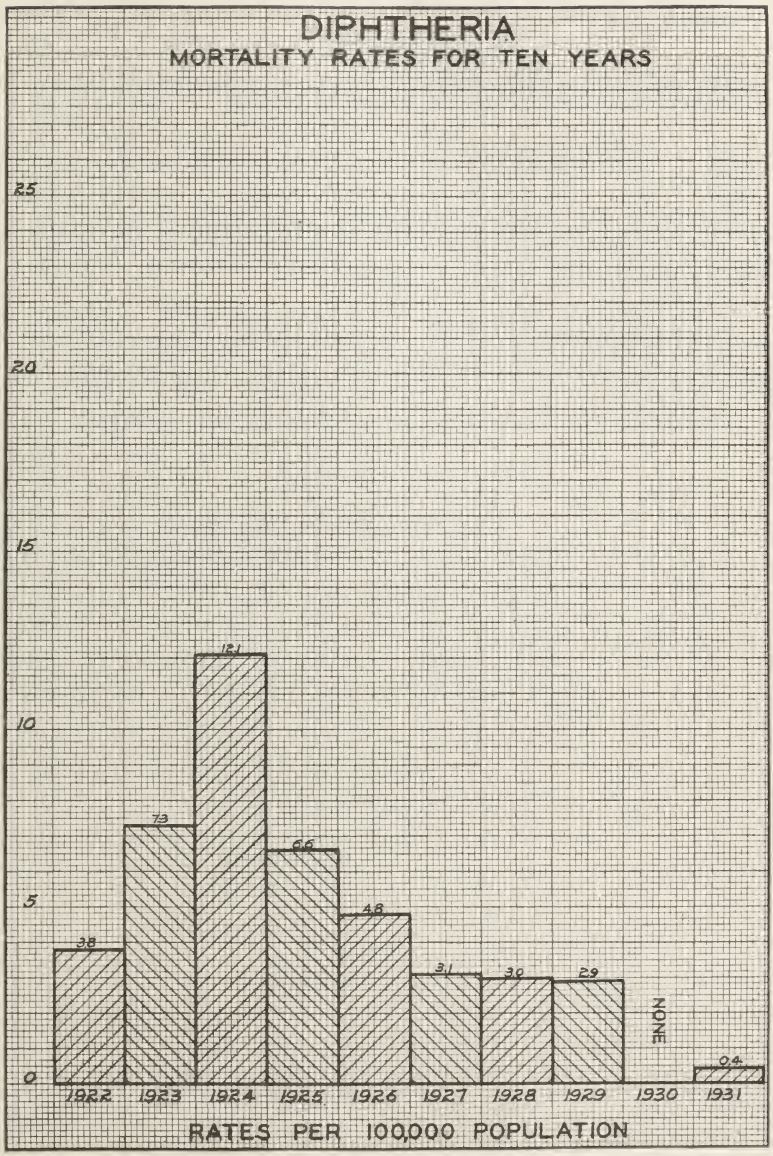

Diphtheria

Nine cases were reported. Five cases were hospitalized, three of which died.

As in the previous years, this department cooperated with the school department in its Diphtheria Prevention work. Nine hundred and ninety-seven children of school age, as well as 179 children of pre-school age, were immunized, making a total of 1,176 children.

Typhoid Fever

The three cases reported were cared for at the Quincy City Hospital.

Whooping Cough

This disease has been prevalent during the year. Four children, all under four years of age, died from its effects.

One hundred and nineteen various clinics were attended during the year.

Assistance was given at the physical examination of the pupils of the first grade in the parochial schools, as well as the dental examination of pupils in the same schools, in connection with the "White House Child Welfare Conference."

In the follow-up work, 2,005 visits have been made, including checking-up of quarantine rules, taking of cultures, examination of contacts and releases from quarantine. Visits have been made to St. John's and St. Joseph's schools in connection with the work.

Office hours were held daily from 9-9.30 A. M. and 1-1.30 P. M.

Respectfully submitted,

CATHERINE F. COLEMAN, R.N.,
Contagious Disease Nurse.

REPORT OF THE VENEREOLOGIST

JANUARY 1, 1932.

DR. C. J. LYNCH, *Health Commissioner.*

DEAR SIR: During the year 1931, seventy-two (72) individuals came to the two clinics for examination or treatment, which may be summarized as follows:—

	Male	Female
Total number of visits to clinic	428	251
Total number of patients treated	26	20
Total number of patients treated for syphillis	15	17
Total number of patients treated for gonorrhoea	11	2

Yours truly,

EDWIN E. SMITH, M.D.

REPORT OF DISPENSARY NURSES

JANUARY 1, 1932.

DR. CORNELIUS J. LYNCH, *Health Commissioner.*

DEAR DOCTOR:—We herewith submit to you our annual report for the year ending December 31, 1931.

Total number of all kinds of tuberculosis on record in the city		505
Cases of pulmonary tuberculosis in the city		294
Active cases	107	
Arrested cases	102	
Cases in sanatoria	66	
Quiescent cases	19	
Cases of childhood type in the city		190
Active cases	51	
Latent cases	118	
Cases in sanatoria	21	
T. B. other cases in the city		22
Cases in sanatoria	4	
Cases at home under treatment	10	
Latent cases	8	
New cases of tuberculosis reported during the year		103
Pulmonary	87	
Childhood type	11	
T. B. other	2	
Miliary T. B. (one with meningitis)	3	
Disposition of new pulmonary cases		78
Admitted to sanatoria	41	
At home under treatment	10	
At home and able to work	6	
Died at home	7	
Died at sanatoria	5	
Reported to Board of Health by death certificate	5	
Died at the Children's Hospital, Boston	1	
Died at Quincy City Hospital	2	
Died at Tewksbury	1	
Disposition of new childhood type		10
Admitted to sanatoria	10	
Disposition of new T. B. other cases		2
Reported to Health Department by death certificate		1
Admitted to sanatorium		1
Total number of adult clinics held		50
Total attendance		248
Total registration		60
Total number of T. B. skin tests done on adults		46
Positive reactions	28	
Negative reactions	18	
Total number of adults X-rayed		52
Total number of "Minimal T. B." cases reported		9
Admitted to sanatorium	2	
At home under treatment	6	
Waiting to be admitted to sanatorium	1	
Total number of deaths during the year		42
Died at home	22	
Died at Norfolk County Hospital	15	
Died at Quincy City Hospital	3	

Died at Children's Hospital, Boston	1	
Died at Tewksbury State Infirmary	1	
Number of adult "contacts" examined at the dispensary		35

All ex-sanatoria cases which can be located are visited by the nurses, except private cases. All homes visited upon report by physician of new case, instructions given, booklets provided for care of patient in the home, disposition of all cases made. Sputum boxes provided cases staying at home, or until patient enters sanatorium, so that further spread of the disease may be checked. Suggestions are made as to examination of all contacts of every case (T. B. skin test, physical examination and X-ray). Homes are visited after a death and instructions given. All cases going to Braintree Hospital for X-ray were transported by nurses every Tuesday A.M. No home is visited by nurses without permission of attending physician.

Undernourished and Contact Children's Clinic

Total number of clinics held		75
Attendance at clinics	1,512	
Registration at clinics	382	
Total number of contacts examined	706	
Total number of new contacts examined	117	
Cases referred to Q. C. H. for T. and A. operation	65	
Nearly every case was referred for dentistry.		
T. B. skin tests done		204
Negative reactions	106	
Positive reactions	98	
Children taken to Norfolk County Hospital for X-rays		146
Total number of children sent to "Camp Norfolk"		41
Total number of boys (ages 8-13 inclusive)	13	
Total number of girls (ages 8-13 inclusive)	18	
Total number of girls (ages 14-18 inclusive)	8	

Average gain for the whole camp group was 9.34 pounds.
Average gain for Quincy group was 10.25 pounds.

These children were carefully chosen by the dispensary physician (family history, T. B. skin test, physical examination, including per cent underweight, and X-ray, the X-ray being taken by Dr. Pillsbury, Norfolk County Hospital superintendent and superintendent of Camp Norfolk) before being admitted to camp.

These children go to camp July 1st for eight weeks' intensive camp treatment. Most of the camp life means "rest." Sun baths are also included in "rest," as the children take their sun baths on the lawn on blankets for a certain period of time each day. Camp fire, swimming at Nantasket Beach once a week, short programs put on by the different camp age groups, moving pictures, band concerts, flag raising, camp community singing are incidents of interest during camp session. Children are under constant medical attention and a graduate nurse is on duty day and night. For the past two years there has been an "infirmary" consisting of the nurses' room, two beds for girls and two beds for boys in cases of emergency. For every group of 10 children there is a well-chosen counsellor. All children are under constant supervision. Special attention is paid to diets. This is the second summer we have admitted older girls (14-18), and their routine was the same as the younger children, with the exception of classes in preparation of foods and proper arranging of diets, which were held by Miss Marjorie Howe, Home Demonstration Agent for Norfolk County Agricultural School. This older group made beach

pajamas and hats to correspond, and pine pillows and had classes in paper work, under the supervision of their counsellors. At the end of camp session all enjoyed a very pleasant outing at Duxbury Beach, where a basket lunch was served.

Milk provided by city and Norfolk County Health Asso., 5,484 qts.

Total number of visits made..... 2,204

Four "food demonstration" classes were held for mothers at the dispensary under the supervision of Miss Marjorie Howe, Home Demonstration Agent of the Norfolk Agricultural School, Walpole. Through these classes mothers were taught the simpler and less expensive ways of preparing various diets so that all important vitamins would be included at least possible cost. There was a good attendance and it was voted to repeat these classes in the early spring of 1932.

Both nurses attended the Annual Norfolk County Health meeting at Braintree, Social Medical meeting at Swampscott, summer health camp outing at Duxbury Beach (providing transportation); relieved on Child Welfare Clinics, Contagious Disease work during vacation of other nurses, assisted at "Ten Year Tuberculosis Program" in public schools by transporting children; assisted at T. A. T. clinics in parochial and public schools and baby clinics. Attended Health Course Lectures at Quincy City Hospital given once a week for eight weeks, and both nurses are taking the New York Public Health Extension Course for nine months at the State House, Boston. Considerable social service work has been done on many of our cases, and we have provided clothing, toys, dinners, etc., for our needy cases.

Respectfully submitted,

GERTRUDE T. RUSSELL, R.N.,
MARY E. KEELEY, R.N.,
Dispensary Nurses.

REPORT OF CHILD WELFARE PHYSICIAN

JANUARY 1, 1932.

CORNELIUS J. LYNCH, M.D., *Commissioner of Health, City of Quincy, Mass.*

DEAR DR. LYNCH:—It is my privilege to submit to you the report of the Child Welfare Clinics for the year ending December 31, 1931.

Statistics

Total Clinic registration		2,826
Well Baby Clinics	2,225	
Preschool Clinics	241	
Orthopedic Clinics	360	
Number of Clinics		360
Well Baby Clinics	289	
Preschool Clinics	47	
Orthopedic Clinics	24	
Total Clinic Attendance		8,268
Well Baby Clinics	7,453	
Preschool Clinics	410	
Orthopedic Clinics	395	
Total Home Visits by Nurses		3,304
Babies	3,056	
Preschool children	248	

A more detailed analysis of these figures may be found in the report of the Child Welfare Nurses and the Orthopedic Clinic report.

The statistical report for the year 1931 shows an increase in attendance (1,113) and in number of visits made by the Nurses (182). The decrease in registration is probably due to the fact that there have been no Nutrition Conferences this year. The fewer number of clinics is the result of the number of legal holidays which have come on mid-week days.

Comparison of Annual Reports of Well Baby Clinics

Year	Registration	New Enrollments	Attendance
1927	1,752	622	7,047
1928	2,130	693	7,293
1929	2,783	652	6,795
1930	2,887	717	7,145
1931	2,826	992	8,258

Reference of Children

During the year, 258 children have been referred by clinic doctors or nurses to the care of local physicians, dentists, or Hospital. This number includes every infant or child whose physical examination at the clinic revealed the need of treatment.

In the report of the Child Welfare Nurses may be found a classification of these references.

Volunteer Help

Volunteer workers in the clinics this year have included Miss Alice G. Thompson of Wollaston, and members of: The Wollaston Women's Club, The Wollaston Mothers' Club and The Girl Scouts. These volunteers have given generous and most helpful service.

Acknowledgments

The ease and efficiency with which the increasingly large clinics have been conducted is due to the ability of Mrs. Nettie D. Fowler and Miss Mary Marr, the clinic executives.

For cooperation and assistance in the interest of the Child Welfare activities grateful appreciation is expressed to the Commissioner of Health, the personnel of the Health Department office and other members of the Health Department staff.

May I also acknowledge the courtesy extended by the Fore River Club, the North Quincy Council Knights of Columbus, and the Trustees of Woodward Institute.

Respectfully submitted,

RACHEL L. HARDWICK, M.D.,

Child Welfare Physician.

REPORT OF CHILD WELFARE NURSES

JANUARY 1, 1932.

DR. C. J. LYNCH, *Health Commissioner.*

DEAR SIR:—I herewith submit a report of the Child Welfare activities for the year of 1931.

There were 289 Well Baby Clinics held for the babies from birth to two years of age. There were 2,225 babies registered during the year. Of these there were 754 new babies enrolled. There were 52 transferred to the Pre-school Clinic. There were four deaths in this group, all from bronchial pneumonia.

A weekly clinic was held for the pre-school child, making 47 clinics, with a total registration of 241 children. Of these there were 76 removed from the roll, as they were over the age limit or have moved from the city.

Orthopedic clinics were held on the second and third Thursday of each month, making 24 clinics, with a total registration of 360. eighty of these children were transferred to other sources for further care and treatment at school age or have moved out of the city.

During the year there were 1,532 visits to babies one year and under; 1,155 to babies between 1 and 2 years of age, and 432 to the pre-school group. There were 180 inspections to 16 boarding houses for babies, and one day nursery inspected.

There were 7 referred to family dentists; 2 to the Forsyth Dental School, and 9 to the Quincy City Hospital, as listed below:—

Tonsillectomy	6	
X-rays (head—thymus)	3	
Referred to the Massachusetts Eye and Ear Infirmary		2
Referred to the Massachusetts Children's Hospital		16

Pre-school Clinics		410	308	106
Totals		805	688	238

Nurses assisted at Infantile clinics and as needed in other clinics.

At this time the Child Welfare Nurses wish to extend their thanks to the members of the Health Department, the Wollaston Women's Club and the Wollaston Mothers' Club for their valued assistance at the Wollaston Baby Clinic, and to Miss Alice Thompson of Wollaston for much appreciated assistance at the Atlantic Clinics.

Respectfully submitted,

NETTIE DENTON FOWLER, R.N.,
MARY ELIZABETH MARR, R.N.,

Child Welfare Nurses.

REPORT OF ORTHOPEDIC PHYSICIAN

JANUARY 1, 1932.

C. J. LYNCH, M.D., *Health Commissioner, Quincy, Mass.*

DEAR DR. LYNCH:—The following is the report of the Orthopedic Clinics maintained by the City of Quincy as part of its Child Welfare program for the year 1931.

There have been twenty-two (22) clinics. These clinics have been held on the second and third Thursdays of each month except during the month of August.

The total yearly attendance was 395—132 were new cases; 263 have returned for the usual educational orthopedic advice.

The types of orthopedic conditions found at the clinics may be classified as follows: Faulty posture, pronated feet, knock knees, generalized muscular weakness and rachitic deformities.

The attendance increase over last year is 145.

The success of the clinic is due to the cooperation and assistance given by those interested in Child Welfare.

Respectfully submitted,

M. G. KATZEFF, M.D.
Orthopedic Physician.

REPORT OF QUINCY HABIT CLINIC

JANUARY 1, 1932.

CORNELIUS J. LYNCH, M.D., *Health Commissioner, City Hall, Quincy, Mass.*

MY DEAR DR. LYNCH:—Herewith is a report of the activities of the Quincy Habit Clinic for the year ending December 31, 1931.

For the most part the clinical work has continued with the same success as in previous years, due in a large part to the support received from the community and the assistance contributed by the Health Department of the city. There has not been an increase in the number of cases seen, but the results obtained have been gratifying. The entire community has been responsive and most encouraging in its readiness to accept mental hygiene as a part of a child welfare program. Quincy is outstanding in our opinion because of its alertness and progressiveness in preventive work for children.

The largest number of cases referred came from the School Department, with whom the clinic has genuinely enjoyed working. It is hoped that during this coming year it may be possible to effect a more expansive educational program along with the clinical activities.

Number of weekly clinics held	46
Number of new cases attending	70
Number of old cases attending	93
Number of visits by children	234
Number of visits by social worker	404

REPORT OF MILK INSPECTOR

JANUARY 1, 1932.

DR. C. J. LYNCH, *Health Commissioner.*

DEAR SIR:—I herewith submit my report for the year ending December 31, 1931.

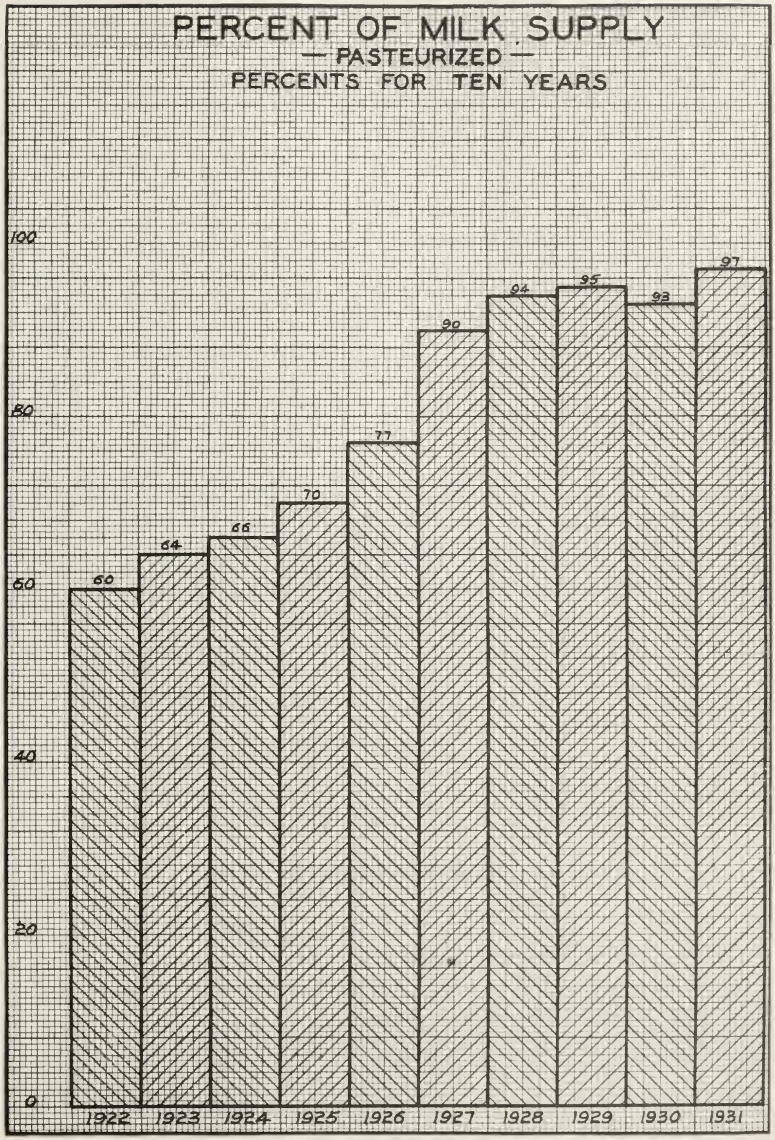

The following statistics refer to milk, cream, ice cream, oleomargarine and buttermilk, produced and consumed in Quincy:—

Dairies in City of Quincy

1 cow	8
6 cows	1
7 to 14 cows	3
15 to 44 cows	1
Total number of cows in Quincy	106
Total number of cows in nearby dairies who serve the City of Quincy with milk and cream	232
Milk produced in Quincy and nearby dairies (quarts)	2,320
Milk sold raw in Quincy (quarts)	1,140
Milk contractors' processing and storage plants in the City of Quincy	9
Milk contractors from out of town supplying milk in the City of Quincy	17
Teams, auto cars and trucks employed in distribution of milk, cream, buttermilk and ice cream in the City of Quincy (all have been inspected)	192
Milk consumed in Quincy per day (quarts)	32,128
Pasteurized milk consumed per day in Quincy (quarts)	30,968
Raw milk consumed per day in Quincy (quarts)	1,040
Certified milk consumed per day in Quincy (quarts)	120
Grade A milk consumed per day in Quincy (quarts)	4,223
Percentage pasteurized milk consumed in Quincy	97
Percentage raw milk consumed in Quincy	03
Cream consumed in Quincy (quarts) all pasteurized	2,721
Ice cream consumed in Quincy (gallons) all pasteurized	1,900
Ice cream manufactured in Quincy (gallons)	570
Buttermilk consumed in Quincy (quarts)	410
Milk processing plants in Quincy	4
Milk processed in Quincy (quarts)	32,600
Retail licenses issued in Quincy—milk, ice rream, and oleomargarine	854
Milk pasteurizing plants licensed	4
Revenue from licenses	$470.00

Table Classification of Dairies Inspected and Scored

Scoring 50 to 60		20
Scoring 61 to 70		10

1931

Milk samples below State Standard for butter fat		7
Milk samples with a high bacteria count		16
Ice cream samples collected and tested		170
Samples taken for butter fat	85	
Samples taken for bacteria	85	

All ice cream samples met the State Standard.

Ice cream manufacturers doing business in Quincy	10
Ice cream manufacturing plants serving Quincy from out of town	31

Milk and ice cream samples are taken from all schools and tested each month during the school year. All samples met the State Standard.

Number of stores visited and milk and cream chests inspected, also ice cream cabinets inspected	529
Number of dairies visited and inspected	357
Number of milk room visited and inspected	120
Number of milk rooms visited and inspected	120
Number of ice cream manufacturing plants visited and inspected	116
Number of restaurants visited and inspected	81
Number of bakeries visited and inspected	31
Number of complaints investigated	3

The price of milk and cream has dropped far below the cost of production, as cash and carry stores are selling milk at $.08 per quart and cream at $.16 the half pint, the quality remaining the same as hitherto. Some means for stabilization of prices must be devised or a monopoly will be inevitable, with the resultant exorbitant prices that now apply in other sections of our country.

Respectfully submitted,

JAMES O'DOWD,

Milk Inspector.

REPORT OF THE BACTERIOLOGIST

JANUARY 1, 1932.

DR. C. J. LYNCH, *Health Commissioner.*

DEAR SIR:—Herewith is tabulated the examinations done in the laboratory for the year 1931:

Bacteriological examinations of ice cream	80
Bacteriological examinations of milk	624
Chemical examinations of milk	784
Chemical examinations of ice cream	80
Total number of examinations	1,568

Yours truly,

EDWIN E. SMITH, M.D.

REPORT OF INSPECTOR OF MEATS AND PROVISIONS

Food Establishments in Quincy

Markets	139
Stores	187
Restaurants and lunch rooms	65
Creameries	10
Fish markets	70
Delicatessens	15
Fruit stores	45

The business section of our city is gradually broadening from the centre district. Many small blocks of stores have been erected in our outlying districts the past few years, which gradually increases our work.

More inspections are being made each year and more time and attention is given to see that foodstuffs of all kinds, in all markets, restaurants, and lunch rooms, which are increasing each year, are clean and in good sanitary condition at all times in accordance with the rules and regulations of the Department of Health.

In some markets where improvements had to be made on account

of conditions, cold storage systems have been installed. The old system of cooling refrigerators with ice is fast going out of existence with the up-to-date market of today. We are growing fast to be the business center for all surrounding towns. More people are coming here to trade and do their marketing each year. This year the holiday business was much better than the market men expected and were more than pleased with the large amount of poultry of all kinds that was sold. I found many markets completely sold out and conditions best ever.

This year I have inspected quite a number of shops and drug-store lunch counters and have found conditions very satisfactory.

I am at the office several times each week and any complaints that are made are looked after at once. Thanks to each and every one for the courtesy shown me in this department this year.

Respectfully submitted,

HOWARD ROGERS,

Inspector of Meats and Provisions.

REPORT OF SANITARY INSPECTOR

JANUARY 1, 1932.

DR. C. J. LYNCH, *Health Commissioner.*

DEAR SIR:—Following is my report as Sanitary Inspector for the year 1931:

Sanitary Inspections

	Inspections	Complaints	Notices
Bakeries	32	6	7
Cesspools	87	64	26

J. J. KENILEY,

Inspector of Plumbing.

REPORT OF STATISTICIAN

JANUARY 1, 1932.

DR. C. J. LYNCH, *Health Commissioner.*

DEAR SIR:—I have the privilege to submit the following report for the year 1931:

List of Causes of Death
Some Comparative Morbidity Rates
Comparative Morbidity Cases
Reportable Diseases by Wards
Reportable Diseases by Months
Infant Mortality

All charts in the Annual Report and the computed data under Mortality Statistics were other tasks of mine. The routine statistics during the year were among my duties.

Last year, I conducted a survey of the health department activities, a complete inventory of all equipment and supplies, checked each bill as it came in and assigned it to proper division of the department, thus keeping close tab on all expenditures, also ordered the supplies for the department.

Many settlement histories were taken to determine the responsibility of City of Quincy for paying hospitalization of tuberculosis patients, with the view of protecting this city against unjustified charges. Likewise, a financial history was taken of each prospective patient for hospitalization, with the view that all who could afford to pay should pay. Claims of other cities or towns on Quincy for hospitalization charges on account of Quincy settlement of patient were allowed only after exceedingly careful check of settlement. Several trips to other cities were made for purpose of adjustment.

As statistician, I have endeavored to conduct careful, accurate and expressive health bookkeeping of the city. The charts on infant mortality and diphtheria morbidity, for example, show a definite trend of improvement in rates. In my financial duties, I have sought to work for economy at all times.

Apart from these duties I have acted as assistant to Dr. Smith in the venereal clinics and have conducted the follow-up work. Clinic attendance has manifestly increased. Forty-four visits at night were made to lapsed patients, some of these to patients of private physicians reported by the State.

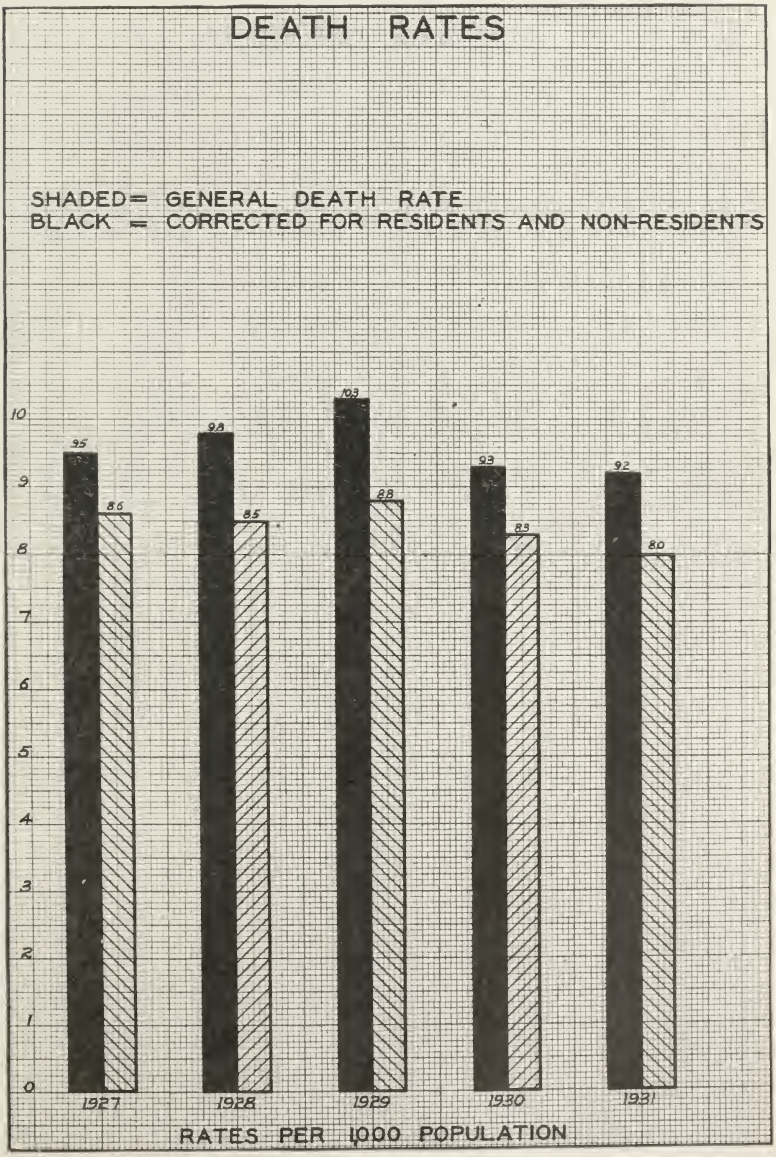

Very truly yours,

A. S. PACTOVIS,
Statistician.

MORTALITY STATISTICS

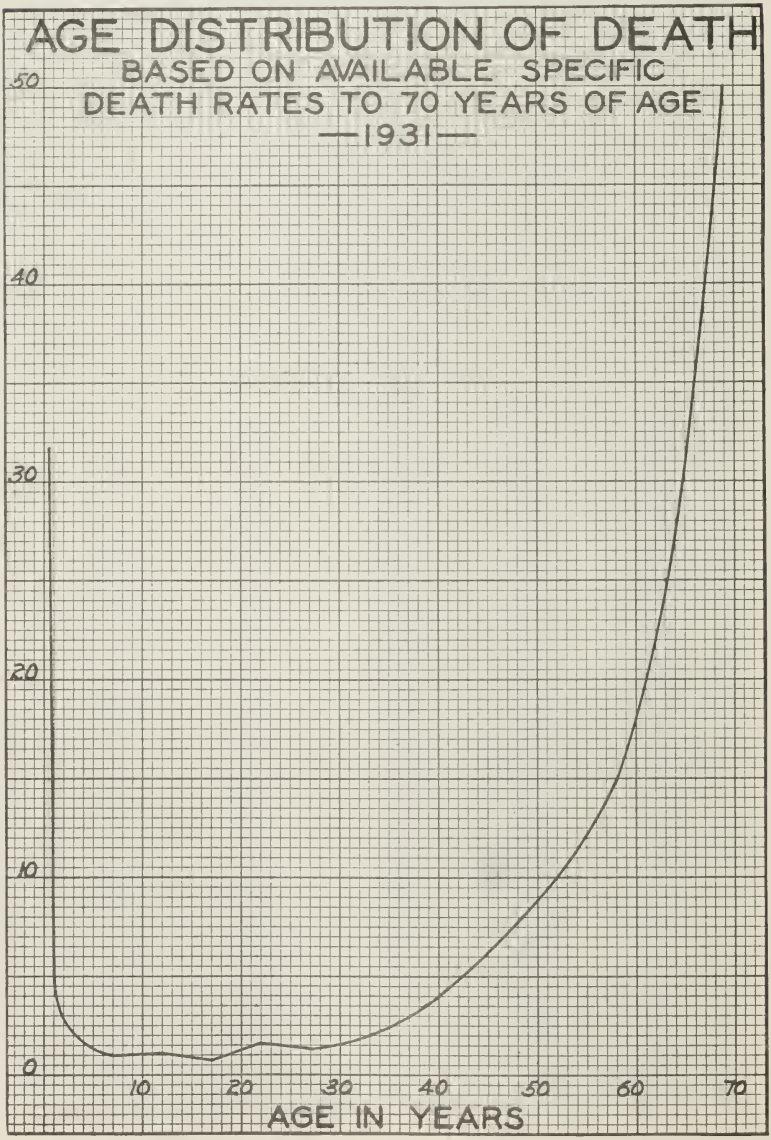

In 1930, there occurred 601 deaths in Quincy. Based on the estimated population of 75,000 (74,923) on July 1, 1931, the general death rate for the year was 8.0 per 1,000 population. Correcting for residents and non-residents, 691 residents who died make up a "resident" rate of 9.2.

The accompanying chart of general and resident death rates for the past five years shows little progressive variation.

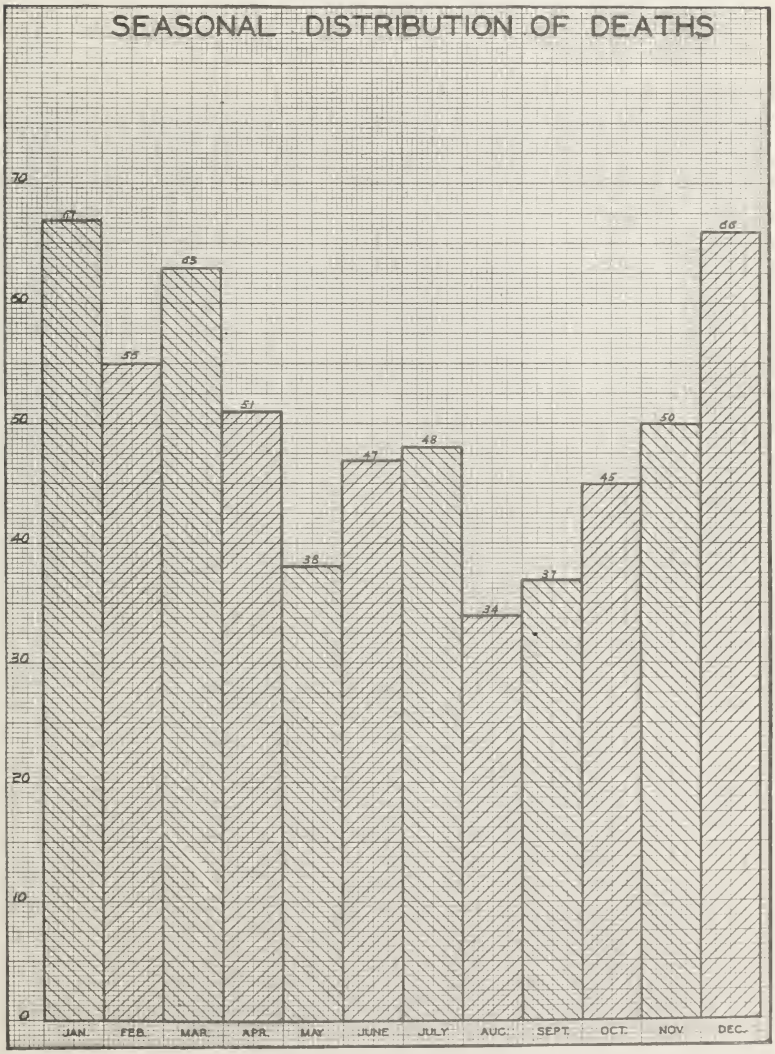

SEX. Of the 601 deaths, 49.6%, or 298, were males. The sex composition of Quincy on July 1, 1931, was approximately 37,000 (36,927) males and 38,000 (38,073) females, and the death rates 8.1 and 8.0 respectively.

AGE. Of the 601 deaths, 42, or 7% were under one year of age. The largest number occurred in the 70-74 years of age period, 80, and the least in the 15-19 year group, 4, with the exception of a single death in the 95-99 year age group. The average age at death was 55 years.

NATIVITY. Three hundred and thirty, or 54.9% of the 601 deaths, were native born.

SEASONAL DISTRIBUTION OF DEATHS. The largest number of deaths in any one month occurred in January, when there were 67, and the next largest in December when there were 66. The lowest number fell in August, when 34 deaths were registered.

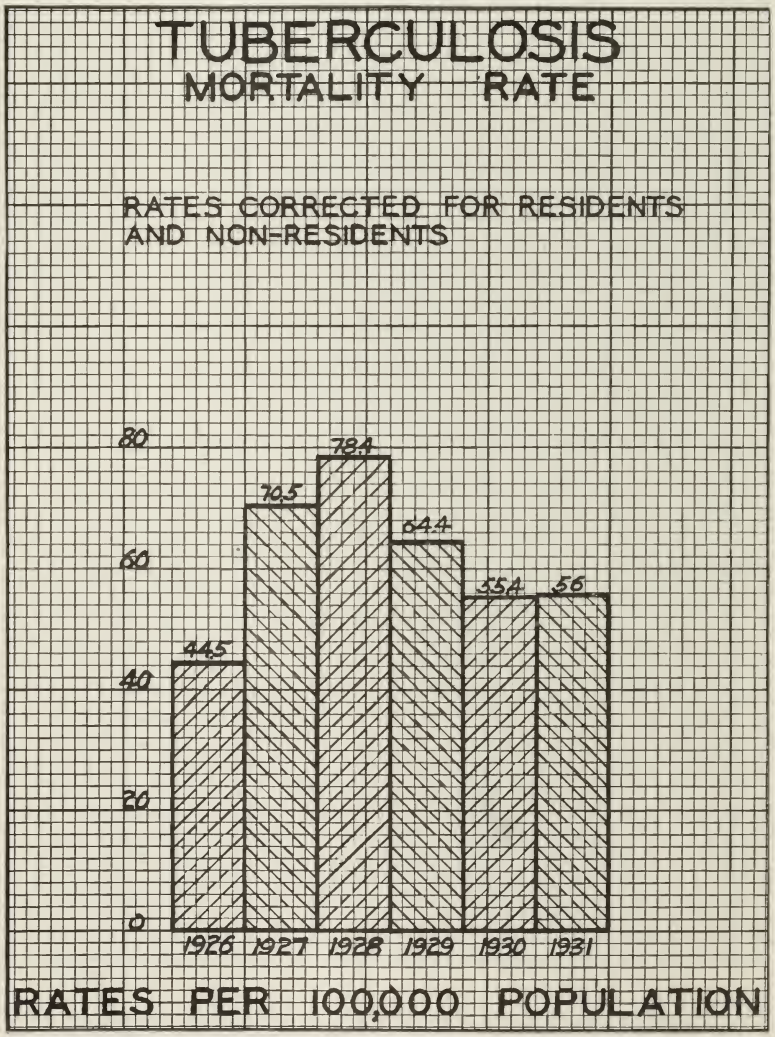

INFANT MORTALITY. The infant mortality rate corrected for residents and non-residents in 1931 was 40.6, the lowest in the history of the city. Since 1927 the rate has been falling by a steady decrement. See chart of Infant Mortality on page 194. Of those infants dying within the city, 50% died in the first week, 28.9% the first day.

Causes of Deaths

PNEUMONIA and BRONCHOPNEUMONIA caused 43 deaths in 1931, a rate of 57.3 per 100,000 population, compared with 63 deaths in 1930 and a rate of 84 per 100,000.

HEART DISEASE. There were 177 deaths from heart disease, 29.5% of all deaths, a rate of 236 per 100,000 population. The number of deaths in 1931 was 42, or 23.5% of the total, a rate of 197 per 100,000 population.

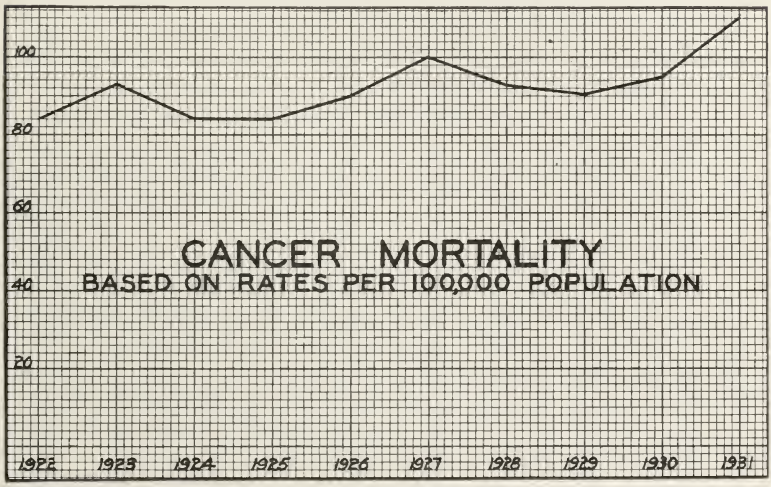

TUBERCULOSIS, all forms, caused 26 deaths within the city, of which 22 were respiratory. Forty-two deaths of Quincy resi-

dents, including those in sanatoria, give a rate of 56 per 100,000 population. The foregoing chart compares the mortality rate for the past five years.

CEREBRAL HEMORRHAGE AND APOPLEXY were responsible for 50 deaths in 1931, a rate of 66.7 per 100,000 population. In 1930, 46 deaths and a rate of 63.7 obtained.

CANCER caused 82 deaths in 1931, 13.6% of the total, a death rate of 109.3 per 100,000. Comparative annual rates are shown in the chart.

BRIGHT'S DISEASE AND NEPHRITIS killed 50 in 1931, a rate of 66.7 per 100,000 population. In 1930, a rate of 73.4 was derived from 54 deaths.

DISEASES OF EARLY INFANCY AND MALFORMATIONS numbered 23 in 1931 as compared with 31 in 1930. The rates respectively were 30.7 and 42.9 per 100,000 population.

EXTERNAL CAUSES accounted for 47 deaths, a rate of 62.7 per 100,000 population, compared with 41 deaths and a rate of 56.8 in 1930. There were 19 deaths from automobile accidents, 9 more than in 1930.

DEATHS UNDER ONE YEAR PER 1,000 LIVE BIRTHS

FORTY-SECOND ANNUAL REPORT OF THE QUINCY CITY HOSPITAL

For the Year Ending December 31, 1931

BOARD OF MANAGERS

MAURICE P. SPILLANE, *Chairman*.....Term expires 1934
GEORGE TAYLOR, *Secretary*.....Term expires 1932
JOSEPH A. DASHA.....Term expires 1933
ERNEST B. NEAL.....Term expires 1935
FORREST I. NEAL, ...Term expires 1934

CONSULTING STAFF

Physician
EDWIN A. LOCKE, M.D.

Surgeon
FRED B. LUND, M.D.

Gynecologist
CHARLES H. HARE, M.D.

Neurologist
JOHN J. THOMAS, M.D.

Diseases of the Ear, Nose and Throat
GEORGE H. POWERS, JR., M.D.
WILLIAM J. HARKINS, M.D.
WILFRED G. FUNNELL, M.D.
ROBERT O. GILMORE, M.D.

Diseases of the Eye
GEORGE H. RYDER, M.D.

Pathologist and Bacteriologist
FRANK B. MALLORY, M.D.

Roentgenologist
SAMUEL W. ELLSWORTH, M.D.

Orthopedist
HENRY J. FITZSIMMONS, M.D.

Bone Surgery
FREDERIC J. COTTON, M.D.

Urologists
ARTHUR L. CHUTE, M.D.
ROGER C. GRAVES, M.D.

Dermatologist
RUDOLPH JACOBY, M.D.

Dental Department
FRED G. ROLLINS, D.D.S.
FRANK J. KENNA, D.S.
I. L. SHAW, D.S.

VISITING STAFF

Consultant
NATHANIEL S. HUNTING, M.D.

Surgeons
WALTER L. SARGENT, M.D. — DANIEL B. REARDON, M.D.
WILLIAM J. MCCAUSLAND, M.D. — WILLIAM R. HURLEY, M.D.

OFFICERS OF HOSPITAL AND TRAINING SCHOOL

Superintendent of Hospital

RUTH J. ADIE, R.N.

Assistants

ESTELLE C. SVENSON, R.N.	Executive Assistant
MARION LEACH, R.N.	Second Executive Assistant
EILEEN M. YOUNG, R.N.	Supt. of Training School
JESSIE NICHOLSON, R.N.	Training School Assistant
DOROTHY DAWES, R.N., B.S.	Theoretical Instructor
MINNIE E. HARRON, R.N.	Practical Instructor
CONSTANCE LARKIN, R.N.	Night Supervisor
CHRISTINE M. BATTISTA, R.N.	Assistant Night Supervisor
BARBARA HOBBS, R.N.	Surgical Supervisor
HELENE G. REED, R.N.	X-Ray Technician
MADELYN FLAHERTY, R.N.	Asst. X-Ray Technician
MARJORIE HOBBS MARTENS	Physiotherapy Technician
FRANCES K. MORRIS, B.S.	Laboratory Technician
ELINOR D. RICH, A.B.	Asst. Laboratory Technician
AMITY PERKINS, B.S.	Dietitian

INFORMATION RELATIVE TO ADMISSION OF PATIENTS, RATES, ETC.

Application for the admission of patients to the hospital should be made to the superintendent. Patients desiring admission should be referred by a physician.

Accidents are admitted at any time.

The hospital maintains an ambulance for transportation of patients within the city limits. The ambulance may be obtained for special service by application to the superintendent.

Single rooms, $4.50, $5.00, $6.00, $8.00 and $10.00 per day.
Semi-private rooms, $5.00 per day.
Ward bed (private), $3.00 and $4.00 per day.
Ward bed (service), $3.00 and $4.00 per day.

Additional charges:

Operating room, $5.00 to $10.00.
Delivery room, $5.00.
Etherizing fee, $5.00.
Laboratory fee, $5.00.
Plaster casts or special dressings, $3.00 to $5.00.
Ambulance, $3.00.
Board of special nurse, $1.00 per day.

Proprietary drugs or unusual or expensive preparations, mineral waters, liquors, etc., will also be charged extra.

Radiographs will be taken every day by appointment, with the exception of Sunday.

REPORT OF BOARD OF MANAGERS

To His Honor the Mayor, the President and Members of the City Council.

GENTLEMEN:—The Board of Managers of the Quincy City Hospital herewith submits its report for the year ending December 31, 1931.

The completed improvements made in 1931 have now given the City a most excellent Hospital—there are yet a number of necessary changes and additions still needed, but which undoubtedly will have to wait for more favorable financial conditions.

There are much needed renewals required in the laundry, in the power plant and, if the Hospital fills up to capacity, the finding of accommodations for additional nurses will present quite a problem —additional quarters will have to be found.

The major improvements completed in 1931 were a new operating building, giving three additional operating rooms with new and fine equipment; a work room, two emergency wards of four beds each, a new accident room, and a doctor's room. In the Maternity Building a new unit of three labor rooms, a ward of three beds, two delivery rooms, a Caesarian room, plus utility, sterilizing and scrub rooms, have been added. A nursery of three rooms, a wash room, isolation room and milk room have been established. In the Rice Building I and II, the rooms and ward have been renewed with new plastering, painting and refinishing of old equipment. New X-Ray rooms, with the best and most modern equipment, a new laboratory unit and equipment, a physiotherapy department and equipment, making, as has been said, "an ensemble which compares favorably with any other in New England." There has also been built in the Medical and Surgical Building a fireproof record room for the storage of records, also morgue. Both record room and morgue have been needed for some years.

Your particular attention is directed to the reports of Doctors Whelen, McCarthy and Payzant, which will give you more detailed information as to equipment and work done in their various departments.

The report of the Hospital Librarian is interesting, especially when compared with last year. While the increase of patients in 1931 over 1930 was slightly over 8 per cent, reading generally increased more than 20 per cent; another interesting and significant feature is that, while there is some increase in fiction reading, gain in adult non-fiction was about 240 per cent, and in junior non-fiction reading there was increase of some 30 per cent.

The report of the Medical Staff indicates its desire and aspiration for men trained and devoted to the Hospital and its work, and with such purpose always in view the work of the Hospital will always be above reproach and its reputation assured.

Steps have been taken to develop the Department of Pediatrics, Dr. Edmund B. FitzGerald having been recently appointed as Visiting Pediatrician.

The report of the Training School also shows that earnest endeavor is being made to develop the best in nursing.

It is with considerable pride that we mention that, in a national survey of schools of nursing, ours was found to be in the upper quadrant in nearly every essential.

Also, during the year a Training School Committee was created, its duty being primarily to consider and advise on student problems. The members of this Committee are:

Dr. Nathaniel S. Hunting, Chairman.
Mrs. John D. Mackay.
Mrs. William A. Robb.
Mrs. Carl Heyward.
Mrs. F. Warren Crane.
Mr. Ernest L. Collins.

The total operating expenses for the year 1931 were $307,012.18. For the previous year they were $275,673.37.

The total receipts from patients in 1931 were $190,832,83; from other sources $12,043.85, making a total from all sources of $202,-876.68, as against a total income from all sources of $193,809.51, for the year 1930.

The total number of patients treated were 5,202, as compared with 4,771 for 1930.

To the Hospital Aid Associations and to all other individuals and associations who have assisted the Hospital with work, gifts and donations, we express our heart-felt appreciation.

We are glad to record that one of our Board, Mr. Ernest B. Neal, who for some time was seriously ill, is making good recovery and we hope that soon we may again have the benefit of his advice and experience, which has been of real value to the Board.

Mr. George Taylor's term as a member expired on January 1, 1932, by limitation. The Board is sorry to lose the services of a man whose keen, practical foresight, intelligent and active services have been of the greatest assistance to it and the Hospital.

MAURICE P. SPILLANE,
JOSEPH A. DASHA,
FORREST I. NEAL,
For the Board of Managers.

REPORT OF SUPERINTENDENT

To the Board of Managers, Quincy City Hospital:

The following is the report of the work done at the Quincy City Hospital for the year 1931:

Statistical Information

Patients in hospital January 1, 1931	152	
Patients admitted during the year	5,190	
Total		5,342
Male patients admitted	2,062	
Female patients admitted	3,128	
Total		5,190
Patients admitted to medical service	666	
Patients admitted to surgical service	2,936	
Patients admitted to obstetrical service	802	
Number of babies born	786	
Total		5,190
Private patients admitted	1,148	
Private ward patients admitted	2,957	
Service patients admitted	1,085	
Total		5,190
Paying patients admitted	5,007	
Abatements, rates	5	
Abatements, free	61	
Free patients admitted	117	
Total		5,190
Largest number in the hospital any one day	192	
Smallest number in the hospital any one day	102	
Daily average number of patients	146	
Average number of patients admitted per day	14	
Total number of days' treatment	53,426	
Children admitted, 12 years and under	969	
Operations	2,545	
Out-patients	3,016	
Accidents	955	
Male patients discharged	2,071	
Female patients discharged	3,131	
Total		5,202
Patients discharged—medical service	657	
Patients discharged—surgical service	2,956	
Patients discharged—obstetrical service	1,589	
Total		5,202

Patients discharged—well	701	
Patients discharged—relieved	4,140	
Patients discharged—unrelieved	127	
Patients discharged untreated	9	
Deaths within 48 hours of admission	77	
Stillborn	28	
Remaining deaths	120	
Total		5,202
Number of patients remaining in hospital Dec. 31	140	
Total		5,342

Commission	3,956 39	
Postage	280 00	
		147,839 59
Total expenditures		$307,012 18

The statistics show a splendid increase in the work in each and every department. The working plan of the new buildings continues to prove its value. The smaller ward and private rooms with convenient utility rooms are an asset worthy of consideration for those anticipating future building.

The new surgical building, with its fine equipment, is fast repaying for the inconveniences during construction. Also the laboratories, such as Clinical, Pathological, X-Ray and Physiotherapy are equipped, and the work is carried on by doctors to well deserve the support of all citizens.

House facilities are taxed to the utmost so that additions to the Nurses' Home and a new administration building are the last steps to the completion of the three hundred bed institution.

The Wollaston and Quincy Aids have continued their help with the sewing accomplished at their monthly meetings, the teas to the nurses, and the cheer and friendliness they contribute at the holiday seasons. Their aid is greatly appreciated, and many thanks are due them.

May I take this opportunity to thank the Board of Managers for their hearty cooperation and the doctors, nurses and others who have given their loyal support this past year.

Respectfully submitted,

RUTH J. ADIE, R.N.,
Superintendent.

REPORT OF THE SCHOOL OF NURSING OF QUINCY CITY HOSPITAL

To the Board of Managers, Miss Adie, and Friends:

I wish to submit the forty-second report of the Quincy City Hospital School of Nursing for your attention.

The Executive and Teaching Personnel is as follows:

Superintendent of Nurses	1
Assistant Superintendent of Nurses	1
Instructor of Theory	1
Instructor of Principles and Practice of Nursing	1
Night Supervisor	1
Assistant Night Supervisor	1
Obstetrical Supervisor	1
Operating Room Supervisor	1
Assistant to Operating Room Supervisor	2
Charge Nurses	8

The census of school follows:

Senior nurses	21
Intermediate nurses	13
Junior nurses	4
Preliminary students	13
Total	51
Graduate floor duty nurses	43

You may wonder at the decrease in the number of students enrolled in our School. There are really three reasons for this change. First, we have raised the entrance requirements to a full high school course, or its equivalent, either in a college or normal course. This has made considerable difference in the number of eligible candidates. Second, our housing facilities are limited. Third, following the suggestion of the grading committee it seemed wiser to pay greater heed to the quality of nurses that we have than to the quantity that we graduate.

This year our graduating class numbered sixteen of these, nine are employed on the hospital staff, two in executive positions, the other seven as floor duty nurses. Mr. Stacy Southworth, headmaster of Thayer Academy, gave the address to the class.

I am very happy to report that an advisory committee for the School of Nursing has been organized. Dr. Nathaniel S. Hunting has been chosen chairman of the School of Nursing Committee, and associated with him are Mrs. John D. MacKay, Mrs. William A. Robb, Mrs. Carl Hayward, Mrs. F. Warren Crane, and Mr. Ernest L. Collins. The committee has been meeting monthly since March, with the exception of the summer months. The members are very much interested in the progress of the school and I feel sure that their support and encouragement are going to be an important aid to its progress.

Two other important happenings have occurred. A new science laboratory, well equipped, except that we would like more microscopes, has been added to our teaching equipment. This laboratory has been longed for, and we are happy to have at last one of our own, where classes can be carried on without the many interruptions that were inevitable when the school shared the hospital laboratory.

Then there ha sbeen an alteration in our affiliations. Fifteen students yearly are now being sent to Bellevue Hospital in New York City for instruction and experience in Medical and Pediatric Nursing. Three months are spent in each division. In addition, eight students attend the Charles V. Chapin Hospital in Providence for training in communicable diseases. This plan for supplementing the experience obtained in the home school was approved by the New York Board of Nurse Examiners.

In April, Miss Conway of the New York Board made a survey of the School. She reported that satisfactory progress is being made. Her visit was helpful in that she encouraged us in what we are doing, and also made some valuable suggestions which we hope to adopt.

It seems as if this is the most natural time to express my appreciation to all the friends of the school for their many kindnesses to us. Sometimes we seem to take much for granted, but we really are deeply grateful to the doctors for their care of us while we are ill, their generosity in lecturing and supporting our various social activities. To the hospital aids for gifts of magazines and for the continuation of the afternoon teas. To our many other friends, who, either through gifts or words, encourage us to greater effort.

Respectfully submitted,

EILEEN M. YOUNG,
Superintendent of Nurses.

REPORT OF THE MEDICAL STAFF

To the Superintendent and Board of Managers, Quincy City Hospital:

Meetings of the staff held regularly throughout the year have shown good attendance on the part of the members, with a growing tendency to discuss and weigh more carefully all matters pertaining to organization so that high standards of work in the hospital may be maintained.

There has been a steady increase in the number of physicians seeking to establish practice in this city. This is due both to the fact that Quincy is growing rapidly and also because it is known that we possess an excellent hospital which is open to any reputable physician in the city who is a member of the Massachusetts Medical Society. For the more careful consideration of applicants to the courtesy staff, a rule was adopted early in the year requiring one year's residence in Quincy before admission to hospital privileges, and consequently we have many names on the waiting list, but no new members have been admitted. This is a healthy condition, enhancing the value of staff membership.

The completion of the surgical building has added greatly to the facilities for the care of surgical and obstetrical cases, while the new and well-equipped X-Ray rooms add much to the scope of that department. During the many months of construction, the staff labored under difficulties in temporary quarters, but I feel that its work was performed well under trying conditions. Perhaps no part of the hospital requires more careful supervision than the surgery, especially as more physicians, trained to do some surgical work, are operating and bringing in new ideas and new technique. The staff is trying to keep the work on a high plane of excellence.

The obstetrical department is progressing satisfactorily, with more patients seeking its services as it becomes better known to the citizens of Quincy, and with the excellent treatment which these patients receive, I am confident that in the near future, this will become one of the most active of hospital divisions.

It is regrettable that with the excellent facilities afforded by the children's ward the department of pediatrics remains undeveloped. Many children who should be care for in this hospital go to other institutions for treatment, and little can be done to offset this tendency until better staff organization for the care of these young patients is maintained. The head of this service, appointed early in the year, has removed from the city and this has delayed progress, but in the near future this deficiency in organization will be rectified. Children will be offered more specialized treatment, which will result in more beds in this department being utilized.

We have been fortunate in having a group of excellent house officers in attendance at the hospital throughout the year, and we start the new year well equipped with capable and conscientious graduates and undergraduates in medicine to assist the staff in its work.

I regret to note at this time the death of Dr. Michael Sweeney of the courtesy staff. A man of ability and kindly disposition, he had a large general practice and brought many patients to the hospital for treatment.

Without the active help of the Board of Managers and of the Superintendent, much of the work of the staff would be futile,

and I am sure that I voice the wishes of all the physicians when I express to them our grateful appreciation for their co-operation during the past year.

Respectfully submitted,

WALTER M. SARGENT, M.D.

REPORT OF THE X-RAY DEPARTMENT, QUINCY CITY HOSPITAL

To the Superintendent and Board of Managers Quincy City Hospital, Quincy, Massachusetts.

The year 1931 was a very strenuous one for the X-ray department, due to the fact that we had to work under the handicap incidental to the completion of the new building. For a period of nine months, the presence of dirt, dust and water made the handling of patients very difficult, but thanks to the cooperation of the doctors, the nurses and the assistants in the laboratory, over five hundred more persons were X-rayed than in any previous year.

We were able to move into the new department during the middle of November, and then the work progressed in a manner much more satisfactory to all concerned.

The X-ray department is now equipped with the most modern machines available at this time. The type of work being turned out has made the installation of these machines well worth while, and the diagnosis of diseases of moving organs, such as the stomach, heart, lungs, etc., has been made much more accurate. It is now possible, for instance, to show the outline of the heart on an X-ray film at six feet distance, in a small fraction of a second exposure.

Two machines have been assembled for treatment work, one of low voltage for skin diseases, whooping cough, carbuncles, etc., and the other of high voltage for the treatment of cancer, sarcoma and other malignant diseases.

This last machine develops 200,000 peak volts, with 30 milliamperes of current, and overheating of the X-ray tube is prevented by a constant circulation of water through the target.

The ensemble in the therapeutic and radiographic departments completes a laboratory which compares favorably with any other in New England.

For the first time in seven years, we have not been faced with the necessity of changing the personnel of the department, as Miss Reed and Miss Flaherty are still on duty as X-ray technicians. Both these young women have shown a fine spirit of cooperation and enthusiasm, which I think is much appreciated by both the doctors and the patients.

Following is a detailed report of the cases seen in our laboratory during the year 1931.

X-Ray Report, 1931

Out patients	2,251
House patients	1,338
Treatments	153
Total	3,742

G. I. tract	359
C. U. tract	129
Gall bladders	327
Upper extremities	527
Lower extremities	681
Skulls	295
Noses	9
Jaws	14
Shoulders	196
Chests	410
Pelves	231
Spines	119
Teeth	69
Barium enemata	37
Ribs	74
Sinus cases	30
Mastoids	49
Pathology of sternum	4
Abdomen for foreign bodies	5
Pregnancies	17
Reduction of fractures under fluorscope	12
	3,589

Treatments

Whooping cough	96
Carbuncles	12
Cancer	38
Thymus	7
	153

With sincere appreciation of the hearty cooperation of the Administration and Staff during the past year, I am

Respectfully yours,

CHARLES WHELAN, M.D.

REPORT OF THE PATHOLOGICAL DEPARTMENT

To the Superintendent and Board of Managers
Quincy City Hospital, Quincy, Mass.:

The following is the report of the pathological and Clinical Laboratory for the year 1931.

During the past year the department again showed an increase in the amount of work done, as a total of 10,605 specimens were examined.

During the year the assistant technician, Miss Denise Ryan, resigned and was replaced by Miss Elinore Rich.

We are now occupying the new laboratory unit, which is a great improvement over the old location. The laboratory is now equipped to carry on the routine work of the hospital and also acts as a board of health station for all the practitioners of Quincy. The biological products of the state board of health are kept available at all hours in the refrigerator of the department.

The following is the detailed report of the specimens examined during the year 1931:—

Urinalyses	5,480
Renal function tests	20
Pathological surgical specimens	861
Autopsies	41
Blood cultures	23
Throat cultures	12
Miscellaneous cultures	73
Spinal fluid	42
Sputa	59
Autogenous vaccines	4
Exudates	2
Transudates	5
Bacteriological smears	80
Gastric contents and vomitus	10
Feces	26
Blood examinations:	
Hemoglobin estimations	459
Red blood counts	449
White blood counts	821
Differential counts	402
Platelet counts	6
Color indices	401
Bleeding times	9
Clotting times	23
Blood typing	30
Blood matching	41
Blood chemistry:	
Blood sugars	117
Non-protein-nitrogen	51
Basal metabolism estimations	46
Animal inoculations	6
Pregnancy tests	5
Foreign protein food test	1
Total number of examinations	10,605

Respectfully submitted,

FRANCIS P. McCARTHY, M.D., *Pathologist.*

REPORT OF THE DEPARTMENT OF PHYSICAL THERAPY

To the Superintendent and Board of Managers
Quincy City Hospital, Quincy, Massachusetts:

The following is a list of treatments given in the department during the year 1931:

January	556
February	443
March	442
April	387
May	432
June	311

July	461
August	418
September	566
October	488
November	699
December	497
Total	5,200

Due to new quarters and the purchase of new equipment, we now have a department equal, and in many ways superior, to the best Physical Therapy clinics.

We are now in a position to treat fifteen patients at one time.

Most of the problems incidental to the opening of the new department have been solved during an extremely difficult transition period.

We have included equipment suitable for the modern method of treating some of the most intractable chronic cases.

Although we gave 296 treatments more this year than last, yet the financial returns were less, owing to the establishment of a rate of one dollar per modality.

Included in our new equipment is a machine designed to induce artificial fever. It is especially valuable in treating cases of Dementia Paralytica, Parkinson's Disease, and Multiple Sclerosis.

The acquisition of the so-called "Radio Knife" is of special value in cases in which electro-surgery is indicated. We have been able to include this in our department.

Our Sinusoidal machines are the best manufactured, and these are being used daily on cases of paralysis of various types.

The galvanic machines are of the latest model, and are being used daily in the clinic.

The acquisition of a Van Houghton Ten Broek static machine adds much to our ability to aid those cases of partial ankylosis of various joints, as well as cases involving muscular congestion.

The eqnipment in heliotherapy is complete, including not only the best available Ultra Violet light machines, but also a carbon arc and three Radiant Lights. The two new Extremity Bakers can be widely used throughout the hospital.

A Schellberg apparatus is included in our Hydro-therapy room, to be used for all cases requiring colonic irrigations and therapy.

The Hydro-therapy equipment includes whirlpool baths, light bath, sitz and Perineal baths, tub and showers, with the best control table for administration of the Scotch Douche.

An adequate waiting room is a great comfort both to the patients and technicians.

Included is a consulting office that has been of great value, enabling the visiting physician to carry on consultations with other members of the staff, insuring the privacy to which the patient is entitled.

Separate dressing rooms are available for Hydro-therapy patients, with clothing lockers included.

There are ample accommodations in the cubicles for the care of Electro and Helio-therapy cases, together with suitable tables including new mattresses with rubberized covering.

Added to our apparatus are many electrodes designed for treating cases requiring highly specialized Electro-therapy procedures.

Respectfully submitted,

CLAUD L. PAYZANT, M.D.

REPORT OF THE HOSPITAL LIBRARY

The close of the year 1931 completes more than six years of library service at the Quincy City Hospital. The steady increase in book circulation seems to prove that a real need has been met.

Mrs. Zayma Connolly, the regular hosital librarian, was granted a year's leave of absence beginning September 1, 1930. Her place was most ably and efficiently filled by Miss Marion Davis. Mrs. Connolly resumed work in September, 1931.

The attractive library room in the hospital is much appreciated by the members of the hospital staff, who then make their selections at a designated hour or consult the librarian about special books, not in the hospital library, which they wish brought to them from the main or Thomas Crane Public Library.

I wish to thank the ladies of the Hospital Aid for their contributions of magazines. These are now received at the main library, where their bindings are re-enforced before they are released for circulation at the hospital.

During the year 1931 a total of 280 new books has been added to the hospital section. Of these 199 are adult fiction, 14 juvenile fiction, 31 adult non-fiction and 36 juvenile non-fiction.

The gain in circulation in 1931 over 1930 is 2,284 books. The circulation for the year 1931 was:

Adult fiction	8,378
Juvenile fiction	704
Adult non-fiction	1,172
Juvenile non-fiction	518
Total	10,772

Respectfully submitted,

ZAYMA CONNOLLY,
Hospital Librarian.

REPORT OF THE QUINCY HOSPITAL AID ASSOCIATION

To the Superintendent and Board of Managers

The Hospital Aid Association accomplished more sewing for the year 1931, with the generous aid of Mrs. Frank E. Mitchell and the Misses Hayward.

Our meetings were well attended and the usual "Teas" given the nurses.

Respectfully submitted,

MARTHA N. WOODRUFF.

REPORT OF THE WOLLASTON BRANCH HOSPITAL AID ASSOCIATION

Meetings are held the first Thursday of each month in the Community Room of the Library. With a fair attendance, much work is accomplished.

Thanksgiving we send flowers to the hospital. Our Christmas work consisted of candy bags for the trees in each ward.

During the winter we alternated with the Quincy Aid in giving two teas for the nurses in their new home.

The meetings are pleasant affairs, and we hope the little we do will help in a big way.

Respectfully,

MRS. FRANK S. CROFTS,
President.

LIST OF GRADUATES OF THE TRAINING SCHOOL

Total number of days lost	1,719
Number of days not paid for	462
Total number of days paid for	1,257
Number of hours of extra work without pay	5,096

Conclusion

The city has been very free from major crime during the year. A number of house breaks in the northern section of the city were cleared up by the arrest and conviction of the offenders and the recovery of most of the stolen property.

The Department suffered a distinct loss through the death of Patrolman Edward P. Cunniff, who was one of our most faithful and energetic young officers.

Through the courtesy and co-operation of the South Shore Amateur Radio Club, we have been enabled to conduct very valuable and instructive experiments in the use of radio as an aid to police work. Through the kindness of the members of this club, two radio transmitters were installed at the police station and tests made with receiving sets placed in police cars by the Sager Electrical Supply Co., the Graybar Co. and the Sparton Co. These receiving sets were installed in the cars by these companies without any expense to the city, and they have shown that the use of radio in police work is the greatest and most valuable step that

could be taken in combating crime. I sincerely hope that some way will be found in the near future to combine with some of our neighboring towns in the installation of radio for police work.

Through the cooperation of Chief Sands of the Fire Department and his wire chief, I have been enabled to add considerably to the number of flashing red lights used to get in touch with sergeants and patrolmen while on street duty by using for this purpose the red signal lights which mark the location of fire alarm boxes.

In conclusion I wish to thank His Honor Mayor McGrath, the members of the City Council, the District Attorney and his assistants, the justices and other officials of the District Court and the members of the Police Department for their assistance in carrying on the work of the Department.

To the members of the South Shore Amateur Radio Club I will only say that I appreciate what you have done for the Quincy Police Department and I hope that your efforts will bring results in the not too distant future.

Respectfully submitted,

ERNEST H. BISHOP,

Chief of Police.

REPORT OF FIRE DEPARTMENT

JANUARY 1, 1932.

HON. THOMAS J. MCGRATH, *Mayor, City of Quincy, Mass.*

Flood Light Truck Operation Report

Number of alarms 188

1000 watt light in use 52 hours and 10 minutes.
500 watt light in use 64 hours and thirty-five minutes.
350 watt light in use 23 hours and 55 minutes.
250 watt light in use 11 hours and 20 minutes.
There were 5,000 feet of wire used in the above operations.

Annual Report

During the year the Department suffered the loss by death of two members. Cornelius O'Connell and Martin Curry, both privates in the department, and their deaths are a distinct loss to the department.

For the year of 1931 we had a total number of alarms, 875. The total number of bell alarms was 375, sixty of which were false. We had two two alarm fires and two three alarm fires during the year. The number of alarms is below that of the previous year, due to the fact that members of the Department were sent out and burnt places that were fire hazards and also due to the detail of men sent out by the Public Works Department.

While the number of alarms has decreased, the loss has increased, and that is due to having several large buildings involved in fire. The Quincy Market, Rollerway, Johnson, Bradford Buildings and several houses had big fire losses.

We have in active service three White Pumping Engines, and as they have been in service for some time they are showing the signs of wear and will have to be replaced soon.

In my report of last year I requested that a new station be built at headquarters; as there are six pieces of motor apparatus

stationed there the strain on the main floor is very great and has been reinforced from time to time. The accommodations for the men are not adequate.

There has been added to the Department several all-service gas masks and each engine company has at least one mask assigned to it. There have also been two McCaa oxygen masks added to the Department, and these masks can be used under all conditions as they supply their own oxygen. There has been one oxygen mask assigned to the Flood Light truck and also two elevator jacks, acetylene torch, Bullard & Davis inhalator and also an electric saw, making this truck equipped for any emergency that may arise.

As some of the buildings and apartments are of such a height that our present ladders will not reach, I recommend the purchase of an aerial truck to be stationed at headquarters.

I recommend a captain and lieutenant in all stations where double companies are stationed, so that an officer will be in charge of ladder truck when answering an alarm. As the Wollaston Station is the only station with that assignment of officers, I recommend it for all stations.

Report of Fire Alarm Department

The fire alarm system has progressed considerably in the year of 1931. Good work has been accomplished in eliminating weak spots in the outside wiring and steady improvement has been made in alarm transmission. The Central Fire Alarm office has been remodeled and a new five trunk line switchboard has been installed, insuring at all time an open line for the reception of telephone alarms of fire. The office is now in charge of three highly efficient and capable fire alarm operators.

There have been added 5,500 feet of underground cable to the system, giving additional facilities to the Police and Fire Departments, as both departments are accommodated in one cable. Additional boxes have been added to the system, bringing the total number of street boxes to 225. The Telephone Company, Electric Light and Street Railway have replaced hundreds of poles in the city, making it necessary for the Fire Alarm Department to transfer fire alarm, police telegraph and traffic signal construction from old to new poles. The teletype system has been in operation about six months, with marked improvement in sending out alarms of fire that have been received on the telephone.

I wish to express my sincere thanks to His Honor the Mayor for the interest he has taken in the Department, the City Council, and to the officers and men of the Department for their cooperation and their splendid work.

Respectfully submitted,

WILLIAM J. SANDS,

Chief of Fire Department.

REPORT OF INSPECTOR OF BUILDINGS

JANUARY 1, 1932.

HONORABLE THOMAS J. MCGRATH, *Mayor of Quincy, Quincy, Mass.*

DEAR SIR:—I herewith submit the twenty-fifth annual report of the Building Department for the year ending December 31, 1931. It seems advisable, at the end of a quarter century, to take cognizance of the fact. During this period there have been 30,984 permits issued for new buildings, alterations, etc., which, under the Building Ordinance, are necessary. The estimated cost of the work done under these permits amounts, in the aggregate, to $73,158,349.13. It is estimated that these costs given on the applications filed are approximately 75 per cent of the actual cost of construction: under this standard the total amount of construction would total the sum of $100,000,000, which the City of Quincy has increased in the value of its buildings during this twenty-five-year period. The citizens, real estate interests and builders have cooperated with the Building Department, with the result that this construction, location and occupancy of the buildings in the city make a very creditable showing. These conditions also are very noticeable in the fire records for this period, which have been, owing to the fire walls, fire stopping, etc., as required in the Ordinance, been kept at a very nominal figure. The construction work of this year was, in a large measure, confined to the alteration and repairs of buildings already erected. The prospects for the coming year seem to be that there will be a moderate increase in new construction in the near future over that of the past two years.

During the year 1931 there have been erected

145	One-family dwellings	145
7	Two-family dwellings	14
1	Three-family dwelling	3
13	Four-family dwellings	52
1	Six-family dwellings	6
167		220

Twenty-five mercantile buildings and two manufacturing buildings were constructed during the year.

The Houghs Neck Congregational Church is now roofed in and about ready for finishing.

A new broadcasting tower was erected and one of the former towers was taken down in June of this year at the WNAC Station at Squantum. The new tower erected is the second one of this type ever erected.

In January the City of Quincy filed an application for a permit to build a four-room addition at the easterly end of the Adams School building; during the summer this was completed.

The Quincy Savings Bank constructed an additional story to their building in the square.

A small addition to the gymnasium at the Central Junior High was constructed this fall.

In September of this year the addition at the easterly side of the Quincy School containing eight additional class rooms was started and is now being finished and will be in readiness for occupancy soon after the spring vacation.

In October the N. Y., N. H. & H. R. R. Co. started the work of constructing a subway under the tracks at the Quincy Station. They also removed the train sheds and rearranged the roof of the station and intend to construct a new type of canopy in place of that removed.

TABULATIONS OF BUILDING OPERATIONS FOR 1931

Ward 1

Permits		Estimated Cost	
29	One family dwellings	$191,700 00	
1	Four family dwellings	10,000 00	
4	Cottages	6,900 00

10	Miscellaneous	23,875 00	
2	Elevators	11,200 00	
1459			$1,839,062 00

Statement

Cash received each month for permits issued from January 1, 1931, to December 31, 1931, and paid to the City Treasurer, is as follows:

January	$156 00	
February	79 00	
March	147 00	
April	208 00	
May	220 00	
June	205 50	
July	194 00	
August	181 50	
September	280 50	
October	220 00	
November	194 50	
December	100 00	
		$2,186 00

Respectfully submitted,

WARREN S. PARKER,
Inspector of Buildings.

REPORT OF DOCK AND WATERFRONT COMMISSIONER

JANUARY 1, 1932.

Received by water from January 1, 1931, to January 1, 1932:

For Quincy Point Power Station:	
Bituminous coal (gross tons)	73,014.63
Briquettes (gross tons)	401.6
Fuel Oil (bbls.)	46,012.30
For J. F. Sheppard & Sons Inc.	
Amount of coal of all kinds (tons) (Rail shipments not included.)	13,775
For City Fuel Company	
Amount of coal of all kinds (tons)	24,342
Amount of lumber received from January 1, 1931, to January 1, 1932.	
For Quincy Lumber Company	
Lumber (feet)	1,087,901
Laths (feet)	432,700
Approximate cost, $50,000.	
Total openings of draw at Fore River Bridge	2,041

Respectfully submitted,

EDWARD M. WIGHT,

Commissioner.

REPORT OF COMMISSIONER OF PUBLIC WORKS

HONORABLE THOMAS J. MCGRATH, *Mayor:*

The report of the Public Works Department for the year 1931 is hereby respectfully submitted.

FREDERICK E. TUPPER,
Commissioner of Public Works.

STREET PARKS

In addition to the maintenance of the street parks scheduled in the 1930 report, the Public Works Department, under the supervision of Mr. Andrew M. Stewart, superintendent of the Forestry Division, has installed the following list of gardens as listed below. There are fifty-six gardens throughout the city, which have been a source of esthetic pride, and at the same time been the means of furnishing employment.

Adams Shore Park
Adams Street at Furnace Brook Parkway, three beds
Atlantic Playground
Bellevue Road
Bird Street
Butler Road and Putnam Street
Billings Road at Calumet Street
City Hall
Edison Street
Elm Avenue, seven flower beds

Fort Hill Square
Franklin Street at High Street
Hancock Street at Fenno Street
Lafayette Street at Furnace Brook Parkway
Merrymount Park—Old-fashioned Garden
Merrymount Park—Rose Garden
Maypole Road at Samoset Avenue
Newport Avenue—Rock Garden
Piermont Street at Chatham Street
Quincy Shore Drive at Black's Creek
Quincy Shore Drive at Pilgrim Boulevard
Sea Street at Pilgrim Boulevard
Sea Street at rear of Police Station
Standish Avenue
Safford Park
Southern Artery at Hancock Street, two beds

Shrubs have been planted along the Southern Artery, Hancock Street to Black's Creek Bridge on Newport Avenue at Furnace Brook Parkway, and on Saville Street at Steps.

Grass areas at Bellevue Road and Standish Avenue, Elm Avenue, Russell Park and Robert Burns Memorial on Franklin Street, have been maintained.

In conjunction with the grading of the North Junior High School grounds, we planted twenty-five hundred shrubs, in accordance with plans as submitted by Herbert S. Kellaway, and thirty-six poplar trees were set out at the Houghs Neck Hose House.

We furnished and decorated Christmas trees at the Central Junior High School, North Junior High School, Beale Street opposite the Library, West Quincy at the Fire Station and Community Tree at Coddington Street. Also trees at City Hall grounds.

Our nursery on Penn Street contains about two thousand trees, raised from seedlings, also various shrubs.

Street trees for newly constructed streets and replacement trees have been installed as follows:

Belmont Street	8	Elms
Berry Street	17	Maples
Bayfield Road	2	Maples
Billings Road	8	Maples
Bellevue Road	22	Maples
Bromfield Street	6	Maples
Beach Street	1	Maple
Cedar Street	4	Maples
Conant Road	1	Maple
Calumet Street	19	Maples
Colby Road	1	Maple
Elliot Avenue	48	Maples
Elmwood Avenue	1	Maple
Elm Avenue	1	Maple
East Elm Avenue	1	Maple
Flynt Street	1	Maple
Greenleaf Street	1	Elm
Granger Street	28	Maples
Hamilton Street	3	Maples
Hughes Street	4	Maples
Highland Avenue	10	Maples
Highland Avenue	1	Elm

Lincoln Avenue	5 Maples
North Central Avenue	4 Maples
Norfolk Street	3 Maples
Newport Avenue	6 Maples
Pine Street	16 Maples
Phillips Street	4 Maples
Sea Street and Rock Island Road	4 Maples
Summit Avenue	1 Maple
South Central Avenue	24 Maples
Southern Artery	7 Elms
Virginia Road	5 Maples
Warren Avenue	10 Elms
Willow Avenue	50 Maples
Total	327 Trees

ANNUAL REPORT OF THE SEWER DIVISION OF THE PUBLIC WORKS DEPARTMENT

(For Financial Statement see Auditor's Report)

Sewer Construction

Four and eight-tenths miles of common sewers were built by the Sewer Department this year. About one-half of this mileage was constructed in Squantum making approximately five miles completed in this section.

In the spring of 1932 it is proposed to build two short connections of sewer from East Squantum Street to the new pumping station now under construction and to extend the main sewer about twelve hundred feet along the east shore to Huckins Avenue. Construction of sewers in the Squatum district has been a little more difficult than the average on account of the character of the soil. It is expected, however, that the system and pumping station will be ready to operate in July, 1932.

Particular Sewers

The number of house connections made to buildings for the year was 314 in wards as follows:

Ward 1	85	Ward 4	50
Ward 2	17	Ward 5	74
Ward 3	16	Ward 6	72

The total number of feet laid in these connections was 14,488.8 at a cost of $13,439.44, thus making the average cost per foot $.93.

Average length per connection ..... 46.0 feet

Average cost per connection $42.80

Buildings as follows:

Single houses	246	Garages	5
2-family houses	25	School	1
3-family houses	3	Comfort station	1
4 apartments and over	21	Clubhouse	1
Stores	6	Business	5

The number of sewer connections installed this year fell off considerably due primarily to the decline in building.

Maintenance

Cleaning and maintenance work on the system is being done at present and the remarkably open winter has facilitated this work.

Storm Drainage

Five and eight-tenths miles of storm drains were built this year, ranging in size from 10" to 60" in diameter. One of the most important pieces of work was the piping and covering of the brook between Wilson Avenue and Holbrook Road, Montclair. This relieved a very unsanitary and dangerous condition and will allow the proper grading of the Montclair Playground through which the brook flowed.

A tabulation of the amount of drainage work done according to length, size and character of material used may be found in the City Engineer's report.

A tabulation of Common and Particular Sewer Construction is included with this report.

Respectfully submitted,

FREDERICK E. TUPPER,
Commissioner of Public Works.

REPORT OF THE WATER DEPARTMENT

JANUARY 1, 1932.

HON. THOMAS J. MCGRATH, *Mayor, City of Quincy.*

DEAR SIR:—The following is the report of the Water Department for the year ending December 31, 1931.

Respectfully yours,

FREDERICK E. TUPPER,
Commissioner of Public Works.

WATER RATES

Total assessment for year 1931		$409,801 15
Amount collected	$373,280 89	
Amount rebated	1,026 46	
Amount uncollected	35,493 80	
		$409,801 15
Amount due from previous years		$32,104 95
Amount collected	$25,532 35	
Amount rebated	308 53	
Amount uncollected	6,264 07	
		$32,104 95

Service Connections and Repairs

Total assessment for year 1931	$17,672 70	
Due from previous years	5,241 52	
		$22,914 22
Amount collected	$16,506 61	
Amount rebated	676 96	
Amount uncollected	5,730 65	
		$22,914 22

For Statement of Appropriations see Auditor's Report.

SUMMARY OF STATISTICS

Population estimated on July 1, 1931	73,500
Total consumption of water in gallons for year 1931	1,921,291,200
Average daily consumption of water for year 1931 in gallons	5,263,811
Gallons per capita per day	71.6
Main Pipe	
Main pipe laid in year 1931 in feet	16,859
Main pipe in mileage	188.7
Fire Hydrants	
New hydrants installed in year 1931	36
Total number of hydrants now in use	1,747

Gate Valves

New gate valves installed in year 1931	69
Total number of valves now in use	3,013

Service Pipe

Service laid in year 1931 (feet)	9,890
Total length of service pipe now in use (feet)	773,628
Number of taps made in year 1931	212
Total number of service taps now in use	16,815

Meters

Number of new meters installed in year 1931	429
Total number of meters now in use	16,720
Per cent of services metered	99.5
Number of leaks in main pipe	17
Gallons of water used per tap per day	313
Water services renewed in year 1931	118
Water services repaired in year 1931	516
Water services cleaned out on poor pressure order	460
Water services abandoned and cut off at main	226
Meters taken out for test and repairs	1,228
Average length of service (feet)	46
Number of connections for fire supply only	51

Kind of pipe used in water services—Wrought iron cement lined and brass.

REPORT OF INSPECTOR OF WIRES

JANUARY 1st, 1932.

HON. THOMAS J. McGRATH, *Mayor of Quincy, Massachusetts.*

DEAR SIR:—I respectfully submit my annual report as Inspector of Wires for the year ending December 31, 1931.

Inspection in Buildings

The following specified schedule of electrical inspections made of lights and other appliances installed:

Number of permits issued in 1931	1,045
Fees received for the above	$1,170 00

Fees received from Jan. 1 to Dec. 31, 1931, inclusive:

January	$111 00	July	$66 00
February	63 00	August	103 00
March	61 00	September	91 00
April	86 00	October	118 00
May	212 00	November	122 00
June	72 00	December	65 00
			$1,170 00

Number of electricians doing work in 1931	169
Inspections made as per permits issued	1,276
Number of unfinished installations	52
Number of installations reinspected	101
Total inspections made during the year	1,377
Total amount of permits issued to the Quincy Electric Light & Power Co., to install service and electrical appliances	508

Number of New Buildings Wired

Single houses	155
Two apartment houses	19
Three apartment houses	2
Four apartment houses	22
Mercantile houses	18
Manufacturing	4
Garages	19
Miscellaneous	23
	262

Number of Old Buildings Wired

Single houses	66
Two apartment houses	19
Three apartment houses	4
Four apartment houses	10
Mercantile houses	10
Manufacturing	4
Garages	19
Miscellaneous	23
	155

Additional Wiring in Old Buildings

Single houses	370
Two apartment houses	26
Three apartment houses	8
Four apartment houses	22
Mercantile houses	174
Manufacturing	31
Garages	28
Miscellaneous	52
	711

There were a large number of electrical appliances installed in 250 buildings, requiring extensive alterations.

Ranges wired for	110
Refrigerators wired for	133
Number of outlets wired for	9,265
Oil burners wired for	319
Signs wired for	85
Lights wired for	12,131
Motors wired for	523
Fractional horsepower motors wired for	452

Respectfully submitted,

A. J. SOUDEN,
Inspector of Wires.

REPORT OF THE TREASURER OF WEYMOUTH FORE RIVER BRIDGE

FOR THE YEAR ENDING DECEMBER 31, 1931

Balance brought forward from 1930		$279 62
Receipts:		
City of Quincy assessments Nos. 247 to 254	$2,640 00	
Town of Weymouth, assessments Nos. 245 to 254	1,000 00

		$8,255 01
Balance carried forward		229 96
		$8,484 97

WM. L. FOSTER, *Treasurer.*

Hingham, December 31, 1931.

Trustees of Weymouth Fore River Bridge.

GENTLEMEN:—I have examined the accounts of William L. Foster, Treasurer of the Trustees of Weymouth Fore River Bridge, for the twelve months ending December 31, 1931, and I hereby certify that he has accounted for all receipts that have been reported.

I have also reconciled the bank account and find the balance of $229.96 to be correct.

Very truly yours,

J. IRVING BOTTING,
Auditor.

Hingham, Massachusetts
January 7, 1932

REPORT OF THE CITY PLANNING BOARD

To His Honor the Mayor and Members of the City Council:

GENTLEMEN:—During the past year the City of Quincy through its Mayor and City Council has accomplished several important public improvements, some of which have been previously recommended by this Board such as:

BEALE STREET WIDENING

The widening of Beale Street from Hancock Street to Newport Avenue and the construction of a new highway bridge over the railroad tracks has fulfilled a long desire and will develop into an excellent commercial center for the Wollaston District. This will help to care for the parking situation in this locality. Herewith are photographs of this improvement before and after construction.

GRADE CROSSING ELIMINATION

The work of eliminating the grade crossings in Quincy has actually started this year. This is an improvement that has been under discussion for the past thirty years. The work started consists of a subway under the tracks at Depot Street, the erection of a shelter station on the westerly side of the tracks, and the improving of the present station. At School Street a new highway bridge has been erected with an increase in height and width. Contractors' bids have been received for the construction of a new highway bridge at Water Street and a new station at Quincy Adams. This work will be started about March 1, 1932. In the progress of this work a drainage system will be installed that will take care of the surface water on Penn's Hill east of the railroad location.

PARKING

The purchase and development of the so-called Shikes and Long property on Granite Street is a step in the right direction, being located so it may be used for the latter extension of Franklin Street.

STREET WIDENING

This Board recommends and approves the widening of main thoroughfares and considers with approval the work that has been done this year by widening:

Adams Street from Whitwell Street to Common Street.
High Street from Franklin Street to the Braintree Line.
South Street from Scammell Street to Main Street.

COMFORT STATION

The City Council has given this matter considerable attention in the past and, although not having definitely decided on the location, they have made an appropriation this year for this much-desired improvement.

Zoning

The much discussed Zoning Ordinance for the City of Quincy was taken up very thoroughly by the 1931 City Council. An ordinance was prepared and submitted to the people by referendum, but was again defeated.

We do not feel that this is the final disposition of Zoning for Quincy.

The Board wishes at this time to congratulate the City Forester, Andrew Stewart, and his department for the splendid work they have done in the construction of the various beautiful and artistic flower beds all over the City. There are 62 of these plots located in many sections.

Metropolitan District Commission

The Metropolitan District Commission has considered many of the recommendations of this Board and have started the construction of the Redman Farms Golf Course, of which nine holes will be ready for play in the Spring. The contractors' bids for the Clubhouse have been received, and this will also be built by Spring; an illustration of this building is submitted herewith.

Administration Road has been resurfaced to Randolph Avenue and the name changed to Chickatabot Road. Furnace Brook Parkway has been resurfaced from Adams Street to Quarry Street and from Copeland Street to Willard Street. The name of Purgatory Road has been changed to Wood Road. The Rest House at St. Moritz has been constructed and is a very attractive building. This will be ready for this year's winter sports.

The Sewer Division of this Commission have started the construction of the new Pumping Station at Squantum. This will be completed in the early part of 1932 and will make it possible for the whole of Squantum to be connected with sewer. The City has been installing laterals in contemplation of this construction for the past four years.

Division of Metropolitan Planning

The Division of Metropolitan Planning, of which our Chairman is a member, is recommending several highway extensions for the coming year which are: the extension of the present Reedsdale Road in Milton to the Furnace Brook Parkway at Bunker Hill Lane, thence to the Water Street Grade Crossing and thence to Washington Street at Dee Road. Their recommendation calls for a traffic circle at this end. The extension of the Southern Artery from River Street to Washington Street at Dee Road by the way of the Town River; this terminates at the traffic circle. The extension of the Quincy Shore Boulevard from East Squantum Street to the Old Colony Parkway by the way of the Victory Bridge at Squantum.

All three of these have been recommended previously by this Board and deserve your support.

A plan showing these recommendations is on file in the office of the City Engineer.

Fore River Bridge

The State Department of Public Works have reported their study on this project and recommended the new bridge to be 60 feet in width and 40 feet above high water. This would eliminate about 80 per cent of the present openings. As this is a State highway and used for access to the South Shore we feel the Commonwealth

of Massachusetts should share the greater part of the expense for this improvement.

Recommendations

We are submitting herewith a plan showing the cut-off from the Southern Artery, from Brackett Street to Sea Street, opposite the Quincy Shore Boulevard. We feel that this will help through traffic and eliminate a congestion now existing on Sea Street at the Police Station.

We further recommend the extension of Franklin Street and agreeing upon a desirable location for the Comfort Station.

The development of Neponset River should be so governed as to allow for the extension of the Neponset River Parkway as recommended by this Board in 1930. The granting of a permit for oil storage on this location should be restricted to allow for this extension. This would separate the industrial development from the residential district besides helping to eliminate the congestion at the Neponset Bridge.

In the Spring we were able to procure and distribute a supply of copies from a Chicago technical journal of an illustrated article by Herbert J. Kellaway on Faxon Field. This is a beautiful spot in the heart of the City and is progressing into a permanent development under the continued donations by its donor, Mr. Henry M. Faxon.

Plans are progressing rapidly on the new Quincy Post Office. The Y. M. C. A. is considering the erection of a new building on Upland Road, opposite the Quincy Station. A new Eventide Home is also under consideration. These all will be attractive buildings for our City.

This Board was represented by its Chairman at the Annual Conference of the Massachusetts Federation of Planning Boards called by Governor Ely at Lowell and wishes to express its appreciation of the courtesies and hospitality extended by the officials of that City.

The Chairman was appointed Chairman of the Civics Committee of the Quincy Council of Boy Scouts of America and the Board was included in the completion of that Committee.

We were very fortunate in having Mr. Edward J. B. Desmond appointed to the Board to fill the vacancy of Mr. Joseph Angelo, who resigned after being appointed on the Park Board. Mr. James E. Geary was reappointed by the Mayor for five years.

Through the courtesy of the State Department of Public Works we have been able to have on display maps showing the various State Highways that were under construction each month and the proposed detours.

The December issue shows the entire layout of State Highways that will be kept open by their department during the Winter.

We are including in this report a résumé of the study of the Hull Highway which we distributed this year to various State, Federal and local officials. The original complete report bound in two volumes with maps, tabulations and photographs is on file in the Northeastern University Library in the Boston Y. M. C. A. Building for inspection. There are over 48 miles of waterfront in this area, including Quincy and the four adjoining towns.

We are also including a photograph of the latest broadcasting tower at Station WAAB, Squantum. This is the first of its kind in the world and has an aviation beacon at its top which is 430 feet above the ground.

The statistics of Quincy were taken from the Commonwealth of Massachusetts, Division of Metropolitan Planning, Statistics of the Boston Metropolitan District, correct to January 1, 1931.

Respectfully submitted,

WILSON MARSH, *Chairman*
JAMES E. W. GEARY, *Vice Chairman*

HULL HIGHWAY STUDY

The City Planning Board of Quincy has recommended a highway from Houghs Neck to Hull extending from Nut Island at Houghs Neck across to Peddock's Island to Hull at Pemberton Point. They feel that this highway would fulfill a much needed traffic artery to and from Hull and Nantasket Beach. This highway could be constructed so as to form a storage basin of Hingham Bay, thereby insuring a water level and eliminating the now objectionable marsh and flats at low water. The entrance to Weymouth Fore River and the Back River could be had by the construction of ar ample lock.

The Board feels that this would be an improvement all along the shores of Quincy, Weymouth and Hingham.

This matter has attracted the attention of the Engineering Department of Northeastern University, and we are including a report made by Samuel Zeitlen and Robert Henry Verner describing their views on this matter. They having made quite a complete report, we are publishing a condensed review for your careful con-

sideration. Their original report is on file at this office and consists of the following:

1. a. Preface.
   b. Table of Contents.
   c. Table of Illustrations and Plans.
   d. Introduction.
2. Prefatory Investigation.
3. Hingham Bay.
4. Riparian Municipalities.
5. Traffic Study.
6. History of Various Proposals.
7. Harbor Development.
8. Recreational Development.
9. Harbor Works and Highway.
10. Development Proposals.
11. Conclusions.

RÉSUMÉ

INVESTIGATION OF THE PRACTICABILITY OF CONSTRUCTING A ROADWAY FROM HOUGH'S NECK TO HULL

There is an increasingly urgent need for further diversification of traffic at present passing through the city limits of Quincy. Much has already been done in that direction—but the present provisions are still inadequate. Of some of the proposed changes under consideration, the roadway across Peddock's Island between Houghs Neck and Hull attracts merited attention because of its unique features.

A principal characteristic of Hingham Bay is that it is relatively shallow in view of its considerable area of fourteen square miles. At low tide there are large areas of exposed flats and shallows which distinctly hinder the use of the bay for bathing and boating, as well as more commercial activities. It is proposed to maintain the surface of the bay at an elevation of eight feet or more above mean low water by means of a fill over both channels between Peddock's Island and the mainland. The dyke would also carry the roadway and a parking area.

If the full development of the bay is to be realized, the maintenance of a high water level is necessary. The cost of dredging any areas except narrow ship channels would be far in excess of the advantages gained. Moreover, unless there is a change in existing conditions, residents along the shore, as well as the thousands of visitors from nearby and distant localities, must be content with mud flats and shallow water a considerable proportion of the summer days, when high water would be of the greatest advantage for recreational purposes.

Maintenance of the water level would create a huge basin readily developed for the use of the public as a playground, as well as for such other purposes as the growth of this region will warrant. A circuit route along the shores of the bay would also aid immensely in reducing the burden carried by existing roadways, as a diversification process would take place. A body of salt water of such size would be a magnet not only for tourists, but for those seeking a location for home-building. A consequent growth in population and industry along its shores can be predicted as a result of transmutation of Hingham Bay to a tidal basin; a simplification of traffic problems will follow the construction of the road from Houghs Neck to Hull.

One of the most potent arguments for carriage of the roadway to and from Peddock's Island by means of a dyke is the ease by which the intervening channels can be filled at low cost. Peddock's Island has at both extremities hummocks of about eighty feet in height, composed of sand and gravel. These can be easily levelled to provide large quantities of excellent filling material. Stone blocks and fragments are obtainable for fill at little more than the cost of transportation from various granite quarries in Quincy. The task of making Hingham Bay a landlocked basin is then comparatively simple. The problem of maintaining communication with the outer waters is more difficult, but is entirely feasible of solution.

There are four elements in the problem of communication to consider: (a) The passage of ships, (b) the passage of small craft, (c) the admission of water, (d) the disposition of surplus water. For the first it would be necessary to build a large ship lock of adjustable length, while boat locks would suffice for the smaller vessels. To provide for the entrance of water, sluices can be located on the eastward side of the lock, which would be constructed through a low spot in Peddock's Island. The lock sluiceways can be used as outlets for surplus water. A continual circulation entirely adequate to maintain sufficient purity of the water can thus be assured.

The ship lock is one of the most interesting features in the project as proposed. This is, in effect, a canal about one thousand feet long, in which the height of water is adjustable on the closure of two of its three gates. These gates are of the rolling type, capable of withstanding pressure on either side. Their use makes a drawbridge across the lock unnecessary, as one gate can be readily designed to carry the roadway. The width of the lock is 110 feet, and the length is dependent on which two of the three gates are closed, being either 450, 535, or 1,000 feet.

The inlet sluices and boat locks form a minor part in the program of construction. About ten 8 by 12 sluices located in Hull Gut or other suitable sites would be sufficient to admit the requisite water. The boat locks would be of the tidal type, requiring a minimum cost of construction and upkeep. The larger vessels, such as yachts, could make use of the ship lock.

Summarizing the effects and advantages of making Hingham Bay a tidal basin, it would be a stimulant to trade, industry and residential development by reason of the ease of navigation to all parts of the bay at all times by commerce and pleasure vessels and because of the greater capacity for enjoyment by the public of its recreational facilities. The creation of the shore route to Hull and Nantasket Beach would relieve traffic conditions in Quincy and other towns on the present Nantasket routes. As a forward step in municipal planning and development the Quincy to Hull highway merits the study of the public-spirited citizen, too prone to dismiss it as impractical and visionary.

REPORT OF BOARD OF SURVEY

JANUARY 1, 1932.

To His Honor the Mayor and Members of the City Council.

GENTLEMEN:—The members of the Board of Survey respectfully submit herewith its seventeenth annual report for the year ending December 31, 1931.

The Board organized early in the year and elected Mr. George H. Newcomb chairman of the Board.

There was very little new development in real estate during the year requiring approval by the Board of Survey.

The trustees of the Sailors' Home Property on Fenno Street laid out a portion of that estate, but are holding out the larger portion until a later date. This eventually will be developed into house lots.

Mr. Ranay Saulnier laid out the former Goucher Estate on Adams Street and proceeded to build about ten houses. This property was laid out to fit in with the development of the Forbes Hill Estate which is adjoining.

The Board has continued its practice of the past year in visiting each property petitioned for previous to the Public Hearing.

Public hearings were held on the following petitions:

March 24, 1931, on Petition of Trustees of the Sailors Home for layout of streets off Fenno Street. Tentative approval was granted on the design.

August 20, 1931, on Petition of Ranay Saulnier for layout of streets on the Goucher property on Adams Street. Tentative approval was granted on the design.

Final approval was given on the following streets:

Hoover Avenue—petitioned by Hilda Almquist, off Franklin Street, Ward 3, approved August 20, 1931.

Theresa Road—petitioned by Ranay Saulnier, off Adams Street, Ward 5, approved September 23, 1931.

Myopia Road—petitioned by Ranay Saulnier, off Theresa Road, Ward 5, approved September 23, 1931.

The Board wishes to express its appreciation for the cooperation of the various departments of the City who are instrumental in making their work effective.

Respectfully submitted,

GEORGE H. NEWCOMB, *Chairman,*
WILLIAM A. CRESSWELL
ARTHUR CARUSO

WALLACE S. CARSON, *Clerk.*

ANNUAL REPORT OF SOLICITOR

March 23, 1932

Hon. Thomas J. McGrath, *Mayor of Quincy:*

Dear Sir:—The work of my office during the year 1931 has been routine, in advising the Mayor, City Council and heads of departments; and assuming charge and supervision of claims against the City and actions pending in court wherein the City is involved.

Respectfully submitted,

J. J. McANARNEY,
City Solicitor.

REPORT OF ENGINEERING DEPARTMENT

To His Honor the Mayor and Members of the City Council.

GENTLEMEN:—I herewith respectfully submit the thirty-second annual report of the Engineering Department for the year ending December 31, 1931.

The majority of the work in this Department is done for construction departments in preparation for and during construction of the various municipal projects, but several other departments call on us for information during the course of the year.

They each have their individual requests which I shall not endeavor to itemize in this report.

City Solicitor

The City Solicitor calls on us for plans and surveys to be prepared for any Court actions which are filed against the City.

Plans and descriptions of lands taken by the City for street widenings, parking spaces, playgrounds, or any other municipal purpose from which the proper deeds are prepared and passed.

Reports of all accidents which are filed with the City Clerk are received and investigated immediately and information prepared in contemplation of Court action by the individual inconvenienced.

City Council

The City Council demands are increasing every year as there are so many projects that come before them.

This Department prepared all plans for public hearings on acceptance of streets, parking spaces and playgrounds which are held by the Council.

Plans were prepared for one hundred hearings of this nature with estimates as to the cost of the same during the year.

This year the Council sponsored a Zoning Ordinance which was prepared by their Committee and all plans were prepared by this Department. All hearings were attended by the City Engineer.

The City Engineer was required to attend all Council meetings and Finance Committee meetings to give whatever information was desired on the costs and merits of the various projects brought before them.

All orders pertaining to the acceptance of streets, land takings. assessments of betterments, and construction of sidewalks are prepared by this Department before being given consideration by the Council.

City Clerk

The City Clerk was furnished with all plans and orders for the acceptance of streets and land takings for parking spaces, playgrounds, and street widenings. Also all orders for the construction of sidewalks and the assessment of all betterments for recording in the Norfolk Registry of Deeds.

Tax Collector

The Tax Collector made 404 requests for information on betterments outstanding on streets or sidewalks during the year. He

receives requests from private individuals who are checking liens on properties which are referred to this Department for the proper information.

Description of about 4,500 parcels of land were prepared for the Tax Collector in contemplation of the Tax Sale for 1930 taxes.

Owing to the increase of properties being put through the Land Court this work is increasing each year.

Assessors

Plans made up for the Assessors Department showing the various parcels assessed in the City, together with the owners, buildings, areas, and plot designations, are prepared and kept up by this Department.

The Building Inspector notifies this Department of each permit which is issued for any buildings. When they are constructed they are located and placed on these plans.

The Assessors receive a copy of each transfer of property from the Registry of Deeds which are turned over to this Department about January, and the names and subdivisions are placed on these plans.

This work could be better taken care of and more thoroughly checked if these transfers were placed in this Department when they are received by the Assessors instead of creating an accumulation of nine to ten months, which are supposed to be completed for assessing purposes on April first.

The continued changes of owners, making erasures necessary, cause the plans to be replaced often. There were 100 new plans drawn up during the year.

Park Department

The Park Commissioners in preparation for the baseball season request our laying out the diamonds at each playground, and later in the season lay out football playing fields.

The Dennis O'Neil Playground at Hollis Avenue was graded this year so that it was put into use. The settlement has not all been taken up as yet, so that it will require additional grading from time to time.

Andrew Stewart has kept up his flower beds and beauty spots and has added a few more in various parts of the City. These were laid out by this Department.

A playground was laid out on Palmer Street on land owned by the City of Quincy and required very little land to be taken from the adjoining abutters. This is on the Town River and is in an ideal location for the children.

The Ward Two Playground was partly graded during the year, but there is considerable material to be removed before this will be available for the children.

Cemetery Department

The Mount Wollaston Cemetery is the only available area we have at this time for burial purposes. The Cemetery Committee of the City Council have been studying new locations for future growth, but up to the present time have not recommended any additional area.

Grading is being done on the remaining seven acres of available area at Mount Wollaston. Several sections have been lotted up during the year by this Department.

School Department

The addition of the east wing to the North Junior High School was completed during this year, which was put in use at the opening of the Fall session. The grounds, which have been unfinished since 1926, were graded and driveways, lawns and shrubs constructed, making this school yard one of the beauty spots of North Quincy. This work was done by the Highway Department.

An addition to the Central Junior High School was constructed, which consisted of locker rooms for the gymnasium. The grading around this addition has not been completed.

An addition to the Quincy School is now under construction and will be completed in the Spring of 1932.

The addition to the Adams School was completed and is now being used. The grounds about this addition have been graded.

The Wollaston school yard has been resurfaced with a hard surface this year, and also the Gridley Bryant School.

Fences have been erected around several of the school playgrounds during the year.

Lines and grades for all of this work have been furnished by this Department.

Building Department

This Department has practically become a part of the Building Department during the past few years.

All applications for new construction are turned over to this office, and the City Engineer views the location and fixes the grade for the contemplated building before the permit is granted.

This has been working out very satisfactorily, and is eliminating the construction of buildings where it is impossible to drain the cellars.

This also keeps the general alignment of houses and the proper height in conformity with the existing structures.

During the year there were 433 of these applications referred to this Department and personally cared for by the City Engineer. The charge for this work has been $2.00 for each application, making a total of $866.00, which was turned over to the Treasurer as receipts from this Department.

October was the largest month, with 56 applications.

This work has been of material benefit to the builder and also will be to the City in future years when the private ways are accepted.

Lines and Grades

During the year we are called upon to give lines and grades on accepted streets by the property owners. These requests are generally made when the owner is contemplating improving his property. The lot corners are not furnished by this Department upon these requests.

If this service was not restricted to accepted streets it would require a survey party almost full time to do this work. About one hundred requests were taken care of during the year.

Sewers

The main sewers that are installed are laid out by this Department. All lines and grades were furnished on 4.838 miles of sewer during the year. For itemized list see schedule attached.

Sewers were installed in all streets which were accepted during the year which had not previously been done.

The installation of sewers in Squantum was continued and

Montclair Brook Before Installing 60″ Reenforced Concrete Pipe

Montclair Brook—Installing 60″ Reenforced Concrete Pipe

about two miles were constructed. The low level main was continued from Dorchester Street around the shore and will be completed during the early part of 1932.

The Metropolitan Sewer Division awarded a contract for the construction of the Pumping Station required in this section and the construction is practically completed. When this is completed it will enable us to connect about five miles of sewer which is now in place.

The sewer on Edgewood Circle was relaid on account of settlement and required piles forty-five feet in length for a bearing. Several of the most recent developments were taken care of this year.

All sewers were constructed by the Sewer Department of the City of Quincy.

The total of main sewer now in place in the City is 136.665 miles.

Surface Drains

The installation of surface drainage was continued as in the past, and 5.84 miles of various sizes were installed during the year.

The main drains are gradually being improved, and this year the Montclair Brook from Wilson Avenue to Holbrook Road was completed by the installation of a 60" reinforced concrete pipe. When the culverts under Holbrook Road and West Squantum Street are constructed this main drain will have been lowered about two feet.

The 24" Akron pipe which was installed in Faxon Field in 1924 was found to be badly crushed, so this was replaced by a 24" metal pipe for a distance of 1,637 feet. This pipe was broken by the fill which was placed upon it since its installation.

An old stone culvert was replaced with reinforced concrete pipe on School Street at Granite Street, which relieved a poor condition which existed.

A stone culvert on Hancock Street at the Atlantic Fire Station was also replaced with a 36" reinforced concrete pipe. The settlement at this location caused the collapse of the culvert and the new pipe was installed upon a pile foundation. This installation was let out by contract to E. C. Sargent, contractor.

A drain was installed on Franklin Street from Kendrick Avenue to Conrad Street and connected temporarily to the Dysart Street drain. This will be relieved by the installation of a 48" drain from the Town Brook over the railroad location to Quincy Adams Station and thence through Presidents Avenue and Franklin Street.

A portion of this 48" drain was installed by the construction of a new bridge on School Street, which is part of the grade crossing elimination and it is expected will be completed in 1932. This work was done by the Tredennick Billings Company of Boston.

All other surface drains were constructed by the Sewer Department of the City of Quincy.

The use of plain and reinforced concrete pipe was continued on all surface drains.

There were 286 catch basins installed during the year, making a total of 3,513 now installed in the City.

The work of compiling plans of drains installed in the past was continued and some of these should be completed during the winter months.

For itemized list of drains see schedule attached.

Accepted Streets

There were accepted during the year in various parts of the City twenty-six streets, making a total length of 3.05 miles.

These streets were all accepted under the Betterment Act and all but seven were completed, together with several streets which were accepted in 1930. For itemized list see Accepted Streets Built 1931 attached.

All construction was done by the highway Department of the City of Quincy.

All plans were made and lines and grades given for construction by this Department.

For itemized list of 1931 Streets Accepted see schedule attached.

Street Widenings

During the year the City laid out seven street widenings.

The most important being the widening of Beale Street from Hancock Street to Newport Avenue. This greatly improved the business section of Wollaston and required the construction of a new highway bridge over the railroad tracks at Newport Avenue. This street was widened from 50 feet in width to 55 and 65 feet wide. The widening was done by the Highway Department of the City of Quincy and the bridge was let out by contract to Thomas Mulcare, Inc., of Boston. This work was done very rapidly so that this business section would not be inconvenienced any more than was possible.

The electric light poles and wires were removed and installed underground, with new ornamental light standards for street lighting. This was done through the cooperation of the Quincy Electric Light and Power Company.

I am submitting herewith photographs of Beale Street before and after construction.

South Walnut Street at Sumner Street was widened on account of the construction of a new block of stores. This insured a safer approach for the public.

For itemized list of Street Widenings see schedule attached.

Rebuilt Streets

There were sixteen streets rebuilt during the year in various parts of the City, amounting to a total of 3.85 miles. Some of these were just surfaced on the top and others were of macadam.

The rebuilding of Highland Avenue will help to relieve the traffic on Safford Street from Beale Street to Wilson Avenue.

High Street completes a main thoroughfare to Braintree.

Quincy Avenue was a much needed improvement from Water Street to School Street.

East Squantum Street from Huckins Avenue to Sonoma Road greatly improves the approach to the new development of the Crabtree estates.

For itemized list of Rebuilt Streets see schedule attached.

Granolithic Sidewalks

There were 3.44 miles of granolithic sidewalks constructed on twenty various streets.

There was also 1,622.40 feet of concrete curbing installed.

The contract for these sidewalks was split between Henry Lavelle and E. C. Sargent, who constructed the same between July and November.

Beale Street—Before Widening Newport Avenue Looking East

Beale Street—After Widening Newport Avenue looking East

Beale Street—After Widening Hancock Street Looking West

All orders and estimates were prepared for the Council and betterments figured by this Department.

Lines and grades were also given to the contractors.

The usual amount of grading and construction of retaining walls was necessary on the most of these walks. This is caused by the owners grading their properties without getting the proposed grade of the street from this Department.

The total amount spent on this work was $39,084.24.

For itemized list see Granolithic Sidewalk Schedule attached.

Asphalt Sidewalks

During the year there were 8.24 miles of this type of sidewalk installed in various sections of the City.

These walks are constructed by the Highway Department of the City of Quincy.

This year the majority of these walks were constructed with amiesite.

For itemized list see Asphalt Sidewalks Schedule attached.

Zoning

This matter was carried over from the 1930 Council and further public hearings were held.

The City Council, after several amendments, passed the order.

The public secured petitions for a referendum and filed the same with the City Clerk, whereupon it was found that the petitions were not filed within the given time limit. This caused quite a unique position, as this ruling affected the Zoning Ordinance which was passed in 1926 and was voted down by a special election after petitions were filed calling for a referendum, although they were not filed within the proper time limit.

This made it that the 1926 Zoning Ordinance was in force but had not been enforced, and several buildings had been built in the interim contrary to the ordinance.

To eliminate this difficulty the Council rescinded the 1926 and 1930 Zoning Ordinances and presented the 1931 Ordinance to the people at a special election on September 1, 1931, whereupon it was defeated.

The City now has no Zoning Ordinance.

Plans and descriptions for this work was furnished by this Department.

Grade Crossing Elimination

The elimination of the Grade Crossings in Quincy was very energetically urged by the Mayor and the City Solicitor during the early part of the year.

A revision of the 1918 decree was agreed upon by the New York, New Haven & Hartford Railroad and the Commonwealth of Massachusetts, and also a revision of costs due to a new bill being passed by the General Court.

Contractors were invited to bid on the changes at School Street and the Quincy Station, and a contract was awarded to the Tredennick Billings Company of Boston for this work.

A new bridge was constructed at School Street with the elevation of the street increased about five feet. The bridge was open for travel, but the approaches were not permanently completed, on December 18, 1931.

Work of relocating the tracks and placing platforms and constructing a subway at the Quincy Station was carried on and should be completed in the early Spring.

The roof of the Quincy Station was lowered about 4½ feet, thereby improving the appearance of the Station.

During November and December bids were received for the completion of this work at Granite Street and Water Street, but although the prices were much lower than the Engineer's estimates, the contract has not as yet been awarded. This, we hope, will be done in the Spring, so this work may be completed during 1932.

When this is completed Water Street will be raised to go over the railroad and the tracks will be lowered, with a new station at Quincy Adams and different approaches on Federal Avenue and Liberty Street.

This will eliminate the most hazardous grade cross in Quincy.

I wish to express my appreciation for the cooperation which has been extended to me during the year by His Honor the Mayor, the members of the City Council, City officials and the employees of this Department.

Respectfully submitted,

WALLACE S. CARSON,
City Engineer.

During the year ending December 31, 1931, there were 491 burials in Mount Wollaston Cemetery.

The sum of $12,265.00 was added to the Perpetual Care Fund. A detailed statement of the investment will be found in the City Treasurer's report.

Very truly yours,

W. W. MITCHELL,
Manager of Public Burial Places.

REPORT OF SEALER OF WEIGHTS AND MEASURES

JANUARY 1, 1932.

HON. THOMAS J. MCGRATH, *Mayor of Quincy, Mass.*

DEAR SIR:—I hereby submit the annual report of the department, Sealer of Weights and Measures for the year ending December 31, 1931.

Being cared for in Pondville Hospital	4
Being cared for in private hospitals	21

The past year again has shown a great increase in relief to the needy of this city—a great deal more so than previous years—this has been due, as heretofore, to unemployment and sickness. Our City Infirmary is filled to its utmost capacity, and we are boarding a great many cases in private boarding homes.

The unemployment situation has become acute, many companies refusing to employ men over 45 years of age, also requiring them to pass a very strict physical examination; this has caused a great many men to be out of employment, who would in years gone by have been self-supporting.

The reduction in wages has brought hardships to a great many people with large families. We have a great many instances where

a man and a wife and eight children is receiving only $16.00 a week, with holidays and sick days out, and it is absolutely impossible for that family to get along, and this department has been obliged to aid such cases.

In March, the department was moved to more spacious quarters, thus enabling each and every one to perform their duties more efficiently. The law of Old Age Assistance became effective July 1st, and with the demands for Old Age Assistance and also increased demands for other outside aid, each and every one in this department has been worked a great deal overtime.

The number of those eligible for Old Age Assistance has exceeded beyond any of the estimates that have been made. They have not only exceeded the expectations of this city, but over the State.

At Thanksgiving, this department distributed over 150 baskets, and at Christmas-time over 300, being assisted by volunteer workers, both men and women, from different parts of the city, also the Family Welfare Society.

The usual improvements have been made at the City Infirmary; new linoleum in the kitchen and the laundry, also a new refrigeration box with refrigeration which is working very satisfactorily.

I again wish to say that it is the department's sincere desire to see that the activities of the department are so shaped that the greatest good may be done for those needing its service, and yet at the same time not to lose sight of the fact that economy in the expenditure of the taxpayers' money must be practised.

I wish at this time to thank all those affiliated with me in the work of the Welfare Department, His Honor, the Mayor, the Council, the officials of all of the departments and all others in authority.

Respectfully submitted by

CHANNING T. FURNALD,
Commissioner of Public Welfare.

ANNUAL REPORT OF THE PARK DEPARTMENT

To the Honorable Mayor, THOMAS J. MCGRATH.

DEAR SIR: We have the honor of submitting to you the forty-third annual report of the Park Department, which is accompanied by the report of the Supervisor of Playgrounds.

The year was the most successful in the history of this Board. The various activities under the supervision of this department all have shown a substantial growth. The Recreation Department should have special mention. It has our constant interest as it is through the work of the Recreation Department that the park system is becoming better known and ever more useful to all classes of our citizens.

The use of public parks and playgrounds was formerly confined to the summer season; but now the department is an all the year round proposition and the recreation facilities of the parks are developing for fall and winter activities as well as for summer, as was formerly the case. The recreation permits issued by the members of the Board show a noticeable increase in the number of people taking advantage of the many facilities which the city offers through this department.

Much more than ever before has that universally implanted desire of every human soul for scenic beauty become manifest during the past year. It is this self-same desire for the beautiful in nature that prompts great numbers of people to surround their homes with flowers and shrubbery; that induces them to leave the city and enjoy the countryside and forests; and it is this inborn craving and desire of every human being to enjoy nature's beauty and imbibe with it the inspiration and elevation that goes with it. This statement of the above mentioned fact has been the moving thought in everything this Board has undertaken during the past year.

We have tried to make our parks just as beautiful as possible. By so doing we have tried to bring the beauties of nature into the city. Man's happiness does not consist in merely eating and drinking, and in the fruitless possession of earthly goods. Man's real happiness consists in furnishing food to those mental appetites that can be gratified without impairing the welfare of his neighbors. Looking at our work from this angle, boulevards, parks, fine trees, shrubbery and flowers are not a luxury, but become a necessity in the work of helping along our citizens' general happiness. Therefore, as said in the beginning, it is a pleasure to report and to work on this Board, appreciating Your Honor's and our citizens' cooperation in our work.

Our Board has given special attention during the past year to those parks which for years have delighted the eye of the public and which have been the breathing spots, the lungs of our city, so to speak. No effort has been spared to make them beautiful. Flowers, planted by the hands of Forestry Superintendent Andrew Stewart and Foreman Julio Cardarelli have indeed been much appreciated by our citizens.

Many a fine compliment has been paid your administration by people from all walks of life, which fact has been an encouragement to this Board, and which has furnished ample proof for the assumption that our citizens, as a body, are such as do appreciate things beautiful in life, and delight in seeing nature in her festive attire, clothed by the hands of an All-wise Creator.

In all parks much attention was paid to recreational facilities, such as tennis courts, baseball diamonds, and football fields. Although rather handicapped at times by lack of funds, our Board has been trying to provide as many places for outdoor exercise as it possibly could. Naturally, we have tried not to confine outdoor exercise to the summer months only; during the winter months we provided opportunity for skating activities at Manet Lake, Sailors' Home Pond, Butler's Pond, St. Moritz, and Abbott's Ice House.

For the past eight years this Board and the Boards preceding have recommended a bowling green for the older citizens of our city who were interested in this old country sport. This year, through your efforts and the cooperation of our City Council, this was made possible and will be ready for use this spring. In spite of any criticism you may get from those who have no interest in this sport, your Board and a large number of citizens are indeed grateful.

We have arranged the report of the various recreation centers in the wards where they are located with the work accomplished on each, and our recommendations to assist each ward councillor to better familiarize himself with their needs.

In closing, the Board is ever mindful of Your Honor's splendid cooperation. It has been a pleasure to serve you as a Park Board. Our success in our accomplishments are in no small measure due to your faith in us.

Ward I—Houghs Neck

This is one of the most ideal playgrounds in the city, with ample space for all sports. Interest was keen in all activities during the summer and fall. The team from this playground won the championship in slugball. Baseball and football were the leading sports. The infield was graded and 30 loads of sifted loam spread, making a regulation turtle back diamond which made a fast brand of baseball possible. Playground pageant and exhibit held at the end of the playground season. Two supervisors.

River Street Beach

A popular place during the bathing season, scene of many picnics and penny sales. Beach under care of park workers.

Faxon Field

Lined off for soccer and field hockey for girls. Used by High School for drills.

A park such as Faxon Field is a permanent memorial. Like waterways, highways and streets, which seldom are shifted from their original location, it becomes a fixture upon the land. Although the needs of the people may bring about some changes in a community, the parks are rarely sacrificed. Examples of such permanence are seen in Boston Common, New York's Cen-

tral Park, and the New England town commons of colonial days, which are allowed to remain untouched in the centers of busy, crowded cities. The gift of Faxon Field, of an area about half the size of Boston Common, assures an open space in the center of Quincy for all time, a gift that cannot be measured only in years, but in the number of children and adult citizens of future generations who will enjoy it.

Faxon Tennis Courts

Five courts under the direction of a paid instructor through the generosity of Henry M. Faxon, who also maintained the upkeep. Tennis championships of Quincy High School and junior and senior open tournaments for the City of Quincy were played off here. The Park Department is greatly indebted to our good friend for the many pleasant hours our people were able to enjoy on these courts.

Manet Lake

One of our natural skating ponds, cleaned out weeds and other growth, then flooded. Hockey rink erected and equipped with goal nets.

Rink used by teams in the Amateur Hockey League.

William Cushing Baker Park

Through the efforts of the late Councillor Alfred N. LaBreque and the cooperation of the Mayor and City Council this combination playground and beach was dedicated with appropriate services just prior to the playground season and named after William Cushing Baker, a Civil War veteran and old-time resident of Germantown. A large number of the citizens and city officials were present. Rossini's Boys' Band, under the auspices of the Park Board, rendered a program of popular and patriotic music. Two instructors in charge during season.

Adams Shore Playground

Playground apparatus erected in the rear of the school. Two instructors in charge; proved a popular gathering place for the small children in the district. Was much appreciated by the citizens in this section.

Merrymount School Field

The need of a playground and athletic field was much needed in this district. On petition of the Merrymount Improvement Association, the city purchased the land necessary to lay out a baseball field and erect playground apparatus. A section of the Ward 2 bleachers was moved here and a backstop erected. About three inches of sifted loam sown with grass seed in the spring will make this one of the best in the city. Baseball played here by teams in the playground and City Amateur Leagues. Two instructors in charge.

Ward 2—Baseball Field

This field was taken over by the Public Works Department and abandoned as a ball field. Bleachers dismantled, erected at the Merrymount School Field and the John Wendall Moses Playground. It is the purpose of the administration when all gravel is removed to erect a stadium which will be dedicated to all sports, making this spot, with its natural bathing beach, a recreation center to be proud of.

North Street Playground

Ideal shaded spot for children to safely play during the summer months. Received weekly attention of park workers.

Quincy Point Bathhouse

Open from June to September. Proved a popular place for mothers and children during the vacation period. Usual repairs made. Two attendants, one male and one female, on duty from 10.00 A.M. to 6.00 P.M. daily. Until such time as the Ward 2 field is completed and the ground graded, the bathhouse should be closed, the Board feels, under the present conditions, this is a move in the right direction.

Avalon Beach

This beach, as in other seasons, proved a popular resort for the citizens of this district. Two swimming instructors held daily classes in swimming and life saving, which were encouraged by awarding buttons and emblems in cooperation with the Red Cross. The Swimming Carnival, sponsored by the Association of Quincy Point, was held on Sunday, August 21. It proved to be a big success, and upwards of 10,000 people were in attendance. Prizes were awarded in all events. Members of the Park Board acted as judges. Four rafts, one water chute and a life boat are park equipment. By a special act of his Honor the Mayor and the City Council a comfort station was erected. The piers on each side of the beach were pointed and rebuilt. Pier No. 2 was filled in, enclosed with a chain link fence, playground apparatus erected and supervised by two instructors.

Whiton Park

A beauty spot. Drinking fountain equipped with dry well to drain off water. Shrubs and grass plot under care of park workers.

Pollard School

Combination picnic tables erected. Playground apparatus repaired and replaced. Pathway built with stepping stones, making it one of the most ideal playgrounds naturally shaded in the city. Two instructors in attendance eight weeks. Pageant and display of work held at end of season.

Daniel Webster School

By a special act of his Honor the Mayor, playground apparatus was installed and two instructors provided for organized play. Well attended and proved a popular spot for the small children of the district.

Elm Street Playground

Strictly a children's playground, a most popular one, supervised by two instructors, well shaded, an ideal spot for supervised play. Settees, sand box painted, gate shifted and new wall built. Baseball team from this playground were runners up in playground league. Comfort station needed. Doll carriage parade at the end of season one of the high lights of exhibition. Two instructors.

Ward 3—Robert Burns Monument

Keep statue clean and cut grass; spot lights here for night lighting.

Bradford Street Playgrounds

Tennis court amiesite, playground under supervision of two instructors, sand box and flagpole painted. Pageant and display of work held by supervised classes. New backstops for tennis courts recommended. Two supervisors.

Cranch School

The yard of the Cranch School, a well shaded spot, proved a popular place to erect apparatus and conduct supervised play. Recently enclosed by the School Department with a chain link fence, it was a safe place for the large number of children in this district who were regular attendants. Two supervisors in charge received good cooperation and accomplished excellent results.

Smith Field Playground

Largest attended playground in the city. Three instructors, merry-go-round erected, a new novelty in Quincy which proved very popular. Infield received 30 loads of sifted loam on infield turtle back diamond to comply with regulations. Foot bridge erected in back of bleachers. Back stop raised 15 feet. Leech drains laid from first base and third base to home plate to care for surface water after rain storms. Flood lights for football practice provided. Baseball and football games played here in season. Recommend that the brook be covered. Comfort station is an absolute necessity. Pageant, display of work and sports of the supervised playground season was held by the children of this district and was attended by the largest gathering of parents during closing week.

Ward 4—St. Moritz

The State reservation in the Blue Hills, the winter playground of the South Shore. The Park Board cooperated with the Blue Hills Recreation Club to obtain betterments from the Metropolitan District Commission. Painted large toboggan slide and ski jump. Erected children's toboggan slide and hockey rink. Cleaned the ponds for skating. Sixteen flood lights installed for two skating ponds and toboggan slides. The Park Board acted as judges during the winter carnival of 1931. Amateur hockey league teams played their games in the rink on holidays, Sundays and evenings. Six toboggans, property of Department, in constant use.

West Quincy Baseball Field

Field used mostly for baseball by Industrial League, semi-pro and amateur teams. Infield rebuilt with 30 loads of sifted loam making a turtle back diamond. Grass cut, field lined for ball games. Floodlights for football practice. Recommend that the outfield be filled in and graded. Fill in around the playground apparatus, and grade to street. Comfort station needed.

Playground

Popular place for the children of this district well attended. Two instructors. Flagpole and sandbox painted. Dry well dug around drinking fountain. Grass cut and ground cleaned weekly.

Shea Park

Playground apparatus installed, chain link fence built for a hundred feet on West Street side for protection of children. Proved a popular place for hundreds of children in this section. Two instructors. Recommend that the park be completely enclosed with a chain link fence.

Ward 5—Merrymount Park

Fifteen acres of natural beauty, making it one of the most beautiful parks in the state, with a pageant field, bathing beach, soccer field, football gridiron, cinder track, baseball fields, tennis courts, picnic grove and band stand.

Third Field

Picnic benches erected in convenient spots. Permits issued for outings every week-end during the summer and early fall. Meeting of playground instructors held August 5 with John Lane of the Boston Park Department and Ernst Herman of the Newton Park Department as speakers. His Honor Thomas J. McGrath and Councillors Lawrence Curtin and John P. Flavin were present and spoke to the gathering. Refreshments were provided by the Park Board and games featured the afternoon's sport.

Recommend that a charge of $5 be made for refreshment booth to all who apply for permits.

Bowling Green

A special item on the budget provided a Bowling Green. This was erected by the Public Works Department on the Black's Creek side of the third field. Enclosed with a chain link fence, will be ready for play in the spring of 1932. Providing a long felt want for older citizens to enjoy the outdoor sport enjoyed by our younger people on this beautiful park. Recommend a caretaker be appointed to supervise and issue permits for the Green.

Second Field

This field was used for baseball, soccer and parking.

The pond which has been more or less a nuisance and breeding place for mosquitoes has been filled in. A new baseball field should be laid out to help the over demand of the upper field.

Welfare Department built a new road, sidewalks through the field, which will greatly add to the appearance.

Upper Field

This field was in constant use during the spring and summer months for band concerts and baseball.

The baseball field was put in excellent condition by having a turtle-back diamond in the infield built, and treated with calcium chloride.

The bleachers, backstop and players' benches were painted and repaired.

The dressing room under the bandstand was equipped with hooks and a shower bath installed. New fence built along driveway. Tool house enlarged, equipped with necessary implements to properly carry on the work.

The baseball field was used by the Quincy Amateur Baseball League, South Shore League, amateur, semi-pro teams and the Industrial League. Posts erected to keep autos off the playing field. Outfield seeded, fertilized, and watered, which made this field a beautiful sight from Hancock Street for people passing through our city.

Tennis Court

It was in constant use at all times under the supervision of a caretaker. Backstops repaired, 18 tons of stone dust treated with calcium chloride rolled in to make a new playing surface. New nets provided. Caretaker on duty eight weeks.

Pfaffmans Oval

A natural spot to view athletic contests. During the summer this was a popular place for drills. Sundays and holidays during the football season the Quincy Amateur Football League sponsored by the Park Board drew upwards of 30,000 spectators, and the field was roped off and policed for each game.

Field House

A park this size should have a field house equipped with dressing rooms, shower baths, a storage room for park equipment. As this is centrally located it should have a room for the Board to hold weekly meetings and properly carry on the growing activities of the Department.

Band Stand

The band stand's present location is not in a suitable place to accommodate the large turnout of our citizens who enjoy band concerts. It is located alongside of a road leading into the park. Facilities for parking are inadequate.

To protect the baseball field from the damage wrought by machines driving over it, the Board was forced to prohibit this practice. As the majority of the people enjoy a concert sitting in their cars, we recommend that this band stand be discontinued and moved to the lower field, where cars can park all around it if erected in the center of the field.

A series of free concerts were given during June, July and August by the Wollaston Post 295, American Legion Band and were largely attended. The band stand was equipped with a new control box, making it possible to carry a heavier load on the light system. The Board are heartily in favor of building an acoustic shell band stand and accommodations, so thousands of our citizens could enjoy good music.

As in our last year's report we recommended concerts as suggested by Walter M. Smith, Quincy's well-known band leader and trumpeter. We hope our City Council will approve of such a project this year.

Park Roadways

The two roadways leading into the park are the cause of a real dust nuisance on windy days. As an absolute necessity these roadways should receive attention this year. A crushed stone surface with penetration will eliminate this unpleasant feature.

Pine Island

A bridge to Pine Island will open up this popular picnic grove to the public. At present it can only be reached by boat—the bridge was wrecked three years ago by ice and tide. Would recommend that a pontoon bridge be erected for summer use and pulled ashore during winter months.

Wollaston School

The playground facilities are available only during the supervised playground season. The group dancing and display of work, especially by the basket weaving class, were the features at the end of season exercises. Playground yard enclosed with chain link fence and resurfaced with amiesite by the School Department, making conditions better for supervised play. A member from this playground won the Horseshoe pitching Tournament conducted by the Board. Two supervisors.

Massachusetts Fields

This playground proved to be one of our most successful this year, for the first time a male instructor was assigned here. By the cooperation of both instructors and their ability to organize this was made one of the outstanding of the system.

A track and field team was organized which scored the highest points at the Pfaffman's Oval Meet August 16, thus winning the Park Department championship for Track and Field. A successful program was conducted at the conclusion of the season.

Butler's Pond

Butler's Pond, flood lights erected by a special act of the Mayor. Ice cleared of snow and flooded when necessary for good skating.

Safford Park

Considered the most striking of the smaller parks, well shaded, laid out with shrubs and flower beds, well cared for by the park workers. Suggest that permanent cement settees be placed here so that the people in this section can enjoy its beauty. A captured German field piece placed in center of park and dedicated by the Wollaston Post 295 American Legion, Armistice Day, November 11, attended by veteran bodies, national, State and city officials and thousands of citizens. Will be a fitting memorial to those Quincy boys who made the supreme sacrifice.

Ward 6—Montclair Playground

No work of a permanent nature was attempted on this field still in process of construction; at this writing the brook has been covered; with the coming of spring work should be started with a view to completing this long delayed project. Shelter built over sand box. Horseshoe pitching for young and old popular feature. Propose to build a regulation horseshoe pitching court this year. Two supervisors in attendance during season. Excellent results.

Ward 6 Playground

This is an excellent plot of land and was much used. Owing to numerous complaints, ball playing was restricted to smaller boys. This playground had two instructors and ranked with the highest in attendance. A successful pageant and display of work ended the season. Floodlights installed for football practice.

With the discontinuance of baseball and football on the Ward 6 Playground, a double tennis court was erected with Amiesite surface and chain link backstops, proved a very popular rendezvous for tennis enthusiasts in Ward 6. A caretaker will have to be in charge to issue permits, thus giving all an equal chance for play. A beautiful flower bed laid out near flagpole by Forestry Department.

Norfolk Downs Sand Pit

In rear of Francis Parker School used as a supervised playground during the summer season. Apparatus will be moved this year to a more suitable spot on the Dennis J. O'Neil Park. On hot days this playground is unbearable and not a popular place to send children.

Dennis J. O'Neil Park

Dedicated as a city park Sunday, July 26, 1931, in memory of Dennis J. O'Neil, a lifelong resident of the Atlantic district and for many years Ward foreman of the Public Works Department. Appropriate services were held with members of the O'Neil family, city officials, friends and co-workers of Dennis J. O'Neil and thousands of citizens in attendance.

Quincy Post No. 95 Drum and Bugle Corps headed the parade from the O'Neil Home, Prospect Street, to the park and put on an exhibition drill prior to the baseball game between Atlantic A. A. and Neponset Wanderers.

Backstop and bleachers painted, considerable grading to do to put field in first class shape. Three inches of sifted loam and grass seed in the spring will complete and make this an excellent athletic field.

John Wendall Moses Playground

Squantum, popular playground of the district, baseball, football and tennis leading sports. Field used by Industrial League. Playground teams, home field of Squantum A. C. in both baseball and football. Floodlights provided for football practice. Infield rebuilt with 30 loads of sifted loam making a regulation turtle back diamond. Playground apparatus moved from range of playing field.

Ward 2 bleachers erected on third base side of field. Ladies' comfort station installed in field house; this was painted and repaired, shower bath added in shower room. Flagpole painted. Bleachers painted. Leech drains dug near backstop to take care of drainage. With some grading in the outfield, this will be one of the fastest baseball fields in the city. Many unique ideas introduced by the instructors at the end of season, field day. Playground well attended. Children showed the results of careful instruction. Two supervisors.

Tennis Courts

Considerable work accomplished on this court. New fence built with heavy chicken wire. Playing surface of stone dust laid and rolled. Two new tennis nets, tapes, and roller and hose furnished. Caretaker in charge during season who regulated play and issued permits.

As briefly as possible the Board has stated the needs and accomplishments of the parks in the various wards. It is our sincere desire that some of the recommendations be worked into the program for the coming year.

Daily Program for Playgrounds

NINE O'CLOCK

Flag raising. Arrange swings and see-saws.

NINE-FIFTEEN TO TWELVE O'CLOCK

Playground games for smaller children.

NINE-THIRTY

Baseball for large boys (league). Indoor baseball for small boys. Folk dancing and playground games for girls.

ONE O'CLOCK

Modeling in sand, bean bag, ring toss for small children. Quoits, croquet for larger boys. Croquet, weaving for girls.

ONE-THIRTY

Baseball, indoor baseball, volley ball, slug ball (league for girls), weaving for girls. Calisthenics daily when a large number of children are on the playground, tennis.

THREE-THIRTY

Playground games for boys and girls. Safety campaign instructions.

Pledge of Allegiance

Take down flag at sunset.

REPORT OF SUPERVISOR OF PLAYGROUNDS TO THE PARK COMMISSION

Gentlemen:—The playground season for 1931 opened on Monday, June 29, and continued until Friday, August 28. This completed the usual nine week period of supervised play under the direction of the Park Board.

The playgrounds this year were more popular than ever. This is due to the general trend toward supervised playgrounds during the last three years. It is also due to extra attractions furnished by the Board, the abundance of equipment, and the fine personnel under whose guidance the program is carried out.

The attendance was greater than for 1930, which had the best previous record. The daily attendance was, however, determined largely by the tides, when hundreds of children would flock to the bathing beaches. The children from Elm, Pollard, Adams, Webster and other playgrounds constantly used Avalon Beach and Germantown, which were under the supervision of our swimming instructors. On nearly every playground the attendance was greater than it was during the previous year.

The following is the average high and low attendance per day for the various playgrounds:

Pollard	65	165	Ward 6	70	135
Elm Street	85	220	Parker and Hollis St...	30	125
Bradford St.	45	110	Mass. Fields	55	170
Ward 3	125	350	Squantum	25	80
Ward 4	75	165	*Merrymount	45	135
*Cranch	45	100	Houghs Neck	30	135
Wollaston	35	125	*Germantown	30	350
Montclair	40	150	*Avalon Beach	65	500
*Adams Shore	30	100	*Webster	65	170
*Shea Park	40	200			

*New playgrounds this year.

Note: These statistics were taken from our weekly playground report, which was submitted by the Senior Instructor on each playground.

These reports show data pertaining to attendance, games, competitions, leagues, picnics, life saving tests, first aid treatment, etc. I submit them to you to study.

Regular lessons were given to members of the playgrounds in life saving. There were experts at Avalon and at Germantown in charge of this work. Many adults as well as children took advantage of this opportunity. The Red Cross authorities cooperated with us and were a great help.

We worked in conjunction with the Massachusetts Safety Council and the National Playground Association of America.

The usual amount of handcraft materials were used. These consisted of rafia, reed, wool, cotton, silk, clay and wood. The articles finished by the children all over the city should be proof enough of the enormous interest in this work. Miss Mullarkey was in charge, making regular calls at all the playgrounds, for the purpose of supervised instruction. She also took complete charge of the folk dancing.

Trucks were used to transport large groups of children from the playgrounds to Merrymount Park, Avalon Beach, Sqantum, Germantown, and other places where there were bathing beaches. These picnics were almost a daily occurrence, and were always under supervision.

The usual interplayground competition program was followed out. Twelve playgrounds were represented in the Junior Baseball League for boys 14 years or under. Eight playgrounds were represented by Senior teams. In the Slugball League for girls, sixteen playgrounds were represented. An indoor baseball schedule was carried out for very small boys. Group games and dancing were a part of our regular schedule. The tennis courts at Merrymount, Bradford Street and Squantum were constantly in use.

A monster field day and track meet for both boys and girls was held at the Oval, on Sunday, August 16. Mr. Frank Bruce did much to organize this very successful affair.

On the first Saturday in August, a horseshoe tournament was held for boys. This event took all day and into the evening. There were two entrants from each playground for both senior and junior classes. Mr. Gilbert Brett was in charge of this detail. An open tournament was held during the first of September for men. Much credit is due Mr. William Kilpatrick for organizing this.

Due to unavoidable circumstances during the closing week, some of the playgrounds were unable to stage their annual exhibit and parents' night. However, about half the number did succeed in producing very creditable performances, which were well attended by mothers and fathers. I hereby wish to express my appreciation to the merchants who donated the many prizes which were offered for these occasions.

Every effort has been made to make the playgrounds as interesting as possible to the children. The instructors are chosen from a civil service list as far as possible, and we believe that they are well qualified.

Respectfully submitted,

FRANKLIN B. MITCHELL,
Supervisor of Playgrounds.

Recreation

The past year has been one of unusual interest and activity in our recreation and playground development. The playground movement, originally limited to the providing of play space for children, is steadily broadening and is gradually solving the problems of organizing and influencing the recreation for adults as well as children.

Each playground has its own atmosphere depending partly on its physical aspects and partly on the neighboring population, but mostly on its directors and assistants. The relations of the playground instructors with the parents of the children are pleasant and intimate. The mothers are always willing to cooperate with those in charge when there is a special exhibit and come themselves to assist in running off the program.

SPORTS

Baseball

No city in the Commonwealth of Massachusetts outside of the city of Boston has better facilities for the playing of baseball than the city of Quincy, with eight first-class regulation baseball fields, all of them under constant care of department workers, lined off before games and furnished with bases, home plates and pitchers'

rubbers. Every ward in the city has its own field and representative teams. Seven hundred seventy-six permits were issued by the Board during the season beside the blanket permits given to the Junior High Schools and the Playground Leagues.

Five infields were rebuilt with 30 loads of sifted loam to a field making turtle back diamonds which conformed to big league regulations.

The Board sponsored an eight team league, of which Franklin B. Mitchell was president and William B. Nugent secretary. The West Quincy Eagles were the winners. Each player received a sterling silver baseball charm awarded by the William Westland Co. The Board were guests of the team at a victory banquet held at the end of the season.

Football

This great American game of the rugged youth was encouraged in every way possible by the Board. Floodlights for night practice were erected on seven playfields, six gridirons laid out and goal posts erected.

The five team Football League sponsored by the Park Board was one of the highlights of a most successful season. All league games were played on Pfaffman's Oval under a competent staff of approved officials. Two police officers were assigned each game to preserve order and keep the playing surface clear. The field was roped off by steel cable on each side. The Wollaston Post No. 295 Band and Drill Team and the Quincy Post No. 95 Drum Corps assisted at several games by exhibitions between halves. The Manet A. C. from South Quincy were the winners with three wins and one tie. The Nyma Football Team, winners of the Boston Park Department League, were the guests of the Board and played the Manets an intercity game before 4,000 people November 29, at the Oval; a most fitting climax for the Manets was a win of 20 to 12.

The Nyma Team was tendered the use of the Y. M. C. A. by Secretary Folmsbee for dressing and showers. After the game they were the guests of the Park Board at supper in the Elks Grill. The visitors were loud in their praise of the treatment received while in our city.

The trophy awarded the Manets was donated by the Diana Restaurant under the auspices of Anthony Venti. The Board were guests at a victory banquet at the close of the season.

Soccer

Provisions were made for soccer during the early spring on Pfaffman's Oval, where games were played every Sunday up until June. In the fall soccer fields were laid out at Faxon Field and the second field at Merrymount Park. The goal posts were equipped with goal nets.

Quincy boasts of several good soccer teams, which are members of various leagues in Greater Boston.

Swimming

One of the most enjoyable and healthful recreations for all is bathing as conducted at our bathing beaches at Mound Street Bathhouse, William Cushing Baker Park and Avalon Beach. Everything possible to insure safety to beginners with an experienced male instructor, who is assisted by those more advanced acting as life guards. Swimming answers a twofold purpose. Of the hygienic value little need be said, and as a protection every man, woman and child should be able to swim.

Hockey

For the first time in the history of the city of Quincy a Hockey League was organized and sponsored by the Park Board. The interest was so great that three rinks were built to satisfy the demand of the ten teams represented. The rink at St. Moritz in the Blue Hills was used holidays and Sundays, and Sailors' Home and Houghs Neck were both illuminated by a special act of His Honor, the Mayor, making it possible to play night games. Trophies were offered by the Kay Jewelry Co. and William Westland Co., with sweaters by the Park Board. The teams were evenly matched and stimulated interest in a game that is fast becoming a leading sport in the United States.

Each team played each other once, making a series of nine games which was won by the Houghs Neck team sponsored by the Blessed Sacrament Lyceum. The play-offs were held at the Boston Arena two nights before a large crowd of Quincy fans. The Boston Gear Works Band were on hand one night and the DeMolay Band the final night to render music during the game and between periods. Manager Lazarus of the Kay Jewelry Company presented Captain O'Brien of Houghs Neck the trophy at the close of the game. The Board were guests of the Houghs Neck team at their victory banquet.

Winter Sports

The Board encouraged winter sports this year on a larger scale than ever before. Natural ponds, such as Manet Lake, Butler's Pond, Sailors' Home Pond, two ponds at St. Moritz were kept cleared of snow and flooded when necessary. Toboggan slides built for the children at St. Moritz, hockey rinks cared for and cleared of snow. At some future time when money is available a toboggan slide at Merrymount Park will be a popular move.

Band Concerts

This popular feature of the parks' program was carried out with great success. Concerts were given at the following playgrounds: Montclair, William Cushing Baker, John Wendall Moses, Merrymount Beach and Avalon Beach. Free concerts were given by the Cyril P. Morrissette Post No. 294 Band on the Legion home grounds at West Quincy. The Wollaston Post No. 295 Band at Merrymount Park.

The portable bandstand purchased by the Board with money available on a budget item was in constant use and was a good investment.

Tennis

Quincy is indeed fortunate in having tennis courts located at Faxon Field, Atlantic, Bradford Street, Merrymount Park, and Squantum. There are demands from Houghs Neck, South Quincy, and West Quincy for courts. While we realize this is an expensive proposition, these demands should be considered at once.

Tennis championships were held at the Faxon Courts. The High School and City teams, open for male and female, were run off for cups donated by Henry M. Faxon. Tennis tournaments were held at the Squantum courts as part of the Supervised Playground Program.

Track and Field

The Board encouraged track and field competition on the playgrounds this year. Each holding an elimination on their separate fields, with the contestants finishing first and second, competing in the finals at Pfaffman's Oval August 16. The meet was a

success far beyond expectations; several thousand citizens attended. Officials from the N. E. A. A. U. handled the event, which was conducted by Frank Bruce as manager for the Park Board.

Prizes were donated by city officials, merchants and citizens.

The team from Massachusetts Fields scored the highest points, winning the championship for that playground. Cyril P. Morrisette Post 294 Band furnished music.

Horse Shoe Pitching

Interest in this popular barnyard sport was keen this year, so much so that the Board sponsored two tournaments, one junior and senior; both were conducted at Pfaffman's Oval and were largely attended. There were so many entries it took two days to reach the finals.

Prizes were donated by local merchants. Some permanent courts will be erected this year at Merrymount lower field.

To Veteran Organizations

The Park Board has noted that several parks in this city are unnamed, at the present time listed as Ward Playgrounds. Such playgrounds should be named and dedicated to some leading deceased citizens or veteran as a memorial. The playgrounds are in use by the coming generation, and the Board knows of no better way to perpetuate the names of our veterans and leading citizens. With the coming of Memorial Day, 1932, it is the recommendations of the Quincy Park Board that action be so taken and all fields dedicated this coming year.

The playgrounds listed are as follows: Ward 6, Ward 4, Ward 2, Houghs Neck, Montclair, and Merrymount School Field.

Liveableness an Asset

The absence of parks and playgrounds is a blow to the financial future of any city. Our Chamber of Commerce, in its effort to secure new industries for Quincy should find no more persuasive argument than the progress we have made in that direction. Recently the city of Dayton, Ohio, secured the location of a very large and important manufacturing industry. Its president, in speaking of their choice of location, said. "I can only say that it was the liveableness of your city that decided the issue. We found others with plenty of labor, others with adequate shipping facilities, others in which manufacturing conditions were equal with those of Dayton, but nowhere did we find a place where the qualities of living were as highly developed as they were here. Keep Dayton a good place to live in and your future is assured."

Recommendations

Field house and locker rooms Merrymount Park. Provide comfort stations where necessary. Fill in space on Black's Creek side of Pfaffman's Oval.

Build bandstand on Lower Field. Charge small playing fees for use of Bowling Green. Complete Montclair and Dennis J. O'Neil Playgrounds. Build baseball diamond on second field, Merrymount. Close Mound Street Bath House. Encourage all-year-round activities on all playgrounds.

Provide facilities for mass recreation for women and young woman along lines laid out by the Playground and Recreation Association of America.

Permits

During the year the following number of permits were issued for the various activities, viz.:

Hockey	120	Picnics	32
Baseball	776	Boy Scout outings	6
Soccer	39	Girl Scout outings	5
Football	72	Exhibition drills	3
Band concerts	50	Concessions	16

Expenditures

The expenditures of this Department may be found in the Auditor's Report.

Equipment

During the past year considerable new equipment was added to assist the workers to save time on our growing activities. A half-ton power roller, 1-ton Ford truck, power lawn mower, lining machine, portable bandstand, life preservers, tools of all descriptions, garden hose, nozzles and sprayers, four lengths of one-half inch hose, wheelbarrows, hand roller, lime, fertilizer, grass seed, lumber, calcium chloride, ladders, playground apparatus, part replacements, athletic equipment, making it possible to render service for all activities; with the proper care of Park Department workers the purchase of equipment this year should be very small.

Vandalism

As in years past the havoc wrought by vandalism has been one of our major expenses in the spring clean-ups. Locks broken, doors kicked in, windows broken, plumbing wrecked and torn out, wire ripped off backstops, flag halyards cut, making this a needless expenditure of money that could be used for further activities. It is hoped that in time the public can be educated to realize that to destroy city property is a move against their own pocketbook. With all this going on it seems impossible to catch the culprits and bring them to justice.

Conclusion

The magnificent spirit of cooperation evinced by His Honor the Mayor, the City Council, the press of the city, our stenographer, the American Legion Posts, Police and Fire Departments, City Engineer's Department, Supervisor of Playgrounds, Playground Instructors, members of all leagues sponsored by the Board, Park Department workers, citizens who by their generous contributions to our Track and Field Meet, and Playground Pageants, officials of the N. E. A. A. U., referees and umpires in all leagues, and anyone who by act or deed has made our task of 1931 a pleasure. It is fitting that we should here record our appreciation and gratitude.

We are proud of our city, our citizenry, our parks and earnestly wish that this, the 43rd Annual Report, shall mark another milestone in the upward path.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The sixty-first annual report of the Trustees of the Thomas Crane Public Library is submitted herewith.

During the year 1931 there has been a steady and healthy growth in the use made of the facilities offered by the library. The total circulation has reached very nearly three-quarters of a million volumes. At the same time it is gratifying to be able to report that the unit cost per volume circulated has been kept down to 10 cents, being much below the average of 15 cents for public libraries throughout the country. The widespread use of the library by our citizens is reflected in the per capita circulation of 10.3, which is higher than for any previous year and higher than the average for public libraries.

Since our previous report no new branches have been added, and none are considered necessary at this time. There have been made during the year numerous improvements at the main building, among which may be mentioned the new storm porch which has added much to the comfort of both workers and patrons, the oil burner, which has proved to be economical and a great labor-saving device, and the charging desk of modern library design, which has added much to the ease and efficiency of the circulation routine. Also, as occasion has required, numerous minor improvements and additions have been made in the various branches.

By means of funds in the annual city appropriation the number of books has been constantly augmented, and while now the total is over 90,000, yet that amount is inadequate to meet the ever-increasing demands. During the year many gifts of books have been received from individuals, and to such friends of the library grateful acknowledgment has been extended. The library also has been the recipient of a unique gift from Hon. Chester I. Campbell, ex-mayor of our city, which will be a very valuable adjunct to the children's department. It consists of dolls from all countries dressed in native costume. Mrs. Campbell spent many years in making this wonderful collection, and in memory of her it will be known as the Alice L. Campbell Collection. The library acknowledges this gift with a deep sense of appreciation and gratitude.

It is necessary to call attention again to the overcrowded condition of the book stacks and administration facilities in the main building. While present economic conditions have added to the number of those enjoying the advantages of our library, yet the ordinary and normal growth of our library system will continue to emphasize the necessity of finding a solution to this problem.

The trustees take this opportunity to record the continued efficiency, loyalty and zeal of the librarian and members of the staff, and to thank the mayor and city council for the support and co-operation rendered so generously by them to the Library Department.

Respectfully submitted,

GEORGE E. ADAMS,
Chairman.

GEORGIANA CUSHING LANE,
Secretary.

REPORT OF THE LIBRARIAN

To the Trustees of the Thomas Crane Public Library:

The year 1931 witnessed the achievement of the goal of a ten per capita circulation of books, long hoped for, but, so far as the records show, never before reached in the history of this library. It also proved to be a record-breaking year in other respects. Though no figures are kept of the attendance in the reading room of the main library, it has been apparent that never before has it been so popular or used so extensively. On many afternoons and evenings double the number of tables and chairs would not accommodate those desiring to use them. Undoubtedly the unemployment situation has been a factor both in the increased use of the reading room facilities, as well as the increased borrowing of books for home use. The general effect of the present business depression on the library and its opportunity will be discussed elsewhere in this report.

In handling the increased work the new modern charging desk installed in May has been of great assistance. Previously it had been impossible for three persons to work at the old desk, and even two were handicapped by continually getting in each other's way. Three persons, and even more, can work easily in the hollow square of the new desk with its separate counters for charging books, discharging them, and registering borrowers, while ample space is provided for registration and branch files and for books on reserve and working tools.

Book Additions

Though the number of books added to the library in 1931 numbered 11,179 volumes, the net gain was 6,616, bringing the total book stock to 91,911 volumes. This gain was the largest for many years. In spite of this, we are still understocked to meet the demands of our patrons. By way of comparison, I may point out that the public libraries of our neighboring cities, Brockton, Brookline, Cambridge, Lynn, Newton and Somerville, all have book collections varying from 110,000 to 150,000 volumes, and, except in the case of Newton, their circulation is smaller than that of our own library. A brief analysis of the book purchases may be of interest. Of the 11,179 books added during the year, 10,768 were by direct purchase, 241 were gifts and 139 books added by binding magazines or re-entering books previously checked as lost books. Of the 11,179 books added, only 2,873 were new books; that is, books never before in the library, while 6,698, over one-half of the purchases, were duplicates, and 1,577 were replacements of books discarded or lost. Of the 2,273 new titles 952 were fiction and 1,780 non-fiction. Books for the children amounted to 44 per cent, for adults 56 per cent.

Circulation

At the end of the year the list of registered borrowers numbered 23,856 persons, just about one-third of the population of Quincy. As the registration is limited to three-year periods and we constantly check off the names of persons who have died or are known to have left the city, this number may reasonably be considered as including active borrowers. The total number of books loaned for

home use amounted to 741,827 volumes, not far below the three-quarter million mark, and a gain of 11 per cent over last year's figures. As mentioned in my first paragraph, this represents a circulation of 10 per capita, 10.3 to be exact, a figure exceeded by relatively few public libraries in cities of over 20,000 and much above the average per capita circulation.

Branches

Of the twelve branches, all but the Merrymount Branch showed substantial increases in circulation. The Squantum Branch had the most notable increase—over 58 per cent. The Baxter Branch gained 42 per cent, the General Palmer, Manet and Lakin Square branches all had more than 20 per cent increases and the Wollaston and Norfolk Downs branches better than 10 per cent. The circulation of books through the branches amounted to 484,274 volumes, or approximately 65 per cent of the total home use of books.

In the report of last year, mention was made of the intention to move the Baxter Branch, provided a site could be found nearer the business center of the South Quincy district in proximity to the Quincy Adams railroad station. In September, 1931, we secured a store in the block at the corner of Water and Franklin Streets and the branch was moved and opened in the new location September 26th. New furniture was installed and a very considerable number of new books purchased for the shelves. As was confidently anticipated, the change resulted in a notable increase in use, the circulation during the last three months of the year being more than double the largest circulation for the same period in any previous years in the history of the branch. A marked increase in the registration of borrowers was also noted, a large proportion of them coming from the Penn's Hill section of the city, people who had heretofore found the old location out of their way. Miss Baxter has been the recipient of many congratulations both on the attractive quarters and the service the branch is rendering to the residents of South Quincy.

Children's Work

The children's department of our library has evidenced progress during the year. Miss Kingman and her assistant, Miss Hodgkinson, have worked hard and with enthusiasm and have been rewarded not only by an increase in circulation, but by the very evident appreciation of children, parents aand teachers for the personal service rendered. During the year various exhibits were obtained by Miss Kingman which attracted interest and favorable comment. The gift of the Alice L. Campbell collection of dolls made possible a unique exhibit in the window of the Granite Trust Company during Children's Book Week. The use of the dolls dressed in the native costumes of various countries with books illustrative of each country made an attractive display and excited much public interest. Also, through the courtesy of the Granite Trust Company, we were able to hold a story hour in Kingson Hall, at which over one hundred and fifty children listened to Mr. John J. Cronan tell stories in his inimitable way. Both Miss Kingman and Miss Hodgkinson have attended courses for children's librarians, and Miss Hodgkinson has been taking, at her own expense, a course in story telling. The classroom libraries have been prepared and sent to the elementary and junior high schools as usual. A slight falling off in their use must be reported, the reason being that the junior high schools have now more adequate libraries of their own and naturally make less use of our books. The total

juvenile circulation from the children's room, the children's departments in the branches and the school deposits amounted to 316,323 volumes, or 42 per cent of the total circulation.

Hospital

Our library service at the Quincy City Hospital has kept pace with the rapid growth of that institution. The number of volumes issued to patients, nurses and staff in 1931 was 10,772, about double the number issued during 1926, the first full year of this service. The work has increased to the extent that it takes nearly four hours for the hospital librarian to make the rounds of the wards with her truck of books. The library room opened in 1930 in the administration wing has proved of inestimable value as a working headquarters for the librarian and has been well patronized during the brief time it is open on library days by nurses and members of the hospital staff. Miss Marion Davis acted as hospital librarian during the first eight months of the year, Mrs. Connolly returning to the work in September.

Staff

The only resignation from the staff during the year was that of Miss Carol Wilmore, who became Mrs. J. Clifford Giles in September. Miss Muriel Cox and Miss Frances Raymond, both recent graduates of the Quincy High School, who had previous experience as part-time workers, were added to the staff during the year, Miss Cox assuming the duties of librarian of the Montclair Branch, and Miss Raymond acting in a similar capacity at the Squantum Branch. The increased circulation made necessary the employment of more part-time helpers and pages during the year. Staff meetings were held once a month, except in August and September. These meetings were arranged and conducted by special committees of the members of the staff. Outside speakers at staff meeting were Mrs. Nancy Byrd Turner, poet and biographer; Mrs. Belle Holcomb Johnson of the Public Library Committee, of Connecticut, and Mr. E. H. Redstone, State Librarian of Massachusetts. Other meetings were devoted to library problems, book reviews and reports of library conferences. All have been interesting and of value to the librarian and staff. Ten members of the staff were among the 3,000 librarians who attended the American Library Association Conference at Yale University in New Haven in June. The comparative proximity of the conference and the extremely reasonable rates were the factors which made for the attendance of such a large number of our staff. Acknowledgments are due to every member of the staff for loyal, interested work, and especially to Miss Callahan, whose unobtrusive but efficient management of the routine relieves me of much detail work and many problems.

Other Items

No inventory was taken in 1931, owing to the pressure of the regular routine work in this exceptionally busy year. It is hoped to find time in 1932 to make a complete check-up on our book stock. While we have undoubtedly suffered some losses, there has been no indication of the wholesale theft of books that some libraries have reported.

In November the Old Colony Club, representing the libraries of the South Shore, accepted the invitation of the Thomas Crane Public Library to hold their fall meeting in Quincy. Some sixty librarians and guests were present and enjoyed an excellent pro-

gram, on which Colonel Adams and Mr. Johnson of the Board of Trustees and Mrs. Wilford of the staff were speakers. We were much indebted to the courtesy of the Bethany Congregational Church, which generously allowed the use of their chapel for this library meeting.

The weekly column of book notes and library news conducted by Mrs. Wilford has appeared regularly in both Quincy papers, except for the month of August. I may add here that the fine work which Mrs. Wilford is doing in this branch of her work has not only been favorably commented upon by local users of the library, but has been highly praised by several persons of literary prominence outside our city.

The library bulletin of recent books added to the library heretofore issued four times a year was changed during the year to a bi-monthly publication. The frequency of issue makes it not only more timely, but makes it possible to list more of our accessions than formerly.

The Library's Opportunity in Hard Times

That unusual demands upon the service offered by public libraries invariably occur in periods of unemployment and business depression is so well established as to be almost an axiom among libraries. This was never more true than in the present economic situation. Circulation increases out of all proportion to normal are being reported, attendance in reading rooms is taxing the seating capacity of most libraries and reference librarians and readers' advisors are exceptionally busy. These manifestations have not been as pronounced in Quincy as in many other cities, but they are already evident enough and may be expected to assume greater proportions if the prevailing situation continues.

To judge from the calls we are having for books on business and technical subjects, many unemployed men and women are spending part of their time studying in their own or some other line of work. Some of them are studying at home, others are taking one or another of the relatively inexpensive courses which are offered by the University Extension and other agencies. Apparently these people feel that when the tide does turn, competition for jobs will be keen and the best fitted will have the best chance. This library should avail itself of every opportunity to assist such persons by furnishing books needed and advice on what to read.

And recreational reading should not be despised in times like these. Never since the war has there been a greater need of providing ways and means of keeping up the morale of the people to combat discouragements, worry and fear. Hundreds of people have little or no money for amusements requiring an admission fee. Many of these already have found, and others will find, that books borrowed from the nearest public library agency will provide the necessary distraction. This sort of reading is by no means confined to fiction. We have noticed a marked increase in the circulation of such classes of non-fiction as philosophy, science, biography and especially the books on economics and social problems. Altogether, there is in the present situation a wonderful opportunity and a real challenge.

In conclusion, once more I express my appreciation for your cooperation and hearty support.

Respectfully submitted,

GALEN W. HILL, *Librarian.*

REPORT OF CITY CLERK

MAYOR THOMAS J. MCGRATH:

I have the honor to submit the forty-third annual report of this department, being for the year ending December 31, 1931.

RECEIPTS

Licenses:	
Pool and billiard	$605 00
Victuallers	650 00
Junk	180 00
Job wagon	3 00
Auctioneer	24 00
Hackney	30 00
Public hall	175 00
Theater—annual	280 00
Theater—Sunday	2,755 00
Motor sales	1,435 00
Lord's Day	1,135 00
Gasolene and renewals	343 00
All others	133 00
Permits	
Marriage	631 00
Miscellaneous	
Recording	1,903 40
All others	276 60
	$10,559 00

The above sum has been paid to the City Treasurer.

Number of marriage intentions issued in 1931	640
Number of marriages recorded in 1931	691
Number of births recorded in 1931	1,534
Number of deaths recorded in 1931	800

The number of dogs licensed in 1931 was 1,984 males; 353 females; 489 spayed and one breeder's license ($50), for which the sum of $6,761.00 was collected. The sum of $6,195.60 was paid to the County Treasurer and $565.40 to the City Treasurer. The sum of $3,454.75 was collected for hunters' licenses. The fees amounting to $302.85 were paid to the City Treasurer and the balance to the Commonwealth.

Annexed are the births, marriages and deaths recorded in Quincy in 1931 and the election returns.

EMERY L. CRANE,
City Clerk.

Saturday, 8 A. M. to 12 M.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of Quincy:

The School Committee of the City of Quincy presents its report for the year 1931.

The Committee has held twenty-five meetings, besides numerous conferences, and many details of administration have been considered.

The physical needs of the School Department to date have been well cared for. The dressing rooms and showers for the gymnasium of the Central Junior High School have been completed. This provides long needed facilities and places the physical training in the Central Junior on a par with the other Junior High Schools in the city.

The four room addition to the Adams School relieves the overcrowding in that district and should be sufficient for some time to come. This addition has necessitated, under the State law, the installation of automatic self feeders in the heating plant. Incidentally this releases the custodian for other important work about the building and also lessens the liability of a smoke nuisance.

The completion of the addition to the Quincy School, now well under way, will relieve the congestion in that building and also allow a readjustment of the district lines of the Francis W. Parker and Massachusetts Fields Schools. Thus we hope pupils may attend the school in the district to which they legitimately belong.

The completion of the east wing of the North Junior High School building has allowed the pupils completing the Junior High School work to continue in the 10th grade in the same building. It is expected that eventually all high school pupils living north of Beale Street will attend this six-grade building, the name of which has been changed to "North Quincy High School." To accommodate the six grades in this school it will be necessary to add the west wing as soon as the financial conditions admit. For administrative and economic reasons it was thought advisable for the upper class students to continue in the Senior High School to their graduation.

The Senior High School is very over-crowded,—almost criminally so,—at the present time, but with no more mid-year pupils entering and with the gradual withdrawal of all North Quincy students, the conditions should gradually improve and reach a condition of comparative comfort for teachers and pupils.

During the summer, needed repairs and painting were attended to. Yards have been amiesited and fences built to insure the comfort and safety of the children. The school grounds about many of the schools could be beautified by the addition of trees and shrubs. Perhaps this is a matter which might well concern the various Parent-Teacher Associations.

Several sites for new schools have been considered and recommended to the City Council in order that land in growing centers might be acquired while it is still vacant, but as yet nothing further has been done in this matter.

The reader is referred to statistics under Appendix A for interesting information concerning buildings and organization. Under Table 5, General Statistics, it might be of interest to note that there are employed by the School Department 608 different persons.

There are at the present time about twenty-five vacant class

rooms, but as they are spread over practically the entire section cannot be used to alleviate overcrowding in any particular district.

The reorganization of the office of the Superintendent has been considered with the appointment of a second assistant to take charge of the many details of the business organization. This would relieve the Superintendent and allow him more time to devote to the purely educational needs of the department. This change was deemed inexpedient at present on account of the increased expense it would entail.

Mr. Charles H. Johnson has for many years attended well and faithfully to the duties of Supervisor of Attendance. But of late those duties have become excessive and exacting and it was found necessary to appoint an assistant. Mr. Harry G. Burnham has been appointed temporarily to fill that position and is proving most acceptable in his new work.

Believing that the health of the child is of prime importance, and wishing to bring the physical education department to the same high level of efficiency as the other departments, the School Committee requested Prof. Frederick Rand Rogers, Dean of Student Health and Physical Education at Boston University, to make a survey of the health education program in our schools.

Dean Rogers has gone into the work with interest and efficiency. He has rendered a preliminary report in which he compliments the present conditions and praises the splendid professional character of the masters and teachers and expresses his appreciation of their unfailing courtesy and helpfulness. He has outlined a comprehensive scheme of health education throughout the school system, but most of his suggestions await his final report and also a more auspicious time financially for inaugurating reforms which must of necessity incur considerable expense.

The Committee is cooperating with the Commissioner of Health and hopes to provide open air rest rooms where undernourished children may be cared for and thus conserve what gain in health they may have acquired in summer camps.

The educational requirements have been well attended to and the Committee is proud of the high standards and morale of every member of the department.

A series of lectures has been provided for the teachers and the public from the Charles Francis Adams Fund. We have heard Dr. William McAndrew, former Superintendent of Schools of Chicago, and Mr. Alden G. Alley, who spoke on international politics.

The time of school sessions in the High Schools has been changed to correspond to that in the Junior High Schools—from 8.30 A.M. to 2.30 P.M. This change has been accepted with absolutely no friction on the part of teachers, scholars or parents.

The High School has again been approved in Class A and is entitled to send its pupils to the State Normal Schools on certificate.

This year, in order that the graduates of the Quincy Senior High School might have opportunities of securing suitable employment, a placement service has been established as a part of the regular school work. Under the direction of Mr. Leslie C. Millard and Miss Margaret L. Burns, a careful survey of business firms in Quincy and outside was made and individual interviews were held with all members of the graduating class.

By this means some members of the graduating class have been placed in good positions, but in this year of unemployment the response has not been as good as we hope it will be later.

The schools have lost through death during the past year Miss

Mary A. Coyle, who died October 1, 1931. For twenty-two years she had served the schools most loyally and efficiently. As a memorial to her the children in her school placed a picture in the classroom in the South Junior High School where she last taught.

The School Committee is conscious of its duties to the schools and also of its responsibilities to the citizens and tax payers. Quincy expended during the year 1931 for the support of public schools (day, evening and vacation), $1,130,538.61. This budget, although large, is only about 25% of the tax levy, a very favorable showing when compared to 35% or 50%, which is the usual proportion in many cities. Quincy is eleventh in population in the Commonwealth, with an average cost per pupil of $80.36 based on the average membership. Of the thirty-nine cities in the Commonwealth only two have a lower average cost per pupil.

There was expended for this same period for State-aided schools and Americanization work, $87,354.31. Of this amount $5,254.97 represents Federal aid through the Smith-Hughes and George Reed Funds.

There was returned to the city treasury through the operation of the regular and State-aided schools $146,872.47 from tuition, State and Federal reimbursements, and miscellaneous receipts.

The School Committee wishes to acknowledge the hard work and efficiency of the Superintendent in many trying times during the past year. Also we wish to thank the City Council for its sympathetic cooperation in supplying the ways and means which have made our work possible.

The foregoing report was prepared by a special committee of Vice-Chairman Dr. Nathaniel S. Hunting and Mr. Robert E. Foy, and was adopted as the annual report of the School Committee for the year 1931.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

The annual report of the Quincy Public Schools for the year 1931 is herewith submitted.

The work of the different departments is given in full as submitted by the department heads. The Assistant Superintendent has reported for the State-aided, Academic Evening, Academic Summer Schools and special classes. These reports are given in full. The principals and teachers have worked long and earnestly to maintain the high standard and to discharge their important duties.

The Senior High School reached a new high mark in attendance in September, 1931, the enrollment being 2,258. The principal and the teachers were obliged to face difficult situations, particularly during the fall semester. They met these difficult situations and trying circumstances exceedingly well.

Quincy was particularly fortunate this year in electing to its staff a fine group of well-trained and well-educated teachers. It is reflected in the classroom and in all the schools. For the most part principals have been enthusiastic in their praise for the new entrants that have been placed under their charge.

Early in the year 1931, the School Committee voted that we endeavor to encourage a Placement Service Bureau in the Senior High School. During the month of July, two of our regular teachers, Mr. Leslie C. Millard and Miss Margaret L. Burns, of the Commercial Department, were placed in charge and much preliminary work was necessary to get the department underway. During the year they have been able to place several pupils in positions, some permanent and some temporary. The department has continued the work, making contacts with all the employers in the city and with many firms outside the city. Naturally, the business conditions and depression caused business men to retrench. We are unable to place as many pupils as we could in normal times. While the primary purpose is that of immediate placement, those in charge of the Service Bureau were especially concerned with establishing permanent contacts for future needs as well as for the present. The workers in this department were received by the business and professional men with courtesy. They felt that it was a step in the right direction to aid the girls and boys finishing the high school course.

The Visual Education Department in Quincy has received wide recognition. We have always had visual aids in one form or another in the classroom. The principle on which we are operating is that these visual aids are not to supplant but to aid the teacher; that through our Director of Visual Education we are offering teacher-training in the essentials of visual aids. The Director of Visual Education meets with groups of teachers for the purpose of giving the necessary instruction in the proper use of the machinery and the material. It is believed that the type of work that the teacher is placing before the pupil will arouse the learner where he will want to know more about the subject presented; that is, it will help him to think more clearly, sense more keenly, know more definitely and will to know more about his subject. Every-

thing that is being done in the City of Quincy is done with the high hope to serve the teacher and to help the pupil. We shall ever keep in mind that the controlling factor is, and must of necessity be, the teacher. The pupil shall continue to look to his teacher for guidance and inspiration. We are endeavoring to sift out those things that will be most helpful to the teacher to further aid him in his work.

One of the outstanding administrative plans of the year was to arrange a series of addresses and lectures by prominent men in the field of education, with the endeavor to stimulate and energize the work of the classroom by having these high-grade meetings from which we may glean a bit of inspiration to leave with the children. The meetings were arranged to take the place of the Norfolk County Convention at Boston. William McAndrew was our first guest speaker. He gave two addresses, one at 4 P. M. on Wednesday, September 23rd, at the Central Junior High School Assembly Hall, and the second on the same evening at 8 P. M. at the Senior High School auditorium. The second speaker in the series was Alden G. Alley on November 9th. He was scheduled to lecture on World Court and International Peace. Six hundred people sat down to dinner at the North Quincy High School in one of the most enjoyable festivities that the teachers of Quincy have enjoyed. After the dinner they sojourned to the auditorium and listened to a very inspiring, educational address on "What Is Happening in the Old World."

Another phase of the work worthy of our consideration is that a greater unity of purpose was needed in our school work. We have felt for some time that there should be a revision of the course of study from the 7th to the 12th grade inclusive in order to eliminate waste and overlapping. The time is ripe to place in the hands of each teacher a well-defined syllabus of the work that the teacher is expected to do. I advocated the integration of the subject matter of the various subjects to be taken up and, to this end, appointed four committees: a committee on English, a committee on Mathematics, a committee on Social Sciences and a committee on Modern Languages. These committees have been at work constantly on this work, and while a great deal of work has been done, much remains to be done. This work will not be finished until perhaps the close of the school year in 1932.

It was felt that we had outgrown our rating system for teachers and that this, too, much be revised. The principals and the supervisors, together with the superintendent, acted as a committee of the whole on the revision of this particular phase of work. This committee met every two weeks up to the Christmas season and is continuing its work. Great good has come out of all these meetings. We are quite positive that when the course shall have been completed and the revised teachers' rating accepted, increased interest will be manifested by teachers and pupils alike.

An assistant to the Supervisor of Attendance was employed September 28, 1931, Mr. Harry G. Burnham. His work is greatly felt by the teachers and principals. Additional help has long been needed in this department. It has lightened the burden of the Supervisor of Attendance, Mr. Charles H. Johnson, and given encouragement and help to the principals.

Another outstanding feature of the year's work is the survey on the health education, recommended by the Superintendent of Schools and authorized by the School Committee. The work was begun during the fall of 1931. This survey is conducted by Frederick Rand Rogers, Dean of Student Health and Physical Education

in Boston University, the purpose of which is to make careful investigation into every important phase of the program, collect objective evidence of conditions, and prepare detailed plans for a model health and physical education service adapted to Quincy's needs and purse. A preliminary report has been made and points the direction for an extraordinary health program. This survey will not be completed before the end of the school year. In his preliminary report, Dr. Rogers expresses his appreciation of the splendid professional character of the principals and their unfailing courtesy and helpfulness, stating that it is always a pleasure to visit the Quincy Schools. If it is at all possible to put the program suggested by Dr. Rogers into operation in Quincy, it will have a far-reaching effect to put Quincy in the foreground of health education.

High praise should be given to every member of the School Committee for their devotion to the general educational program for the welfare of the future citizens of Quincy. If evidence were needed, I should submit the following as sufficient: that there were held during the year thirteen regular and adjourned regular meetings; nine special meetings; one organization meeting; and three conference meetings with the Council, one in the committee rooms and two in the council chambers at city hall. If I recall correctly every member has been present at every meeting. I do not recall of a member being absent at a single meeting. This, I consider, devotion to the educational uplift of the city. It has been a great satisfaction to serve the city with members of a School Committee as has been mentioned above.

The press has been generous in time and space to chronicle the news from week to week. The Mayor and City Council have been very considerate of the needs of the schools. This type of co-operation has made it possible for the employees of the school system and the teaching staff to jot down another year of school progress for the City of Quincy. To all I extend my sincere appreciation for the kind and cordial co-operation in an earnest endeavor to carry on in a great work.

Respectfully submitted,

JAMES N. MUIR,

Superintendent of Schools.

The Day Trade School

The long continued depression has affected the enrollment in the Trade School. Instead of looking ahead to the future and realizing that the better trained workers will get the jobs, the boys look at the immediate present, see the large number of unemployed tradesmen and decide against education in certain trades.

The effect of this is very noticeable in the Machine, Plumbing and Woodworking departments. Last June, applications for Machine Shop Practice were so few that it was possible to transfer Mr. Tordoff from the Machine to the Auto Mechanics department to take the place of Mr. Atwood, who had resigned as teacher of related work. The applications for Auto Repair department had increased to such an extent that it was feasible to employ a third man in the shop, and Mr. Louis Gaetani, proprietor of the Weymouth Auto Body Repair Shop, a man very well qualified to teach all forms of Auto Body Repair work, was added to the Trade School staff. Thus, what is really a new trade was added to the school, and the school better fits the needs of this community.

..rollment for the past five years is shown in the following table:

	1926-27		1927-28		1928-29		1929-30		1930-31	
	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Mem. Av.
Auto Mechanics..	42		41		43		48	29.3	37	30.85
Electrical	36		38		35		38	32.5	37	32.64
Machine	34		40		40		31	25.7	38	24.95
Machine (Co-operative)	....		....		....		4	2.	5	1.
Plumbing	38		36		36		39	29.1	29	23.76
Sheet Metal	19		21		20		18	16.3	18	16.67
Woodworking	65		80		76		68	47.1	56	40.99
Special	....		1		....		....	....	....	....
Total Enrollment	234		257		250		246		220	
Total Average Membership ...		182.4		190.6		192.6		182.0		170.86

Although the total cost of running the school for the year ending August, 1931, increased by $39.98 to $53,255.74 due to automatic salary increases, the net cost was reduced as shown by the table below:

Tuition for pupils living outside of Quincy	$6,795 00
Cash for products made in the school.....	2,037 45
Aid from the State of Massachusetts.....	20,039 92
Aid from the Federal Government.....	2,594 87
Miscellaneous receipts	57 08
Total receipts	$31,524 32
Net cost to City of Quincy.....	21,731 42

The Home Making School

The average membership of the Home Making School increased 14.3% from 50.2 for the school year 1929-30 to 57.4 for the school year 1930-31. In February, 1931, there were sixty-three girls enrolled in the school, which is all it will comfortably hold.

In spite of the increased enrollment the total cost of maintaining the school was but $14,840.30, a decrease of $227.85 over the cost of the previous year. The total cost was decreased by the following amounts received by the city treasurer:

Tuition for non-residents	$805 00
Cash for work done	1,131 66
Aid from the State of Massachusetts	5,642 55
Aid from the Federal Government	1,270 75
Miscellaneous receipts	25 90
Total receipts	$8,875 86
Net cost to City of Quincy	5,964 44
Net cost per pupil to City of Quincy	103 91

The net cost per pupil shows a decrease of $17.96 from that for 1929-30.

The decrease in the cost of running the school was due to a decrease in the amount paid for salaries because two new teachers took the place of older teachers, one of whom was at maximum salary, and also the fact that a smaller amount was expended for new equipment. The net cost was further reduced by an increase in tuition, the school having seven non-resident pupils during the year.

There was but one change in the faculty—Miss Alice Atkins succeeding Mrs. Bethel B. Ross, who was transferred to the North Quincy High School.

The steady increase in the enrollment of the school indicates that the adolescent girl and her parents are gradually appreciating what the school has to offer and that the school and its teachers are fulfilling a need. For the last two years the school has been at capacity enrollment most of the time. Without increased facilities the school cannot continue to grow.

The Continuation School

As was predicted in the school report for last year, the Continuation School showed a further loss. The facts are given below:

Enrollment	1926-'27	1927-'28	1928-'29	1929-'30	1930-'31
Boys	84	95	82	72	45
Girls	56	62	65	54	47
Totals	140	157	147	126	92
Hours of Service	8,988	11,860	7,996	7,148	6,132

The decrease in the number of boys is particularly great, which makes difficult an economical administration of the school. It is possible to obtain capable part-time women teachers for the girls

and to relate the school work to the day employment. It is practically impossible to obtain a satisfactory part-time man teacher and impossible to relate the school work to the day employment, as the boys are engaged in almost as many different branches of industry as there are boys.

Mr. Clark, the Director, has done some very valuable follow-up work with the boys, but there are not enough boys now enrolled to warrant his full-time employment in the Continuation School.

Although it cost $3,584.17 to maintain the Continuation School, this was greatly reduced as follows:

Tuition fees for non-residents	$72 60
Cash for work done	23 10
Aid from the State of Massachusetts	1,593 89
Aid from the Federal Government	281 74
Total receipts	$1,971 33
Net cost to City of Quincy	1,612 84

Evening Industrial School for Men

Although the total number of men served by the Evening Trade Extension Classes increased in 1930-31, the number of different classes reached the lowest point in years, as shown by the table below:

	1926-'27	1927-'28	1928-'29	1929-'30	1930-'31
Shop Mathematics for Electricians	13	....	....	....	....
Automobile Mechanics	26	20	20	....	....
Electrical Wiring	31	....	....	....	....
Machine Shop Practice	19	12	26	18	15
Machine Drawing and Shop Mathematics	41	27	43	....	....
Plumbing	46	35	33	20	....
Roof Framing	10	....	22	....	....
Sheet Metal Drafting	33	20	23	19	27
Ship Blue Print Reading	63	32	44	53	156
Totals	282	146	211	110	198

The Ship Blue Print Reading class was the only one to complete the twenty weeks' work—the other two were closed before that time because of poor attendance.

The enrollment in the fall of 1931 showed an increase and classes were open in Auto Mechanics, Electrical Wiring, Machine Shop Practice, Plumbing, Sheet Metal Drafting, and Ship Blue Print Reading. The class in Auto Mechanics proved unsuccessful, but all the others were in operation when evening school closed for the Christmas holidays.

For the school year ending in August, 1931, $1,284.09 were expended for the Evening Industrial School for Men, a decrease of $98.05, due to fewer classes. The total cost was reduced as follows:

Tuition fees for non-residents	$48 00
Aid from the State of Massachusetts	588 41
Aid from the Federal Government	59 27
Total receipts	$695 68
Net cost to City of Quincy	588 41

Evening Home Making School for Women

The number of women reached, the type of work done, with a comparison for the past five years, is shown in the table below:

	1926-'27	1927-'28	1928-'29	1929-'30	1930-'31
Millinery	112	48	....	....	....
Foods	105	120	153	150	87
Clothing	726	751	719	522	538
Home Nursing	16	17	37	30	94
Home Decoration	....	....	42	100	126
Totals	959	936	951	802	845

Wherever possible the teachers have stressed thrift in the classes. Renovation was again emphasized in the Clothing classes —out-of-style or outgrown garments were remodeled or made over. In the Foods classes the "Left Overs" unit proved very valuable. Miss Perry reports the following interesting remark, "Now that I know how to use 'left overs,' I will not throw them away."

The enrollment in Home Nursing showed a gratifying increase.

To carry on the above work the city expended $7,890.88, a decrease of $320.05 over the previous year in spite of a greater enrollment. The total cost to the city was reduced as follows:

Tuition fees for non-resident pupils	$97 95
Aid from the State of Massachusetts	3,493 43
Aid from the Federal Government	759 96
Total receipts	$4,351 34
Net cost to City of Quincy	3,539 54

As a result of the expenditures above, most of which were to pay salaries of teachers and custodians, the pupils converted raw material worth $5,722.97 into finished products worth $17,957.19, besides acquiring additional skills and increased knowledge which will be of great value in the economical management of the home.

Americanization Work

During the school year 1930-31 the city expended $5,236.46 for Americanization classes. The State reimbursed the city to the extent of $2,421.50, bringing the net cost to $2,814.96, an increase of $68.29 over the cost for 1929-30. For the money spent the city educated 605 people, of which number 37 were illiterate minors. The department, consisting of nineteen teachers and the Director, Miss Perry, cared for 130 more pupils than the previous year.

Twenty-two different nationalities were found among the six hundred and five pupils. It is an interesting fact that two hundred and sixty-nine pupils were over thirty-five years of age, which speaks well for the ambitions of the pupils and the teaching skill of the teachers. Every teacher of the above classes is a trained teacher holding a State certificate in Americanization. In the words of Miss Perry, "They have done a fine piece of work."

The co-operation of various organizations has been continued; the spirit of friendliness and helpfulness is much appreciated.

The citizens of Quincy had an opportunity to see some phases of Americanization work at the Americanization Night of the Quincy Federation of Women's Organizations. At that time a Beginner, an Intermediate and a Citizenship Class were taught lessons by their teachers in a typical schoolroom set up on the stage.

The Evening Academic School

For the fiscal year ending December 31, 1931, $4,168.84 were expended for Evening Academic classes, Evening Gymnasium classes and supervision of evening basketball games, which was an increase of $452.60 over the expenditure for 1930. The increased cost again represents increased service.

With the closing of the Evening Academic school in March, 1930, there were in active membership 125 pupils with eight teachers. School closed in March, 1931, with 146 pupils in active membership and eleven teachers. In the fall of 1931, 744 enrolled for academic work contrasted with 593 in 1930. The students were so distributed, however, that it was only necessary to have one more teacher than in the fall of 1930.

The table below shows the fall enrollment for the past five years:

Subjects	1927	1928	1929	1930	1931
Office Practice	....	....	....	12	24
Advanced Bookkeeping	....	20	17	18	35
Elementary Bookkeeping	79	47	65	50	44
Business Arithmetic	119	69	102	112	95
Business English	191	109	146	187	209
Penmanship	89	44	80	....	....
Elementary Stenography	142	103	174	70	67
Intermediate Stenography	....	18	17	35	20
Advanced Stenography	32	36	39	48	61
Elementary Typewriting	194	142	226	139	189
Intermediate Typewriting	....	....	17	35	27
Advanced Typewriting	36	37	41	48	56
Mechanical Drawing	69	42	76	128	98
Grammar School Subjects	....	21	8	36	31
Algebra	35	....	50	63	72

In 1930 the requirements for studying Elementary Stenography were increased with the definite idea of decreasing the number enrolling but increasing the quality of the pupils. The enrollment figures seem to justify the change, for in spite of a greatly decreased enrollment in Elementary Stenography in 1930, there was no decrease in the number enrolled in the Advanced Stenography class in the fall of 1931.

The Evening Academic classes for several years have been held three nights per week for two hours each night. The following table shows some interesting figures for the past four school years:

	1927-28	1928-29	1929-30	1930-31
Total Enrollment	435	347	486	593
Average Membership	208.9	180.8	229.3	281.3
Average Attendance..	163.5	134.8	170.2	205
Per Cent of Attendance	78.2	74.5	74.2	72.8

It is evident from the figures that over half of those enrolled lose interest or find three nights per week of evening school attendance too strenuous. A study of the attendance figures for seven years shows in all years a very good attendance on Monday evenings, falling off on Tuesday, with a very poor attendance on Thursday. In the fall the evening school students were asked to express their preference, and a large majority expressed preference for but two nights per week—two-thirds of those preferring two nights per week desired the session be extended to two and one-half hours.

In view of the above facts it would seem wise to conduct the Evening Academic classes next fall on two nights per week, starting with the longer session and changing back to a two-hour session if the students find the longer session too fatiguing.

The evening gynasium classes are still popular. In the fall, 316 women were enrolled in six classes, one more than last year, and 121 men in three classes.

The Academic Summer School

The following table gives the important facts for the past five years:

Grades	Year	Number Teachers and Principals	Total Enrollment	Average Membership	Per Cent of Attendance	Total Cost	Cost per Pupil
VB-VIII A	1927*	29	423	394.46	98.48	$2,336 71	$5 92
IV-VII	1928	21	552	504.89	96.88	2,860 26	5 67
IV-VI	1929	16	348	311.01	86.53	2,256 09	7 25
IV-VI	1930	16	380	345.69	96.81	2,221 82	6 42
IV-VI	1931	16	356	342.05	97.74	2,244 00	6 56

*Summer School maintained for but 5 weeks.

In many ways the work for the past summer was very successful. Although it was a hot summer the average membership and the per cent of attendance were high, which made it possible to do good constructive work.

Sixty-nine pupils enrolled to try and gain lost promotions: 56, or 81.2%, were successful, 5, or 7.2%, left before the end of summer school, and 8, or 11.6% failed. Two hundred eighty-seven

enrolled to remove conditions: 240, or 83.6%, were successful, 27, or 9.5%, left, and 20, or 6.9%, failed.

Standardized tests in Reading, Arithmetic Fundamentals and Arithmetic Reasoning were given on the second day of Summer School and during the last week. The teachers were able to locate major difficulties at once and the final test indicated much improvement on the part of most pupils.

Mentally Retarded Pupils

During the school year 1930-31, ninety-nine children were referred to the State clinics by the school principals with the consent of this office. Seventy-five were examined by Dr. Patterson of the Wrentham clinic and the others either at the Child Guidance clinic or the Habit clinic—fifty were found to be three or more years mentally retarded.

On October 1, 1931, there were one hundred fifty-nine children three or more years mentally retarded in the school system. Seventy-nine children were in six ungraded "Opportunity Classes" of the elementary schools, thirty-six were in the "Opportunity Class" for older boys in the Central Junior High School portable, fifteen in the "Opportunity Class" for older girls in the portable at the Coddington School and seven were in the adjustment classes of the Junior High Schools. The mentally retarded children not cared for in special classes are scattered throughout the school system, either in schools not easily accessible to a special class or in a district where the class is overcrowded. In a few cases the examining doctors have recommended that the child remain for the present in the regular grade where located when examined.

It will be seen that of the children referred for examination for mental defect, only slightly over fifty per cent are found to be three or more years mentally retarded by the clinics. No child is placed in a special class for mentally retarded children unless the examining clinic so recommends. A group intelligence test given to all Junior High School pupils and the tenth grade of the Senior High indicated that there are several over age children in those grades who are probably three or more years mentally retarded and who should have been referred to a clinic for expert diagnosis earlier in their school life.

In order to care for the larger group of boys at the Central Junior High School portable, it was necessary to add a new teacher to the staff. At the present time Quincy is fortunate in having every teacher in the "Opportunity Classes" specially trained to teach mentally retarded children.

It is a great relief to the regular classes to have the mentally retarded removed, and at the same time they are much happier when placed in classes where they can obtain success in some type of work. The teachers of the mentally retarded carry them as far as possible in the academic subjects while devoting much attention to that training which will develop good social habits.

REPORT OF THE SENIOR HIGH SCHOOL PRINCIPAL

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*
My dear Mr. Muir:

This report which I have the pleasure of handing you is my twentieth as principal of the Senior High School. At the beginning, I would like to make note of the increase in numbers of high school pupils during the time that I have been in charge of this school. In 1912 there were 790 pupils in a four-year high school while this year we have 2,258 in a three-year school. This is a striking increase in numbers and is, in fact, a much greater increase proportionally than the population of the city, but takes into account only our school. A fair comparison with the report of 1912 would require that all pupils of the corresponding four grades be taken into consideration. This total is 3,705 and shows that the increase has been almost appalling. However, in this respect Quincy has not been unique because it is the experience of the country at large. Many causes have contributed to bring this about, but the significant fact is that the interest of enormous numbers of young people has been so aroused that they have been willing to remain in school for a much longer period than was formerly the case.

The present year is proving to be a very difficult one for us because of crowded conditions. Our pupils number 218 more than last year and the task of finding room for them has been all but impossible. Often rooms have two pupils in a seat; large difficult study groups have to be held in the auditorium; and during the lunch periods and the passing of classes, great milling throngs crowd the corridors or cafeteria, keeping the teachers' nerves on edge and making supervision a difficult matter. Yet the teachers have met the situation with courage and skill and have maintained the usual standards of scholarship and conduct in spite of the tremendous handicap under which they are working. Fortunately, graduation in January will take about 200 pupils out of the building and afford a slight relief.

At the opening of school in September our school day was lengthened to six hours in order that all secondary schools in the city might have uniform hours. For all these schools the hours are now from 8.30 A. M. to 2.30 P. M. Our school was the only one affected since the other schools have had a long day. It was expected that this arrangement would afford the pupils more time in school for study and would result therefore in a high grade of scholarship. Adjustment to the new schedule was somewhat difficult on the part of many pupils and the teachers because they had become accustomed to the shorter day, but, nevertheless, the new arrangement was cheerfully accepted and the added time used for the purpose for which it was intended. Although the lengthened day has had only a short trial in our school, we are inclined to feel that it has helped to improve the scholarship and has had a favorable effect on other activities of the school.

Toward the end of the last school year definite steps were taken to establish a Placement Department in the school and teachers were definitely assigned to that work. The members of the graduating class were interviewed individually, their qualifications noted on proper cards and this information gathered in a card catalogue which is readily available for reference. At the same time contact was made with a large number of business houses

and manufacturing plants in Quincy and Boston in order that these firms might become acquainted with our Placement Department and be led to seek its help in securing workers. Obviously, on account of business conditions, it was not possible to place any considerable number of our pupils in employment this year. We have been able, however, to bring the fact to the attention of employers that we are equipped to train young people for efficient service in office and factories and shall doubtless be able to place many of our pupils in satisfactory employment when business conditions improve.

Athletics in the school continue to show the healthy growth that has been evident during the last few years. The number of boys and girls participating in some form of sport has considerably increased and our competitive teams have made a very creditable showing. Our greatest handicap at present is lack of sufficient suitable equipment. Most of our teams are poorly equipped and some of them lack material necessary for protection and safety. There is a right sort of enthusiasm among the teams, however, and some of them have maintained themselves at their own personal expense, aided by sympathetic instructors.

At the graduation exercises in June the following awards were made: Wollaston Woman's Club Scholarships to Ruth H. Kuhns and Jean MacDonald; Quincy Women's Club Scholarships to Elizabeth A. Cornish and Esther Dewey; L'Eco Club Scholarship to Conceda C. Amoroso; the Washington and Franklin Medal for Excellence in American History to Elizabeth T. Pebler; the Harvard Club of Boston award for outstanding boy in Junior Class to John H. Mulhall; the Quincy Women's Club prizes for the boy and girl who, in the opinion of the faculty and their class, had contributed most to the school, to Ross O. Patten and Alice A Savage.

About the usual number of our graduates entered colleges and normal schools this year as in previous years. Our pupils who took College Entrance Examination Board examinations were as successful as the average of those taking the examinations throughout the country as shown by the report of the Board. Reports from the colleges and schools indicate that our graduates are maintaining very satisfactory standing and in several cases there has been special commendation for scholarship and the spirit shown by the students in the higher institutions which they have entered. Our assistant principal, Mr. Wilson, made the same study for the school year 1930-31 as he made during the year 1929-30 of the loss of pupils for other causes than graduation. The loss during the year 1930-31 was 234 pupils or 9.7%, which is less than the loss of 11% during the year 1929-30. The causes for leaving remain at about the same percentage as for the preceding year except that fewer left to go to work and more left because of sickness and moving from the city. Failure still continues to be the chief cause for leaving school. When the time comes that we are not so overcrowded and our classes are somewhat smaller, the teachers will have more time for individual attention to pupils and the number leaving for this cause can be considerably decreased.

In closing, may I express our gratitude to you for your constant help and advice and to the School Committee for loyal support. Without these we should surely have labored in vain.

Respectfully submitted,

ERNEST L. COLLINS,
Principal of Senior High School.

REPORT OF THE HIGH SCHOOL DEAN OF GIRLS

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit the annual report of the Dean of Girls of the Senior High School for the year 1931.

In general, the work has been along the same lines as last year. As Dean of Girls, I am primarily concerned with the following:

1. **Social Affairs**—The supervision of social affairs means working with the student and faculty committees. In so large a school there is practically always some social activity under way. The time spent is justifiable in that the social program is an important factor in school life and has a distinct contribution to make.

2. **The Girls' Club**—I am advisor for a Girls' Club consisting of two hundred upper-class girls. The purpose of the Club as defined in its constitution is "to promote friendliness, to encourage worthwhile activities, and to serve the school and community." In addition to regular programs, there is a succession of activities sponsored by various committees. As a special event last spring the Club engaged Margaret Slattery as speaker at an all-girl assembly, to which members of the Home Making School were also invited. An organization of this kind is of extreme importance in developing leadership and in building morale through the influence of older girls. An unlimited amount of time could be spent here to advantage.

3. **The Student Council**—The Student Council is made up of representatives from the various classes and is the executive student organization of the school. It assumes certain responsibilities, such as the provision of traffic officers and cafeteria marshals, and sponsors various school projects, such as the publication of the Handbook and a weekly news leaflet. Here again considerable time should be spent. I am one of two faculty advisors.

4. **Educational and Vocational Guidance**—My chief work is educational and vocational guidance. It includes advising girls in their choice of program, discussing with groups and individuals the requirements for advanced training, and providing information in various ways regarding educational and vocational opportunities.

The importance of this guidance work is being generally recognized. If it is to be handled adequately, the school program must make provision for regular classes and individual counseling. There is much to be done in the way of organizing the work in Quincy. Here is where I should like to be able to spend a great deal of time.

5. **Special Cases**—Throughout the year special cases are referred to the Dean. For the most part they are girls who have attracted attention—through their academic work, attendance, conduct and health—to the extent of creating problem situations for the school. During the first ten weeks of the present school year there were 130 such cases. They demand a great deal of time for investigation, adjustment, and follow-up. This work is important. It should receive more attention than I am able to give it.

A detailed study which I made last summer of 350 of these problem cases revealed some interesting and valuable information.

In addition to the above, I have the following responsibilities:

1. **Emergency Room Cases**—The records show that during the past year over 425 girls have come to the Emergency Room. For the most part, the cases have been the usual minor injuries and illnesses. Though minor, it is important that they receive prompt and proper attention. I have tried to use student help as far as possible in the handling of these cases, but at best the time required of me is considerable.

2. **Check-Up of Failures**—Each term I do what I can in the way of checking-up and investigating the failures among the girls. At our last marking period there were 208 who were failing in one subject; 97 additional girls failing in two subjects; 39 in three; 13 in four; 2 in five, making a total of 359 girls failing in one or more subjects, and a total of 581 subjects failed. In each case some attempt should be made to get at the cause of failure. This is, of course, a phase of educational guidance for which an adequate program would provide.

3. **Investigation of Absences**—As hitherto, I have helped the Assistant Principal in the investigation of absences among the girls. Due to the recent addition to the Attendance Department, which has helped to handle more of our cases, I have been making fewer home visits. Telephone calls are made as time permits. The average number of girls absent is over 70 daily.

4. **Extra-Curricular Records**—Twice a year I supervise the assembling of activity records for every student.

The study referred to in the last report revealed that 23% of our students were participating in extra-curricular activities.

5. **English Classes**—I teach two classes of English. This is one-third of a full teaching program. Also there are various assignments and responsibilities which membership in an organized department entails. Inasmuch as the English work is entirely unrelated to the work of the Dean, I find the combination very unsatisfactory.

Respectfully submitted,

MILDRED B. HARRISON,

Dean of Girls.

REPORT OF THE SUPERVISOR OF GRAMMAR GRADES

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

It gives me pleasure to submit the following report:

The "Objectives" in English for the fifth and sixth grades have been completed. They are now being tried out with the view of using the pupils' reactions as a basis of revision.

A number of group meetings were held by the teachers of the subjects of Geography, History, English and Arithmetic in the Junior Highs for the purpose of revising the "Objectives." As a result of these conferences, the "Objectives" for the first semester were completed and refashioned with the view of developing, in an elementary way, "educational self-dependence" and adaptation.

Late in the year our Junior High Schools were asked by the Bridgewater Normal to start what should become a permanent exhibit of Problem-Project work. The matter of the request was taken up with the girls and boys, who co-operated in a most wholehearted manner. This co-operation meant, in many instances, the parting with classroom evidences of work accomplished—always a source of satisfaction and an impetus to further effort—and in some instances the entailing of extra work.

The projects included a series of charts illustrating the beginning of "Intuitive Geometry," a composite book on "The Flags of Africa," giving their history and depicting the interdependence of groups of people, a chart showing the "dynamic force of transportation's effect upon humanity," the aggregate miles represented by the items of an ordinary meal in Quincy, a set of original posters reviewing Algebraic formulae, two interesting units in Science, a collection of favorite poems illustrated by original drawings and pictures, and a book of original cartoons summarizing the study of the Monroe Doctrine.

I desire especially to commend and thank the girls and boys of the sixth grades of the Gridley Bryant, Daniel Webster and Wollaston Schools for the splendid contributions, showing the beginnings of reference and research work to the Exhibit.

In closing, I wish again to express to you my deep appreciation of your confident support, and also to thank my co-workers—the principals and teachers—for the sustaining encouragement of their loyalty and co-operation.

Respectfully submitted,

HELEN MAUDE DELLICKER,

Supervisor of Grammar Grades.

REPORT OF THE SUPERVISOR OF DRAWING

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit my annual report of the drawing department of the public schools of Quincy for the year 1931.

The drawing work in the first six grades has progressed much as in previous years. More emphasis has been placed on originality of ideas both in representation and design. Already a noticeable improvement is to be seen in the results..

Our Junior High School art periods are few, but the students are learning to work more rapidly without sacrificing the quality of the work. These schools have many calls for work within the school, such as posters, signs, etc., which they execute as well as their regular course of study. Beginning this September, art classes have been held at the North Quincy High School for the 10th grade.

During the spring of 1931, posters were produced in certain classes of the Junior High Schools for the Norfolk County Health Association, Inc. Many original posters were obtained and the results were highly praised by Miss Gertrude Greul, executive secretary of the organization. The posters were displayed in the Central Junior High School for the local judging committee which was composed of Dr. Nathaniel Hunting, Mr. Oscar Stevens and Miss Georgianna Lane. The posters chosen by the judges as the best were then sent to a Norfolk County exhibition held at the Norfolk Hospital in June. A few of our Quincy posters were given to Mrs. Nathaniel Hunting for the Quincy branch of the Norfolk County Health Association, Inc. A few others were sent to the headquarters of this organization in Boston.

I welcome this opportunity to express my sincere appreciation to you, Mr. Muir, for your continued help and interest in this department and to Miss Helen Ash for her unfailing co-operation, and also to the teachers and pupils who so generously respond to the demands of the department.

Respectfully submitted,

AMY E. ADAMS,

Supervisor of Drawing.

REPORT OF THE SUPERVISOR OF MUSIC

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

It gives me pleasure to submit the following report for the music department.

In our program of music we are trying to teach children to discriminate between the good and bad in music, help them to give music a place in their individual lives, and aid them in the appreciation and use of music as a social art.

The main objectives of our work, then, are as follows: (1) the building of a repertoire of worthwhile songs, (2) the control of the mechanics of reading and interpreting music, (3) the development of taste and pleasure in music, (4) the correct use and guidance of the singing voice, (5) the laying of the foundation for instrumental skill and practice in applying it, (6) the discovery, encouragement, and guidance of musical aptitudes and talents, and (7) the development of a permanent interest in music. Our work has already been carefully outlined in previous reports for the furtherance of these objectives.

In the vocal field, classroom or chorus singing is required of all children except in the Senior High School, where choral work and glee clubs are made elective subjects with diploma credit. This year we have added to the vocal department of the Senior High School classes for the training of the voice, thus offering to girls and boys with promising voices an opportunity for special development. In May, a concert was given by approximately seven hundred children to demonstrate the vocal work from the early grades of elementary schools through the well-developed choruses of the Senior High School.

In the instrumental field the classes for band and orchestral instruments are now recognized as a necessary factor even though they are conducted wholly outside of school time. These classes have been in operation since 1919. They are open to any school child for any instrument, and the twenty-five cent fee for lesson makes the work self-supporting. In May, the annual instrumental concert was given to demonstrate the working of these classes and to show the resulting orchestras and band.

All music study during the three years of Senior High School is elective, and the fact that the choruses, glee clubs, orchestras and band are larger and of finer quality than in previous years makes me feel that there is a steady improvement in the music department.

The work in the elementary schools should be greatly benefited with the appointment of Miss Doris Simonds as an Assistant Supervisor of Music. This will directly relieve Miss Tuthill in her work and make it possible for the elementary teachers to have proper supervision.

In closing, may I thank you for your constant support and express my gratitude to the School Committee, the school officials and the teachers for their co-operation.

Respectfully submitted,

MAUDE M. HOWES,
Supervisor of Music.

REPORT OF THE SUPERVISOR OF PHYSICAL EDUCATION

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I herewith submit the report of the department of physical education for the year 1931.

The opening of the North Quincy High School necessitated a change in the teaching assignments. Another teacher was placed in the department, being given a full-time program of girls' work in that high school. This program was arranged, giving her opportunity to spend a full day each week on special work.

A careful survey was made of all pupils needing help for postural difficulties. These pupils were given special exercises in large groups for a few weeks until the instructor became better acquainted with the problems to be met. Pupils needing special attention were then divided into classes of twenty and assigned regular meeting periods. These sessions are of twenty minutes' duration and much real progress has already been made in this type of special work.

One particular handicap at Quincy High School has been a lack of proper facilities for tabulating and filing data helpful in the conduct of physical education work. With the large number of pupils cared for by each instructor this has been a serious drawback. A modern "Kardex" filing cabinet has been placed in each physical education office with an adequate supply of cards arranged to cover complete lists of activities, grades and records for three years, together with history of sickness and accident. With the use of this filing system the uncertainty of the old plan will disappear, being replaced by a definiteness making for greater efficiency.

Co-operating with the school physicians, regular medical examinations were given pupils of the seventh, ninth and tenth grades and to all entering competitive sports. These examinations covered heart, lungs and hernia.

"Physical education should aim to provide skilled leadership and adequate facilities that will afford an opportunity for the individual or group to act in situations that are physically wholesome, mentally stimulating and satisfying and socially sound."

"Physical education is fundamentally an attitude, a way of living, a point of view; incidentally it is a technique, a performance, a particular skill. To him who enters the lists of its activities there should come as by-products—health, skill, good posture, strength and endurance."

Respectfully submitted,

WILLIAM H. WHITING,

Supervisor of Physical Education.

REPORT OF THE DEPARTMENT OF VISUAL EDUCATION

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I submit the following report, setting forth the aims of the Visual Education department, and the plan of organization developed to promote the desirable use of Visual Aids.

The Department of Visual Education serves the teachers of the city with the available teaching aids.

It recognizes that every teacher should use materials and machinery of modern invention, which increase the efficiency of teaching. The following essentials are necessary to accomplish the desirable use of teaching aids:

1. The materials should be easily available to the teacher.
2. The materials should be organized for use by the teacher.
3. The material should be used by the teacher in the individual classroom at the time when it correlates with the subject taught.
4. The suitable materials should be selected from the vast amount of available material.
5. The teachers should be made acquainted with available aids and should be trained in their uses.

To serve the above purposes, we have established a plan generally known as the "Quincy System of Visual Instruction." Briefly, this plan includes:

1. The materials recommended for use consist of pictures, slides, filmslides, motion pictures, stereographs, models, sand tables, charts, exhibits, living animals and plants, and trips.
2. Teachers who would find material useful in their teaching, originate the orders and inspect the material for approval before purchasing.
3. A score card has been developed to objectively evaluate the available motion pictures to determine their suitability for school use.
4. The available aids have been centralized in one office, which makes possible proper filing, desirable inspection and repair, and necessary records of use.
5. The projection machinery recommended by the department must be usable by the teacher in the classroom. In the use of motion pictures we are strictly limiting our use to the sixteen millimeter size films.
6. Our motion picture films are at present limited to silent films, because they serve our purpose best.
7. We own our own library of films because we find that if a film or other type of Visual Aid is worthwhile, it is cheaper to own the material than to hire its use.
8. Most schools own their own projectors.
9. One teacher in each building serves as the director of Visual Education for the teachers of the building. Her purpose is to keep in close touch with the needs of each teacher, to place and receive orders, and to keep a record of the use of the material.
10. Many schools have organized projection clubs composed of children from the different rooms. The purpose of such

clubs is to train the pupils to assist the teacher in the mechanical operation of the machinery necessary for projection.

11. The Director of Visual Education has met with many groups of teachers for the purpose of giving the necessary instruction in the proper use of the machinery and materials.
12. Some teachers have taken the course on Visual Education at Boston University.
13. A short course in the essentials of photography was given to about seventy teachers.
14. The director has spoken to several groups of parent-teachers associations on the subject of Visual Education.
15. An experiment testing the value of sound motion pictures in the teaching of General Science is being conducted by Harvard University Graduate School of Education, under a grant from the Carnegie Fund.
16. A delivery system has been established to make available to the teacher the material she wants at the appropriate time.
17. The annual meeting of the Massachusetts Branch of the National Academy of Visual Instruction is to be held at the North High School, Quincy.
18. A paper called the Projector serves to keep the teachers informed of the progress in the field and of the news of the department.

It is generally known that we learn more through the eye than through any other of our senses. By the use of Visual Aids we hope to bring the world into the classroom, to make the unseen visible, the difficult more plain, to present information in its thorough and natural state, to motivate the pupil, and to arouse the learner to the point where he will want to know more about the subject presented.

All the materials recommended are teaching aids. The organization is established to serve the teachers.

Visual Education is attracting the attention of educators throughout the country and the world. Many school systems are organizing Visual Education departments. Because of the increased interest in this subject, we are receiving many inquiries about our organization. The essentials of our system will be elaborated in a mimeographed report, which will be available to all who may be interested in it.

Respectfully yours,

ABRAHAM KRASKER,

Director of Visual Educational Dept.

REPORT OF THE SCHOOL PHYSICIAN

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

The report of the health activities of the Hygiene Division for 1931 is herewith submitted to you. A brief summary of the annual events follows.

The Follow-Up Clinic of the State Department of Health

The re-examination of the school children listed under this clinic occurred in January. The result, as shown by the report of Dr. David Zacks, the supervisor of the clinic, is self explanatory:

Number of children re-examined		166
Number of children improved	156	
Number of children unimproved	9	
(Card missing—unknown)	1	
Number of children X-rayed		166
Number of children tested		152
Number of re-actors	99	
Number of non-re-actors	53	
Number of children recommended for sanitorium treatment		1
Number of children recommended for Summer Camp		19

This group of children was again X-rayed and tested by the Clinic in December and will be re-examined in February, 1932.

The Campaign for the Prevention of Diphtheria

Co-operating with the Department of Health, immunization treatments were given in the schools during May. The school nurses received 996 requests, and 892 children completed the treatments during the three weeks of this activity. We are greatly indebted to the Commissioner of Health, Dr. C. J. Lynch, and his staff of doctors and nurses for their services in helping us to obtain such successful results in this important preventive work.

Physical Examinations

Beginning in September, a group of doctors, comprising Rachel L. Hardwick, Ella G. Hedges, Robert L. Cook, Edward Broderick and Fred P. Costanza examined the pupils of the 7th and 9th grades of our Junior High Schools and the 10th grade of the Senior High School. The pupils of the Trade and the Home Making Schools, and also the boys of the athletic group of the Senior High School were included in these examinations.

The examinations of the pupils of the first grade of the elementary schools started in September and were completed in December. The increasing number of mothers attending these examinations is very gratifying and should be regarded as a most helpful factor in this branch of our work.

Routine Measures

The health certificates issued for employment of minors have decreased during the year, a total of 210 having been granted,

according to the report of the Supervisor of Attendance, Mr. Charles H. Johnson.

In regard to contagion, cases of Scarlet Fever, Measles, Mumps, Chicken Pox and Whooping Cough have appeared at various times during the school year. The control of Scarlet Fever still remains a problem, especially when its symptoms are so vague.

To complete this report the effective work of our school nurses should again be emphasized. A glance at their annual report reveals the extensive area of inspection that comes under their supervision. Their efforts to maintain the standards of health among our school children are most steadfast and they are entitled to the highest commendation.

Please allow me to express my appreciation of the encouragement and helpfulness you have extended to this division. I also wish to thank the principals and teachers for their valuable cooperation and support in our health program.

Respectfully submitted,

MARIA E. DREW, M.D.,

School Physician.

Appendix A

STATISTICAL DATA

1. Financial Statement for the Fiscal Year Ending December 31, 1931

I. Regular Schools

Appropriated by City Council	$1,153,966 80
Expended	1,130,538 61
Balance unexpended	$23,428 19

Itemized Expenditures

Instruction	$872,134 37
Administration	38,298 74
Travel outside the State	114 53
Text-books	19,704 53
Stationery and supplies	30,333 91
Operation	107,599 63
Maintenance	45,162 90
Miscellaneous	10,602 36
Evening Academic School	4,168 84
Summer Schools	2,244 00
Merrymount and Houghs Neck Auditoriums	174 80
Total	$1,130,538 61

II. State-Aided Schools

Trade School

Appropriated by City Council	$53,367 00
Plus balance from 1930	1,475 00
	$54,842 00
Smith-Hughes Fund, Balance from 1930	2,857 88

Custodians and Janitorial Service: Chief Custodian, 1; Engineer, 1; Custodians, 23; Assistant Janitors, 5; Laborers, 2; Cleaners, 10; total	42
Total number different persons employed by the School Department	608

[1] Continuation and Trade Schools located in Senior High Building.
[2] Includes 7th, 8th, 9th grades of Junior High and 10th grade of Senior High.
[3] One is also included in Junior High.
[4] One teaches also in Evening Home Making School for Women.
[5] Two teaching part time.
[6] Six teach also in Senior High, five in North Quincy High, four in Junior Highs and one in Trade School.
[7] Five teach also in Trade School.
[8] One teaches also in North Quincy High School.
[9] Three teach also in Elementary Schools, two in Junior High Schools, one in North Quincy High School, four in Senior High School.
[10] One teaches also in Evening Academic School.
[11] Three teach also in Evening Home Making School for Women.

7. Report of Supervisor of Attendance

MR. JAMES N. MUIR, *Superintendent of Schools, Quincy, Mass.*

My dear Mr. Muir:

I hereby submit my thirty-fifth report for the twelve months ending December 31, 1931.

Number of cases investigated for non-attendance as per blanks 1192
Number found to be truants 119
Number of transfer cards received and placed..... 1175

Details regarding attendance work and employment certificates for year ending December 31, 1931, appear in the following tables:

Attendance Work by Months

1931	Number of Cases Investigated	Actual Truants
January	68	....
February	93	7
March	128	11
April	87	9
May	131	16
June	96	9
September	97	5
October	217	41
November	183	18
December	92	3
Totals	1,192	119

Employment Certificates Issued for the Year Ending December 31, 1931

	Boys	Girls	Total
Educational Certificates, Form I:			
16 to 18 years of age	405	190	595
18 to 21 years of age	447	195	642
Employment Certificates (14 to 16 years of age):			
Form C (regular)	27	2	29
Form D (non-resident)	3	1	4
Form E (limited temporary)	87	14	101
Form F (limited)	29	13	42
Special Certificates:			
Domestic	....	25	25
Farm	9	....	9
Home Permit	....	16	16
Totals	1,007	456	1,463

Total number issued in 1929	2,103
Total number issued in 1930	1,557
Total number issued in 1931	1,463
Decrease for year	94
Total number of newsboys' licenses in force	245

Respectfully submitted,

CHARLES H. JOHNSON,

Supervisor of Attendance.

Arthur Robert Wells
J. Frederick Wennberg
Virginia Frances Wheeler
Alice Marie Wherty
Sally Whitcher
Richard J. White
Victor Eugene Whitehouse
Esther Elizabeth Williams
Ruth Alice Williams
Joseph Winship
Eleanor Jane Worcester
Donald Clarence Wright
Richard H. Wright
Ruth Alden Wyand
Edith E. Young
George Chester Young

2. Graduates from the Home Making School, June, 1931—25

Ellen Cummings
Kathryn Elizabeth Cronin
Jessie Davidson
Doris Althea FitzGerald
Irene Gladys Galvin
Lillian Ingeborg Grahn

Mary Ellen Griffin
Mary Jenny Lambros
Evelyn Alice Lear
Alice Eleanor Lucier
Domenica Marini
Lillian Anna McGarry
Margaret Jane Morton
Frances Perfetuo
Myrtle Clare Rae
Lydia Marie Rintamaki
Helen Rita Russo
Evelyn Estella Sherrard
Mary Briggs Stevens
Mary Beatrice Taylor
Irja Tellevo Tyni
Lillian Kaarina Vainio
Sigrid Sylvia Walenius
Margaret Lucille Ward
Dorothy Wallin

3. Graduates from the Trade School, June, 1931—34

Cabinet Making Department

John Bain
Harold James Bates
John N. Hutchinson
Russell MacDonald
Felix Marchetti
Harold Russell Payne
Crosie B. Pompeo
John J. Testa
Sanford Joseph Wilding

Electrical Department

Edward John Cahill
George Thomas Leggett
Roy Alexander Macleod
Francis Joseph Pendergast
Joseph Carl Schneiderhan
Gaetano Tenore
Wilfred Trotman

Auto Mechanic Department

Alberico J. Bonomi
Frederick L. Broydrick
Kaino Kallio
William A. Nigro
Shafick M. Simon

Machine Department

Frank Peter DiCesare
Brantisio N. Lucci
Alexander W. MacGugan
George Nereo
Louis Pellegrini

Sheet Metal Department

Emilio Peter Grazioso
Andrew S. Little, Jr.
James J. Woods
Joseph Pratt Youngworth

Pattern Making Department

Arthur William Danielson
Frederick C. Jackson
Oscar W. Siltanen

Plumbing Department

Lawrence Paul DeCoste

Appendix C

SCHOOL STAFF AND TEACHERS' ORGANIZATIONS

1. Organization of Staff, December, 1931

Black face signifies attended without graduation.

Attendance for less than one year at an institution is not noted.

James N. Muir, B.S., Superintendent, University of Pennsylvania; elected 1927

Albert H. Cochrane, Ass't Superintendent, Harvard, A.B., Ed.M.; elected 1925

Senior High School—Coddington Street

Teachers	Department	Where Educated	Date of Election
